

UCHE OKONKWO

ServiceNow Administrator/Developer

(434)-882-3666 | uche.jenny.okonkwo@gmail.com | www.linkedin.com/in/uchechukwu-okonkwo | DFW Area, TX

PROFESSIONAL SUMMARY

As a highly skilled ServiceNow Administrator and Developer, I specialize in transforming complex business processes into streamlined, automated solutions that drive operational efficiency. With deep expertise in IT Service Management (ITSM), including Incident, Change, Problem, Release, Knowledge Management, and Service Catalog development, I excel at improving service delivery and enhancing user experiences. My hands-on experience in IT Operations Management (ITOM), including Discovery, Event Management, and Orchestration, provides real-time infrastructure visibility and automated remediation, ensuring seamless IT operations. I have a proven track record of managing and optimizing the Configuration Management Database (CMDB), ensuring data accuracy for service impact analysis, root cause diagnosis, and compliance. By aligning configurations with the Common Service Data Model (CSDM) framework, I have enhanced service mapping, business capability modeling, and reporting, improving incident resolution and enabling more informed strategic planning. With a strong background in IT Asset Management (ITAM), I have led hardware and software asset lifecycle management and governance, successfully integrating asset data with procurement and compliance systems to mitigate risk and control costs.

My development expertise spans designing application modules, automating workflows, and creating catalog requests, and building user experiences in Service Portal and Employee Center using scripting, Flow Designer, Business Rules, and IntegrationHub to deliver scalable, high-impact solutions.

Additionally, my experience extends to Process Management, Procurement Operations Management (POM), Project Portfolio Management (PPM), and Strategic Portfolio Management (SPM), with proficiency in cloud platforms like AWS and Microsoft Azure. As a mentor and leader, I ensure teams meet the highest standards of quality and efficiency, consistently delivering projects on time and within scope.

PROFESSION CERTIFICATIONS

- Certified System Administrator (CSA)
- Certified Application Developer (CAD)
- Certified Implementation Specialist - Discovery (CIS-DISCO)
- Configuration Management Database (CIS-CMDB) Certification
- IT Operations Management (ITOM) Service Mapping & Event Management Implementer Certification
- IT Assets Management (ITOM) HAM & SAM Implementer Certification
- Human Resources Service Delivery (HRSD) Implementer Certification
- Certified Virtual Agent
- Certified Platform Analytics
- Certified UI Builder
- Certified Integration Hub
- Certified Predictive Intelligence
- Certified Flow designer
- Certified Now Assist Executive
- Certified Agentic AI agent
- Automated Test Framework Certification

WORK HISTORY

Boeing. Sr. ServiceNow Software Developer/Engineer with Architect Experience (Contract) March 2025 – Present

- Implemented SPM core modules (Demand, Project, Portfolio, Resource, and Financial Management) for a global enterprise to unify project intake, prioritization, and delivery tracking.
- Integrated SPM with SAP for financials and JIRA/Azure DevOps for agile project delivery.
- Designed and implemented incident workflows with SLAs, escalation rules, and automated notifications to ensure timely resolution and compliance.
- Implemented Agile Portfolio Management in ServiceNow SPM to support Scaled Agile Framework (SAFe) delivery across multiple Agile Release Trains (ARTs).
- Configured change management processes with CAB approval workflows and risk-based routing for seamless governance.
- Developed and deployed emergency change templates with integrated automated notifications for rapid response.
- Authored and published knowledge base articles with approval workflows and optimized metadata to enhance searchability.
- Design, configure, and customize Employee Center and Service Portal to deliver engaging, consumer-grade digital experiences, while building and maintaining service catalogs, knowledge bases, and guided experiences.
- Designed and implemented service catalog forms and request workflows, accelerating request fulfillment and improving user experience.
- Applied UI policies and client scripts for catalog form automation, ensuring accuracy and minimizing manual input.
- Acted as an architect, guiding ServiceNow solutions with Boeing's ITSM strategy and embedding risk management practices, including business continuity, disaster recovery, and third-party/vendor risk controls.
- Integrated ServiceNow with Jira for seamless issue tracking, project management, and DevOps collaboration.
- Automated processes using Flow Designer and Workflow to replace manual operations and improve turnaround times.
- Developed and enhanced the Service Portal with widgets, branding, and role-specific self-service experiences.
- Leveraged JavaScript server-side and client-side scripting for custom business rules, UI scripts, and automation.
- Configured and integrated BigFix with ServiceNow for automated patch management and endpoint compliance tracking.
- Built and maintained Access Control (ACLs) Lists to enforce data security and role-based access across ServiceNow applications.
- Designed and maintained the CMDB with discovery, reconciliation, and integrations using Spokes, Service Graph Connectors, custom APIs, ensuring accurate dependency mapping.
- Implemented CSDM practices to standardize service mapping, align with ITIL v4, and manage software licenses across Adobe, Microsoft, Oracle, IBM.
- Delivered custom integrations with REST and SOAP APIs, connecting ServiceNow with vulnerability scanners and DLP platforms to centralize security data and strengthen enterprise monitoring.
- Created data import workflows to automate onboarding of assets, users, and configuration items.
- Implemented orchestration workflows for automated server reboots, user account provisioning, and system health checks.

