

Vamsi Krishna Bavisetty

Sr. AEM Developer

Krishnabavisetty95@gmail.com

+1 (469) 703-0224

Linkedin: <https://www.linkedin.com/in/durga-vamsi-krishna-bavisetty/>

SUMMARY:

- Around 8 years of experience in AEM and Adobe Marketing Cloud in Finance, Banking, Insurance and other domains & also a Certified Adobe Experience Manager Sites Developer Professional.
- Worked as Digital Experience SME developing solutions for clients, enhancing, and driving their Marketing technologies to execute Customer Journey Orchestration, Customer Journey Insights and Personalization use cases in an omni-channel environment.
- Drove digital analytics reporting and data collection strategy for multiple clients by defining business focused KPIs, carrying out technical implementation through Tag manager solutions, conducted elaborate data validation and democratized insights to stakeholders with automated reports and analysis.
- Worked closely with web and app developers for implementing data layers and configuring tags on Adobe Launch/Processing rules for data collections.
- Hands on experience in AEM 6.5 and Familiar with the new features in AEM Cloud Service
- 5+ years of strong Web Content Management experience with Adobe AEM 6.X, implementing more than three full cycle AEM projects.
- Experience working on using Adobe Analytics, Adobe Target, Audience Manager, AEP RT-CDP and CJA.
- Extensive experience in hand coding user interfaces using HTML, CSS, JavaScript, JQuery and Angular JS
- Experienced in developing and implementing Enterprise Solutions for Distributed Software products and applications using Java technologies.
- Integrated dynamic front-end frameworks (e.g., ReactJS or AngularJS) for enhanced UI performance and functionality.
- Experience with PCF (Pivotal Cloud Foundry)
- Worked on Pivotal Cloud Foundry from a maintenance and support perspective. Ran Applications on the PCF platform
- Experienced in both public and private sector client's domains.
- Experienced in developing AEM Components, Page Templates, Workflows and Custom widgets.
- Worked on design and implementation of modules on AEM 6.5.
- Have a solid understanding of AEM building blocks, CRX repository, leveraging web content management components for customization and porting of websites.
- Good Knowledge in Web Technologies likes JSP, JavaScript, Bootstrap, XML, AJAX, JQuery, Adobe CQ5 APIs, OSGi bundlesExcellent understanding of WCM (Web Content Management), DAM (Digital Asset Management) and CRX (Content Repository Extreme).
- Experience with multiple versions of AEM - starting with CQ5.x till AEM 6.5 and AEM Cloud Service, WCM tools - Apache Sling, JCR Connector, CRXDE, CRX, Felix and OSGI.
- Designed and Developed Applications leveraging advanced techniques in AEM Assets, OmniSearch and Tagging framework, SOLR Search, Adobe Scene7, AEM Workflows, Components and editable templates, AEM User and Group Management.
- Proficient in developing applications using Object Oriented (OO) programming concepts.
- Good experience in developing applications using Core Java and J2EE technologies like Servlets, JSP, Enterprise Java Beans (EJB), JDBC, and Web services.
- Experience in Frontend development using JSP, Servlets, JavaScript, HTML, DHTML, HTML5, ANT, CSS, Angular JS, jQuery, Ajax and CSS3.
- Expertise in XML and related technologies like XSL, XSLT, XQuery and parsers like JAXP (SAX, DOM) JAXB and XML Beans.
- Have experience in deploying mobile applications in Linux/Unix environments.

- Have experience in Hybrid App Development Frameworks (React Native, Mobile Angular UI).
- Experienced in developing/integrating Responsive Web applications.
- Experienced in using the IDEs such as IntelliJ, RAD, Eclipse, NetBeans, CRXDE, CRXDE-Lite.
- Excellent experience in writing SQL queries (Joins, Sub Queries, Corelated Sub Queries etc.)
- Experience in writing Stored Procedures, Triggers, Cursors and Functions in PL/SQL.
- Expertise in using Modelling tools like Rational Rose for developing UML Activity diagrams, Sequence diagrams and Class diagrams.
- Proficiency in hosting/deploying n-tier Enterprise applications/Web applications using IBM WebSphere, JBoss, Oracle WebLogic Server (BEA WebLogic Server) and Apache Tomcat.
- Hands on experience in using JMeter and Dynatrace tools for measuring/optimizing performance of application.
- Very good at developing custom components, page templates and template components and workflow components in CQ5.
- Efficient use of various design patterns such as MVC (Model-View-Controller), Singleton, Service locator, DAO (Data Access Object), DTO (Data Transfer Object), and Business Delegate in the development of distributed Enterprise Applications.
- Experience in developing MAVEN, ANT scripts to build and deploy Java web applications.

