SUMMARY

Java Software Engineer with 5+ years of experience in developing robust, scalable solutions using Spring Boot, Hibernate, and RESTful APIs. Proven track record in building microservices architecture and optimizing cloud deployments. Demonstrated success in enhancing application performance and streamlining CI/CD pipelines with modern containerization tools. Committed to delivering efficient, secure, and innovative IT solutions.

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript (ES6+), C, C++, C#, J2EE, SQL
- **Frameworks:** Spring, Spring Boot, Spring Cloud, Spring Security (OAuth 2.0 & JWT), Hibernate, Spring MVC, Spring Web Services, Spring JDBC
- **Backend & Microservices:** Node.js, Microservices architecture, Test-Driven Development (TDD)
- **Web Technologies:** HTML5, CSS3, React.js, Angular, Vue.js, Kendo UI, Redux, Flux, Bootstrap, Tailwind CSS, Material UI
- **Web Services:** RESTful, SOAP
- **API Testing:** Postman, Talend
- **Messaging Services:** Apache Kafka, RabbitMQ, Amazon SQS
- **Databases:** SQL Server, MySQL, PostgreSQL, MongoDB, Oracle, Cassandra, DB2
- **Caching:** Redis
- **Cloud:** AWS (EC2, S3, RDS, EBS, ELB, Auto-scaling, Lambda, CloudWatch), Azure, Google Cloud Platform (GCP), Pivotal Cloud Foundry (PCF), Cloud technologies
- **Build & CI/CD Tools:** Maven, Gradle, Jenkins, Terraform, GitLab, GitHub Actions, Azure DevOps, BitBucket, SonarQube, CI/CD pipelines
- **Containerization & Orchestration:** Docker, Kubernetes
- **Version Control:** Git, SVN, CVS
- **Testing & Logging Tools:** JUnit, TestNG, Mockito, Log4J, Selenium
- **Web/App Servers:** WebSphere, WebLogic, JBoss, Apache Tomcat, IBM HTTP Server
- **IDEs:** IntelliJ IDEA, Eclipse, Spring Tool Suite, Visual Studio Code, NetBeans
- **Agile & Project Management Tools:** JIRA, Agile, SAFe, DevOps practices
- **Platforms:** Windows, Linux, UNIX, Mac

WORK EXPERIENCE

Rivian Automotive

Java Full Stack Developer

May 2024 - Present

Irvine, California, USA

- Engineered distributed microservices using Java with Spring Boot and Hibernate, leveraging AWS services (EC2, S3, Lambda, SQS) to reduce database query execution time by 40% during the migration from SQL Server to Cassandra.
- Optimized CI/CD pipelines with Jenkins, OpenShift, and Kubernetes by modifying Jenkins files and Dockerizing applications to enhance deployment efficiency and scalability.
- Developed dynamic user interfaces by integrating React with RESTful APIs and WebSocket protocols, supporting a 25% boost in real-time interactivity and performance.
- Enhanced application efficiency by utilizing Java 8 features such as Streams API and Lambda expressions alongside design patterns (Singleton, Factory, DAO) and Spring Security (OAuth 2.0 & JWT), while incorporating Apache Kafka for messaging.
- Administered application deployment on PCF and configured robust logging and monitoring with Amazon CloudWatch, achieving a 30% reduction in system failures and improved efficiency through AWS Lambda serverless computing.

Electronic Arts Inc.

Java Full Stack Developer

Apr 2023 - Apr 2024

Redwood City, California, USA

- Developed microservices-based applications using Java with Spring Boot and RESTful APIs, integrating Apache Kafka to enhance data streaming efficiency by 50% and improve system synchronization, while utilizing Cassandra and MongoDB for scalable database solutions.
- Executed CI/CD automation with Azure DevOps, Docker, and Kubernetes, reducing deployment time by 70% and enabling rapid production releases.
- Constructed a responsive Angular-based Single Page Application (SPA) with Material UI, integrating OAuth 2.0 authentication to bolster security and enhance UI functionality.
- Refined legacy services by migrating to Apache Camel, which improved message processing throughput by 45%, and applied Spring Integration patterns for asynchronous messaging and comprehensive error handling.

Infosys (HSBC)

Systems Engineer

Apr 2022 - Nov 2022

Hyderabad, India

- Built RESTful microservices using Spring Boot and Hibernate, integrating MongoDB, reducing data retrieval latency by 50% through efficient indexing.

- Streamlined CI/CD workflows with Bamboo, deploying applications on PCF, synchronizing version control with GitHub, and implementing Oracle-to-AWS S3 data migrations using Spring Batch.
- Secured APIs with OAuth 2.0 and JWT authentication, ensuring encrypted transactions and implementing automated testing with JUnit and Mockito, achieving 99.9% uptime.
- Optimized ETL operations by developing Jasper reports, while building scalable APIs that efficiently handle HTTP methods (GET, POST, PUT, DELETE) for enterprise-wide software solutions.

Citco

Aug 2020 - Mar 2022

Senior Java Developer

Hyderabad, India

- Designed scalable Spring Boot microservices and optimized Cassandra database schemas, and enhancing query performance by 40%, implementing Spring Cloud (Netflix OSS, Eureka, Circuit Breaker, Ribbon) to improve application reliability in an Agile development environment.
- Automated infrastructure provisioning and CI/CD pipelines using Terraform and Jenkins, integrating with GitHub and Gradle to enhance DevOps processes within Scrum-based sprints.
- Created an automation framework for acceptance testing using Cucumber BDD and JUnit, ensuring software reliability in a Test-Driven Development (TDD) environment within Agile workflows.
- Strengthened API security with SAML 2.0 authentication, developed Jasper reports, and enhanced asynchronous processing using Java Message Service (JMS), increasing transaction efficiency by 30%.

Coherent Corp.

May 2019 - Jul 2020

Java Developer

Hyderabad, India

- Constructed scalable Spring Boot microservices integrated with Hibernate, improving database interactions by 35% and implementing Spring Validators to ensure data integrity.
- Built a responsive UI using React.js and TypeScript, seamlessly integrating components with backend RESTful APIs to enhance performance.
- Implemented data validation and ETL workflows using UNIX shell scripts, optimizing structured and unstructured data across MySQL and MongoDB, reducing processing times by 40%.

EDUCATION

California State University Long Beach

Jan 2023 - Dec 2024

Master's, Computer Science

CERTIFICATIONS

- Oracle certified Professional Java SE 11 Developer
- AWS certified Developer Associate