- Supported discovery and service mapping for critical applications to improve visibility into IT infrastructure dependencies.
- Designed and delivered scalable ServiceNow HRSD solutions covering HR Case Management, and Lifecycle Events, ensuring alignment with platform best practices and enhancing global employee experiences.
- Applied best practices in governance and compliance by building audit-ready workflows with traceability, integrating ServiceNow processes with enterprise GRC solutions including MetricStream and IBM OpenPages.
- Partnered with cross-functional teams to architect scalable ITSM, ITOM, and ITBM solutions ensuring alignment with Boeing's enterprise architecture.

Caterpillar Inc. Sr. ServiceNow Developer

July 2024 - February 2025

- Automated service requests for equipment maintenance scheduling to streamline support for customers and dealers.
- Developed integrations between ServiceNow and IoT telemetry systems to auto-generate incidents from connected heavy machinery.
- Configured Configuration Management Database (CMDB) to map global IT infrastructure, improving asset visibility and compliance reporting.
- Established ServiceNow to Salesforce Service Cloud integration for customer/dealer support escalation and case tracking.
- Built custom dashboards for IT Ops managers, enabling real-time monitoring of uptime, incidents, and SLA performance worldwide.
- Integrated ServiceNow with SAP ERP to align financial data with IT services, ensuring accurate cost allocation for global projects.
- Directed ServiceNow to JIRA bi-directional sync for IT Ops and DevOps squads supporting digital fleet monitoring products.
- Automated purchase and repair ticket creation by integrating ServiceNow with dealer management systems.
- Configured ServiceNow Orchestration to automate password resets and access requests across enterprise systems.
- Customized the Virtual Agent (Chatbot) to handle HR FAQs, IT helpdesk queries, and employee self-service requests.
- Implemented and optimized Core Business Workflows and high-volume, secure data integrations with external systems, enabling enterprise-wide process automation while ensuring performance, security, and compliance.
- Built automated audit trails and compliance reporting within ServiceNow to support safety and environmental audits.
- Partnered with business stakeholders to deliver custom applications to track heavy machinery part recalls and warranty claims for dealers.
- Created field service tracking workflows to align equipment maintenance schedules with dealer service centers.
- Designed apps to manage sustainability initiatives, including carbon footprint tracking and green equipment adoption.
- Developed solutions aligned with a digital-first enterprise strategy, using Creator Workflows, App Engine, and Automation Engine to maximize product value and integration impact.

PPL Corporation. Sr. ServiceNow Administrator/Developer Consultant

December 2023 - June 2024

- Reduced blind spots in hybrid infrastructure by implementing full asset discovery for 2,000+ servers, improving IT visibility.
- Created automated pipelines to feed telemetry and asset data into the CMDB, saving the team 20+ hours per week in manual reconciliation.
- Integrated multiple cloud platforms (AWS, Azure) with ServiceNow to give a single source of truth for configuration items.
- Automated patch remediation processes using BigFix, decreasing endpoint vulnerability resolution times by 40%.
- Built dashboards and monitoring tools that let the IT Ops team spot trends and anomalies before they became incidents.
- Implemented error logging and alerting for failed imports, which cut troubleshooting time in half.
- Optimized large dataset imports to handle 50,000+ records efficiently, avoiding downtime during batch processing.
- Standardized workflows for multi-vendor integration, ensuring all systems updated the CMDB consistently.
- Collaborated with business stakeholders to prioritize ITSM enhancements and built scalable interfaces using Service Portal and UI Builder, directly improving operational efficiency.
- Introduced proactive event detection workflows to prevent incidents before they impacted end-users.
- Developed custom CMDB applications to track specialized business assets, supporting new operational needs.
- Led knowledge-sharing sessions to ensure IT staff adopted new workflows and automation tools effectively.