TECHNICAL PROFICIENCIES:

- | | | |
|---|---|--|
| ➤ C, C++, Java , Angular , React JS | ➤ XML, DTD, XSD, XSLT, JAXP | ➤ SVN, CVS and Clear Case |
| ➤ AEM, Adobe Marketing Cloud, AEP RTCDP, CJA, AJO, Salesforce | ➤ (DOM & SAX) and JAXB | ➤ QC, Jira, Rally, Clear Quest |
| ➤ OOAD Design Patterns | ➤ HTML, DHTML, CSS, JavaScript, JSP, GIT, JQUERY,JSON,DOJO and Taglibs. | ➤ Web sphere, Web Logic, Apache Tomcat & HTTP Server |
| ➤ Struts, JSF and Spring,EJB | ➤ UML – Rational Rose, MS Visio, JUDE | ➤ WIN NT/2000/XP/2003,Unix, DOS and Windows 7 |
| ➤ Oracle 9i/10g/11g, DB2, MySQL and SQL Server | ➤ Eclipse, My Eclipse, Net Beans and RAD, Mule ESB | ➤ JUnit, Rational Rose, Apache Struts, Portlet, Apache Web Server, Web framework |
| ➤ WSDL, SOAP, AXIS, JAX-WS, REST-Jersey, UDDI, and WS-Security. | ➤ OSGI | ➤ JAX-RPC,WSAD,ANT,Blaze Rules Engine,jBoss Drools 5,Day CQ5.3 and 5.4 |
| ➤ Hibernate, iBatis | ➤ SEO, Meta Tags, Structured Data (Schema Markup) | |
| ➤ JUNIT, Mockito, SOAP UI | | |

PROFESSIONAL SUMMARY:

Client: Verizon

Duration: Mar 2022 to Till Date

Role: Sr. AEM Developer

Responsibilities:

- Involved in various phases of Software Development Life Cycle (SDLC), including requirement gathering, modeling, analysis, architecture design, prototyping, developing and testing.
- Designed and developed AEM templates and components that align with UX/UI design principles to deliver seamless user experiences.
- Integrated dynamic front-end frameworks (e.g., ReactJS or AngularJS) for enhanced UI performance and functionality.
- Involved in end-to-end design and technical implementation of module which involve component, editable templates, Rest API integration with business logic.
- Performed Continuous Integration and Continuous Deployment (CI/CD) using Jenkins.
- Developed digital consumer experiences based on foundation of the Adobe AEM product suite, including AEM, CRX, and DAM.
- Implemented CI/CD pipelines using tools like Jenkins, GitLab CI, or Azure DevOps to automate code deployments and ensure smooth integration.
- Leverage AEM, other state-of-the-art technologies, and integration patterns to solve cross- departmental challenges.
- Customized on Experience Fragments templates and Content Fragment Models.

- Involved in Designing of Multi Domain and Responsive web Design for Desktops, Mobile Phones, Tablets in AEM Clustered environment of AWS EC2.
- Implemented Adobe Target and Adobe Analytics using Adobe Launch.
- Optimized AEM components and pages for SEO best practices, including meta tags, structured data (schema markup), and page performance improvements
- Updated data scripts to publish the changes to Production using AEM datahub.
- Created AEM Client libraries to organize structure of JavaScript and CSS files in project folder.
- Created run mode configurations and OSGi Services.
- Implemented new Help & Support center UI for increased customer engagement.
- Use extensive knowledge of programming, subject matter expertise to create Proof Of Concepts (POC) using technologies such as HTML, CSS, JavaScript, Angular, React, jQuery and AJAX.
- Create mobile web solutions using technologies like CSS3, Media Queries, Twitter Bootstrap and jQuery
- Participated in daily meetings and standups to provide updates and project progress to the team.
- Use debugging tools such as Firebug, Dev Tools and Fiddler to investigate/ analyze the software defects and write code to fix the defects.
- Used GIT as version control and integrated with Jenkins for CI (continuous integration) automation builds using Jenkins shell script and Curl commands.
- Experienced in working with IT infrastructure monitoring tools like Datadog and Splunk.
- Developed REST services using Node-JS, Express-JS, Body-Parser, Mongoose and other node modules to serve the web application with JSON data.
- Used Junit5/Mockito for unit testing.
- Worked on Optimizing page load times.
- Used Datadog to monitor alerts on production environment.
- Have a detailed knowledge of working with Jira in creating user Stories, Improvements, Tasks, Bugs and track team progress.

