Summary

Senior User Experience, Interface, and Visual Designer, proficiency in AI-driven design tools, a track record of using AI for data-driven insights and efficiency, and achievements like reduced design iteration time or increased consistency across platforms. Skills included Creative Direction, UX Design, Research, Brainstorming & Ideation, Wireframing, Journey Mapping, Interactive Prototyping, Usability Testing, UI Design, Visual Design, Dashboards, Design Systems, Component libraries, Brand Identity, Print Design, Video & Motion Graphics. Vast experience with understanding the aspirations and behaviour of real people, interpreted business goals and functional requirements to create user-centered UX/UI and Visual design solutions.

Design Tools

Proficient in **Figma, FigmaMake, Sketch, Adobe XD, InVisionApp, Abstract, Zeplin** prototype tools, and **Adobe Creative Cloud: Illustrator, Photoshop, InDesign, Acrobat, Dreamweaver, After Effects, PremierePro**, including basic HTML5, basic CSS, and JavaScript technologies.

Professional Experience

Senior UX/UI and Visual Designer
Morgan Stanley New York, NY

Oct 2021 to Sept 2025

As a Morgan Stanley consultant, I worked on UX/UI and Visual design for multiple responsive web and mobile applications (iOS and Android) projects, while helping to define a new MSO Home Loans and Savings Account Experience for Morgan Stanley and ETRADE.

- Worked closely with the UX executive director and the UX team, helped execute the Wealth Management products vision by being involved in every step of the end-to-end product design process
- Well-crafted, intuitive and elegant experiences that empower clients to make confident financial decisions
- Worked closely with a research team to synthesize qualitative and quantitative data and make value-driven design decisions that translate into clear, simple UIs
- Created and presented a variety of design deliverables (sketches, wireframes, user flows and clickable dynamic prototypes with page transition) in a way that engenders confidence in solutions with the team and the greater organization
- Designed and delivered responsive/adaptive solutions that are optimized for web and mobile interfaces, and partnered with engineers to translate designs into successful products
- Worked closely with the larger Wealth Management UX team to share design best practices, align on patterns, and promote a design-centric culture at the firm. Loved every minute of it!

Senior UX/UI Designer

FedEx Corporation Dallas, TX

Jan 2021 to July 2021

As a FedEx consultant, I worked on UX/UI and Visual design on multiple responsive web and mobile applications (iOS and Android) projects, while helping implement a user-centred design methodology. Collaborated closely on product planning and execution with key stakeholders across FedEx Products, Business and Development teams in Dallas, and partnered with my UX, UI, and visual designers to produce intuitive, delightful user experiences.

- **UX Design:** As a UX specialist, I partner with various designers to work through the early stages of a design or product, working from strategy and feature definition into wireframes, sketching and prototyping, copywriting, testing, and iterating
- **Interaction Design:** Creating concept models, heuristic reviews, sitemaps, process flows, sketches, wireframes, prototypes, UI frameworks, mockups, brand style guidelines, design specifications, icons, and final pixel assets, and detailed specifications for responsive web, tablet, and mobile applications
- **Collaboration:** Working closely with visual, copy, production, and programming team members to create intuitive, delightful user experiences

Senior UI/UX and Visual Designer

Marsh and McLennan Phoenix, AZ

Oct 2018 to Dec 2020

Led, designed, and produced high-quality, scalable, user-centred design projects, from concept and strategy to completion. Managed all aspects of user experience design delivery, including the production of wireframes, mockup templates, sitemaps, interactive prototypes, user testing, user flows, heuristic evaluations, and responsive designs, and produced pixel-ready assets.

- Created and produced Marsh web, tablet, and mobile insurance-based applications for Tesla vehicles, aligning with their brand identity (the Netherlands, Germany, USA, Canada, and Hong Kong), BlockChain, Cypherpunks Risk Exchange, and Marsh Claim Review Solutions
- Supported Marsh product teams with their digital product design, wireframes, prototyping, designing for chat-bots, dashboards, user testing, iterations, and data visualizations on the business side, and performed industry and competitive analysis

Senior UI/UX Designer

Apple Inc. Sunnyvale, CA

Apr 2018 to Sep 2018

As a UX designer, I designed and produced for multiple applications and platforms that support SAP Global Services. Able to tackle complex technical interaction problems and work collaboratively with engineers, product managers, executives, and other designers, leading design throughout the strategy, design, and development life-cycle..

- Experienced in user-centred design, and is hands-on from the initial wireframes to developing prototypes and providing final assets
- Delivered wireframes, UI frameworks, mockups, interactive prototypes, design specifications, final pixel assets, icons, etc.

Senior UI/UX and Visual Designer

Dell/EMC Franklin, MA - USA and Burlington, ON - Canada

July 2008 to Feb 2018

Post-Dell/EMC merger to Dell Technologies, applied accumulated experience to create, develop, and improve existing pages, design new campaign pages, and advanced UX/UI and Visual designs, and successfully deliver digital/print materials to stakeholders across a broad range of training industries in accordance with brand guidelines, on time, and within budget. Ensured compliance with the look and feel of Internal, External, Partners, and Social Media for newly-formed Dell EMC Education Services.

- Led the design division across Dell EMC Education Services training course products and championed UX/UI design as a critical part of an agile software development process. Conducted on-site user interviews and ran usability testing sessions to better understand the goals and pain points of users and coordinated sessions with clients and stakeholders to define features and interactions, leading to high-fidelity mockups for the design and product development teams
- Created and designed the execution of client desktop, tablet, and mobile websites, along with the development of interactive applications, effective visual design solutions to support marketing campaigns, newsletters, banner ads, social media, and more

UX and UI Designer

Neilmed Pharmaceuticals Santa Rosa, CA

Dec 2005 to June 2008

As a UX/UI Designer, enabling Neilmed Pharmaceuticals' enhancement and re-launch Initiatives. Created and produced several key documents (Sitemaps, UI function flow diagrams, clickable prototypes, templates, printed collateral, posters, and trade show showcase designs) to guide the reconstruction of the website and expansion of the future web apps.