Mayo Clinic. Senior Consultant - ServiceNow Advisory/Developer **January 2022 - November 2023**

- Advised clients on best practices for implementing and customizing ServiceNow solutions, ensuring alignment with business objectives, HIPAA compliance, and leveraging advanced ServiceNow features to optimize IT operations.
- Developed and deployed custom ServiceNow applications, including Incident, Change, and Service Catalog modules, tailoring each solution to meet unique client requirements.
- Delivered Service Mapping for critical business services, improving incident resolution by enabling accurate dependency views.
- Applied CSDM standards to CMDB design, driving data consistency and maintaining accuracy above 90%.
- Integrated Splunk and SolarWinds with Event Management to centralize monitoring and improve alert correlation.
- Customized Service Portal and Employee Center experiences using JavaScript and React, creating intuitive, branded interfaces that improved self-service adoption and increased employee engagement.
- Automated incident creation workflows from alerts, accelerating resolution and cutting MTTR by 20%.

PricewaterhouseCoopers (PwC). Senior ServiceNow Admin/Developer **August 2018 - December 2021**

- Led the migration from legacy ITSM tools to ServiceNow, administering and developing instances with optimal configuration, security, and functionality across modules (Incident, Change, Problem, and Service Catalog).
- Customized ServiceNow applications using JavaScript, Business Rules, and Script Includes to automate business workflows, improve user experience, and align with client-specific requirements.

- Worked with stakeholders to gather requirements and deliver ServiceNow solutions, leveraging knowledge of Finance, Supply Chain, and Source-to-Pay systems (SAP, Ariba, Coupa, Oracle).
- Administered ServiceNow updates, upgrades, and patches, ensuring smooth deployment of new features and modules while troubleshooting and resolving any issues that arose during the process.
- Optimized ServiceNow workflows by configuring advanced business rules, UI actions, and scheduled jobs, enhancing operational efficiency and reducing manual intervention across client environments.
- Provided mentorship and support to junior developers and administrators, conducting code reviews, and guiding best practices in ServiceNow configuration, scripting, and platform management.

EDUCATION

University of Louisville, Kentucky

Master of Science, Business Analytics | Minor: Data Science

University of Nigeria, Nigeria

Bachelor of Science, Economics | Minor: Econometrics & Optimization

COMPETENCE

Automation Rules and Business Logic || Role-based User Access Management || Plugin Setup and Formatter Utilization || Custom Workflows, Process Automation, and Flow Configuration || Advanced Reporting, Data Visualization, and Insights Analysis (Excel & Power BI) || Security Permissions Management and Access Control Lists (ACL) || Data Integration Setup – Import Sets, Data Sources, and Update Sets || Project Delivery and Execution Management || Metrics and Key Performance Indicator (KPI) Tracking || Form Customization and User Interface Design Expertise || Analytical and Problem-Solving Capabilities || Bespoke Application Development (Custom and Scoped) || IT Operations Monitoring – Discovery, Event Management, and Service Mapping || Strategic Portfolio Planning and Management || Lifecycle Management of IT Assets – Hardware (HAM) and Software (SAM) || CMDB Management with Service Data Model Alignment (CSDM) || ITIL Frameworks for IT Service Delivery (v3 & v4) || Core ITSM Functions – Incident, Problem, Change, and Knowledge Management || Service Catalog Development and Workflow Configuration (Record Producers, Order Guides) || Third-party System Integrations (AWS, JIRA, SCCM with ServiceNow) || Scripting and Programming Proficiency – JavaScript, HTML, CSS, Glide APIs, SQL, Python || Automated Email and Event Notification Configuration || Service Level Management – SLAs, OLAs, and Underpinning Contracts (UCs) || Real-time Performance and Analytics Reporting || Flow Designer Customizations and Automation Design || Tailored Application Development and Scoped Solutions || Service Portal Customization and User Experience Enhancement || Software Development Lifecycle (SDLC) Expertise with Agile & Scrum || User Interface Management – UI Actions, Policies, and Data Controls