Environment: Adobe Marketing Cloud, AEM, 6.5, Datadog, Splunk ,Sightly, JAVA, J2EE, JSON, HTML5, React, CSS3, Maven, GITHUB, Restful Web services, Agile, SCRUM, JIRA

Client: Hydrotek Engineering Company - Kuwait

Duration: May 2019 to Feb 2022

Role: AEM Developer

Responsibilities:

- Integration of design in the Dell Inc. business environment, Maintaining Adobe Live Cycle created documents on DAM and solving production issues along with the team.
- Developed web applications in CQ5 systems in coordination with software development teams
- Assisted in designing, coding and testing of complex software applications.
- Developed custom components, templates, and customized forms for Website
- Designed and developed, AEM building blocks including Templates, Components, Widgets, and Workflows.
- Involved in gathering custom enhancement requirements from end-user and worked closely with Technical Leads, Architects, Business Analysts and QA Team.
- Developed AEM Templates and Components.
- Used CRX as a repository and accessing the CRX content nodes by SQL Queries.
- Integrated with a shared globally accessible repository for shared permissions-based digital media assets using DAM.
- Created POJOs using Jackson annotations and have written JSPs using custom tag libraries and AEM tag libraries.
- Developed workflow components related to digital assets and upload workflows (documents and videos) as per the client requirements.
- Extensive used CQ Tag Libraries in the components.
- Enhanced AEM personalization engine to surface the AEM content on portal using JavaScript based on user profile attributes.
- Developed service in Events that gives JSON output for the events - current status & time.
- Performed extensive Unit Testing to ensure bug-free code drop.
- Customizing AEM side kick for enhanced authoring experience

- Designing and implementing customer engagement strategies to support multi-site, multi-channel, multi-lingual delivery environments
- Create OSGI Bundle for deployment through Apache Sling
- Customizing workflows for publishing
- Create and integrate content-driven applications on top of the AEM/CQ core platform
- Using HTML, CSS, JQuery and extJS for designing and implementing custom CQ components.
- Perform AEM customization on foundation components, for customers core CMS and workflows to extend functionalities, improve performance or fix issues on project level
- Perform AEM customization on foundation components, for customers core CMS and workflows to extend functionalities, improve performance or fix issues on project level.
- using **HTML 4.01, CSS, JSP, Java, Servlets, visual studio** to run the environment and handle the daily basis issues and to check whether the applications is running or not.

Environment : HTML, CSS3, JSON, JQuery 1.7, ExtJS 4.0, Adobe AEM 6.2, Apache Sling, Apache Jack Rabbit, CRX, CRXDE, JPA, JUnit 1.4, JDK 1.6, Spring MVC, JSP, Restful Web services, Apache Tomcat 7.0.

Project Name: Bridges to International Knowledge - Kuwait

Feb 2018 - May 2019

Role: Java Developer

Responsibilities:

- Have involved in rule mining. Extracted and Mined rules from different applications and documented in rule design template.
- Generic Rule Templates are designed and developed to easily enter/modify the business rules in RMA by business users in Blaze 6.5.5.
- Developed and implemented business rules, Rule sets, Rule flows and Functions using SRL.
- The rulesets are exposed as different entry points and deployed as a java service inside ETL applications.
- Application is tested with BrUnit and custom built framework with jUnit.
- The **web services** are created using top-down approach. The **WSDLs** are created and java classes are generated using **XFire**.
- The Mule services are configured (UMO) to pass aggregated object to Blaze. The Mule configuration files are created and services developed. In-Memory HSQLDB is used and configured in ant script for using testing of dashboard DAOs

Environment : Blaze 6.5.5, BrUnit, JDK1.6, Spring 2.5, JPA (Hibernate 3.4), Web logic Application Server 9.2,, MyEclipse 6.5, Java 1.6,, Ext-JS (Ajax Component Library), Clear case, Junit 4.4, Log4J, Oracle 10g.

Project: Pantech Solutions - India

June 2017 – Jan 2018

Role: Java Web Developer

Responsibilities:

- Developed **EJBs** for rule interaction through BRE Service.
- Dmanger configuration file is developed and used to load and verify added / updated rules in real-time to the repository.
- **Marshalling/ UnMarshalling** of input file received from mainframe to BRE and vice versa for the output from BRE.
- Developed and implemented **business rules, Rulesets, Ruleflows and Functions** using SRL.
- Involved in designing and development of the **Blaze Advisor rules projects**.
- Have created HLD and LLD for modified rules in the SRS application using Rational Rose.
- The **generated RMA** projects is customized for better navigation and look & feel to the business users using Struts.
- Heavily used Rational Application Developer (RAD) for application development, teating and deployment.
- Migrated the application from Blaze 5.5 to Blaze 6.5 and documented all the issues in the migration process.
- Monitored performance results of blaze rule batch process and optimized performance of the application by updating the execution mode.

Environment : Java, J2EE 1.4.2, DB2, Informix, Tomcat 4.0, WebSphere Application Server 6.0, RAD 6.0, Blaze 5.5 / 6.5, J2EE Design Pattern, EJB 2.1, Struts 1.2, UNIX, Windows XP, Rational Unified Process (RUP)
