Summary

- **8+ years of expertise in Digital Asset Management (DAM)**, with a focus on AEM Assets and APRIMO.
- Strong experience in **application development and maintenance** across all SDLC phases: analysis, design, development, deployment, unit testing, and production.
- Expertise in **AEM Cloud customizations** and **content migration**.
- Developed **digital consumer experiences** using AEM, CRX, and DAM, including configuration of Adobe Cloud Assets, Workfront, and Asset Share Commons.
- **Successfully migrated 400,000 assets** from various storage locations (Stage Assets, PM National Server, Pursuit Tracker, Pursuit Vault) to AEM Assets.
- Extensive hands-on expertise in **Metadata Model, Security Model, Taxonomy, Indexing, Archiving, Apache Sling, OSGi, JCR, and Data Migration**.
- Developed **AEM Templates, Components, and Workflows**.
- Integrated AEM with **Workfront** and **Asset Share Commons** and building portals using them.
- Proficient in configuring Adobe Workfront, creating custom forms, workflows, templates, and fields to streamline operations.
- Have good hands-on experience on **AEM forms, AEM Sites** and **Dynamic Media**.
- **Certified in APRIMO DAM**.
- Administered and configured **AEM authentication** using LDAP server, SSO, OAuth, and SAML.
- Operated effectively in **Agile, rapid development environments**.
- Set up and configured **DAM systems** and migrated content from other CMS to AEM.
- Proficient in **web application development** using **Microsoft Technologies**.
- Skilled in **Java, ASP.NET, C#, ASP.NET Core** technologies, with experience in **CSS, HTML**, and **.NET** framework.
- **Utilized GIT** and managed process flows, along with delivering **test preparation, execution, and defect reporting**.
- Proven ability in **designing secure infrastructures**, delivering projects, and driving business value.

Technical Skills

Programming Languages : Java, C#, .Net

Frameworks and Technologies : Apache Sling, OSGi, JCR, Mockito, .NET framework, ASP.NET

Database : MySQL Server, SQL Server

Version Controlling systems : GIT, SVN, TFS

Platforms and Tools : AEM Cloud, Workfront Fusion, Visual Studio code, Aprimo, Azure

Methodologies : Agile

Professional Experience

Harvest Software Solutions (Oct 2024 to till date) - Senior Software Engineer

Project : Cloud Media Center

Cloud media center is specialized in creating sports centric videos. they create videos and make them available for publishers. This collaborative platform optimizes workflow from video production to a targeted distribution of ad-appended video content.

Responsibilities:

- Collaborating with stakeholders to gather and analyse business requirements.
- Developing custom **AEM components** and **templates** using **HTL (Sightly)**, **Sling Models**
- Migrating existing Assets to AEM.
- Designed and implemented native **XDP forms**, **Adaptive forms**.
- Administered **sites** and maintained access roles for sites.
- Designing the **AEM architecture**, including content hierarchy, templates, components, and workflows to align with project requirements.

Technologies and Development tools: JCR, Sling, OSGi, JavaScript, AEM Cloud, AEM Designer.

Deloitte (Oct 2021 to Sep 2024) - Senior Analyst

Project : Deloitte Digital DAM

In the **Deloitte Digital DAM Project**, we are managing and maintaining Deloitte Assets across several agencies. The project involved seamless integration with multiple third-party applications to enhance user accessibility across different platforms.

Responsibilities:

- Developed and deployed code on Azure Apps accordance with user specifications.
- Implemented CI pipelines using Azure DevOps to automate deployment processes to AEM Cloud.
- Scripted, scheduled **workflows**, and constructed **packages** within **OSGi configurations**.
- Managed **asset migrations (from Azure Blob, share point)**, and applied **metadata** to assets (**metadata tagging**).
- Provided **support** and administered **security permissions**.
- Established **integrations** with various applications, including **Workfront**, **Asset Share Commons**, and **Brand Portal**.
- Created **test cases** and conducted **testing** for **forms** and **applications** including **execution** and **defects reporting**.
- Designed and built **AEM components**, worked with **JCR** and **AEM workflows**, and developed **building blocks** such as **templates** and **components**.
- Setting up and configuring **AEM environments** (development, staging, production) and implementing **dispatcher configurations** for optimal performance.

