

Umair Ahmed

Senior Software Engineer

Fontana, CA 92336

umair.amd20@gmail.com

(909) 361-3880

I'm a senior full stack engineer with 8+ years of experience building scalable, high-performance web applications and cloud-native systems. I specialize in modern JavaScript frameworks (React, Angular, Vue) and backend technologies (C#/.NET, Node, Python), delivering secure and maintainable solutions across distributed architectures. I collaborate closely with cross-functional teams to translate business needs into technical outcomes that drive measurable impact. Known for my analytical mindset, code quality, and mentorship, I'm passionate about designing architectures, improving team velocity, and delivering reliable software that scales.

Authorized to work in the US for any employer

Work Experience

Software Engineer III

Certus - Orlando, Florida

February 2020 to Present

- Develop and maintain scalable Angular and React interfaces for large-scale ed-tech platforms, ensuring responsive and accessible user experience across devices.
- Design and implement .NET Core microservices using Entity Framework, optimizing data access and improving overall API performance.
- Lead migration of backend services to Azure App Services, Functions, and SQL Database, enhancing scalability, reliability, and cost efficiency.
- Build secure RESTful APIs with JWT-based authentication and role-based access control for web and mobile applications.
- Built an AI helpdesk chatbot for learners/instructors (RAG over course docs/FAQs) powered by GPT-4o (Azure OpenAI) that answers course-specific questions, links to relevant lessons, and logs feedback for continuous improvement.
- Mentor junior engineers through code reviews, knowledge sharing, and best practices in Angular, React, Python and .NET.
- Partner with UX, Product, and QA teams to deliver complex modules such as course progress tracking, certification exams, and compliance features.
- Optimize frontend performance with techniques like lazy loading and code splitting to ensure faster load times and smoother user interactions.
- Strengthen platform security through Azure AD SSO integration, SSL/TLS enforcement, and proactive vulnerability assessments.

- Collaborate in Agile/Scrum environments, contributing to sprint planning, stand-ups, retrospectives, and continuous improvement initiatives.

Full Stack Developer

Estech Systems, Inc. (ESI) - Plano, TX

September 2016 to January 2020

- Built Angular/React interfaces and a reusable component library with lazy-loaded modules, improving UX and developer velocity.
- Developed Python microservices for real-time call analytics processing 50,000+ daily events, exposing results to Angular/React dashboards with high availability.
- Implemented Node.js backend modules and REST APIs for call routing and analytics; refined MongoDB schemas, indexes, and aggregation pipelines for low-latency queries.
- Delivered an AI-powered support chatbot for the VoIP platform by integrating NLP/LLM components and building the chat UI to automate routine customer interactions.
- Strengthened security across services with role-based access control, OAuth2/OIDC, and TLS, aligning with best practices.
- Translated Figma designs into responsive, cross-browser components; partnered with QA/DevOps to stabilize CI/CD pipelines and reduce release risk.
- Worked with product, sales engineering, and support in Agile sprints to ship major SaaS features such as cloud PBX, hosted conferencing, access control, and hosted fax.
- Mentored junior engineers on Angular, React, Python fundamentals, and Jasmine/Karma unit testing, fostering coding best practices and cross-team knowledge sharing.

Education

Bachelor's degree - Computer Science

California State University - San Bernardino, CA

Skills

Languages & Core Frameworks: C#, .NET, TypeScript, JavaScript, Python, PHP

Front-End: Angular, React, Blazor, Redux/NGRX, Tailwind CSS, Material UI

Back-End & APIs: Node.js, .NET Web API, Express, FastAPI, REST, GraphQL, gRPC, WebSockets

Databases: SQL (SQL Server, PostgreSQL, MySQL), NoSQL (MongoDB), Redis, Elastic/OpenSearch

ORMs & Data Access: Entity Framework, Dapper, LINQ, Prisma

Cloud & DevOps: Azure, AWS, GCP, Docker, Kubernetes, Terraform

Testing & QA: xUnit, NUnit, bUnit (Blazor), Cypress, Playwright, Selenium, Postman/Newman

AI/ML (GenAI & NLP) : LLMs (GPT-4o, Claude 3, Llama 3), RAG, NLP, embeddings, LangChain/LlamaIndex, vector DBs (FAISS, pgvector, OS), function calling, Ollama, prompt engineering