Technologies and Development tools: JCR, Sling, OSGi, Mockito, HTML, CSS, JavaScript, AEM Cloud, Workfront Fusion and Azure

Accolite Digital (Oct 2020 to Oct 2021) - Senior Software Engineer

Projects : Certent Disclosure Management, AquaDataStudio

In **CDM**, an Insight Software product and an all-in-one **Disclosure Management System** on the Microsoft Office platform, I scripted **user permissions**, facilitated the creation and comparison of **reports** in various formats, and enhanced functionality by incorporating new **taxonomy** into files.

In **Aqua Data Studio**, a universal IDE that simplifies database management for developers, administrators, and analysts, I specialized in the **Windows platform**. I crafted **scripts** for **Amazon Redshift** and **Snowflake databases**, focusing on **roles**, **network policies**, and **account management**.

Responsibilities:

- Designed and developed **test scripts** based on user requirements.
- Collaborated with the **Test Manager** and clients to clarify **business requirements**.
- Ensured compliance with **Test Script Coding Standards**.
- Identified opportunities to enhance **efficiency**, reduce **test cycle durations**, and automate **test scripts**.
- Conducted **regression testing** and addressed code-related issues.

Technologies, Development tools and Database: C#, Ranorex, CDM, ADS (Amazon Redshift, Snowflake)

Cognizant (Jun 2016 to Jun 2020) - Associate

Projects : MaryKay Inc., Sanofi, Macmillan, SC Johnson

In the **MaryKay project**, I managed the **bulk uploading of assets** in the **DAM application**, systematically **stamping metadata** according to predefined rules and applying a **Security Model** for global asset sharing across regions. Once the **review cycle** was completed, the final assets, along with their **metadata** and **security settings**, were made accessible to end-users, ensuring **efficient asset management** and **distribution**.

In the **Sanofi project**, executed the **data migration** of 200,000 assets from **Celum to Sanofi**, developing code for seamless migration and **metadata mapping**. I also enhanced **User Management** by implementing bulk user import and optimized the DAM application's UI, ensuring a smooth transition and improved **user experience**.

In the **Macmillan project**, a web application designed for processing books and articles for scheduled publication, I worked on the **Redemption Module**. This module involved redeeming book codes according to specific rules defined by business requirements, ensuring that the redemption process was accurately implemented and aligned with the project's objectives.

In the **SC Johnson project**, I integrated workflows between **Bizagi** and the **DAM Application**, ensuring accurate record transfers and managing approvals based on **Metadata** and **Security Models**. Utilizing **REST API** for system communication, I implemented multiple workflows and leveraged out-of-the-box features, earning commendations from the client for my contributions.

Responsibilities:

- **Migrated Macmillan Redemption module** from **.NET Framework** to **.NET Core**, improving performance and system efficiency.
- **Managed multiple sprints** and coordinated with teams to ensure on-time delivery of project milestones.
- Executed **bulk uploads of assets**, developing code for **metadata stamping** and maintaining **data integrity**.
- Facilitated **asset migration** from Celum to the DAM application, ensuring seamless **data transfer** and accurate **metadata mapping**.
- Enhanced **UI for improved user experience** and implemented **bulk user creation** for various regions.
- Developed and enhanced **workflows**, leveraging **out-of-the-box functionalities** to streamline processes.
- Collaborated directly with clients to clarify **business requirements** and delivered solutions aligned with their needs.
- Contributed to the **redesign of the Security Model**, utilizing **SQL Server** to create **stored procedures** and functions.
- Addressed **minor bug fixes** and executed **script modifications** to resolve functionality issues.
- Provided **ongoing production support**, ensuring smooth operations and timely resolution of application-related issues. **enhancements** and addressed **bug fixes** based on business needs.

Technologies, Development tools and Database: C#, .Net, Asp.Net, .net Core, HTML, CSS, JavaScript, SQL and SQL Server 2008 R2

Education

Bachelor of Technology in Computer Science and Engineering from VIT University | Apr 2016
