Education:

B.Sc. From Krishna University

TECHNICAL SKILLS

Force.com: Apex Language, Apex Classes, Triggers, SOQL, SOSL, Apex Web Services, Apex Data Loader, Dashboards, Reports, Analytic Snapshots, Outbound Messages, Workflow & Approvals, Field updates, Reports, Custom Objects, Custom settings, Custom labels and Tabs, Email Services, Role Hierarchy, Dashboards, Security Controls, App Exchange Package, Custom Application & Sandbox data loading.

Visual Force : Pages, Components & Controller.

Salesforce Tools: Force.com, Force.com Data Loader.

Languages: Apex **Databases:**

Microsoft SQL Server

Web Technologies: HTML, HTML5, CSS3

Work Experience:

Working as Software Engineer in IBM from Nov 2020 to Till Date.

Professional Experience:

Project #1:

Client : Macy's

Position : Salesforce Developer

Description: Macy's is America's department store, an iconic brand and retail industry leader. Through its stores, e-commerce sites and mobile app, Macy's offers distinctive experiences and assortments, including the most sought-after family of exclusive and fashion brands for him,

her and home. Blue mercury is a friendly neighborhood beauty store where clients can get honest, expert beauty advice. The brand is widely recognized as the nation's largest and fastest-growing luxury beauty products and spa retail chain.

Responsibilities:

Developed Apex Classes for **Visual force** pages. Developed required Triggers for application.

Daily administration and support of Data.com by providing marketing leads and support to front-line sales colleagues.

Have written Batch **Apex** for the asynchronous data updates. Created E-mail Templates for the email alerts created. Used analytic snapshots for bi-weekly reports.

Used **Eclipse, Force.com, Developer console Ides** for development of **Apex classes, Visualforce pages, Triggers and changing meta-data.**

Installed/Uninstalled packages from **AppExchange. Set up** Email Services on **the Force.com** platform to handle inbound emails.

Implement Roll-up Summary fields to aggregate data from child records on the parent.

Developed many Report Types and created various Reports (summary reports) using the **Report Builder** according to the needs of the organization.

Created many **Lightning Components** and server-side controllers to meet the business requirements.

☐ Developed rich UI using **HTML5** and **CSS3** in Visualforce pages and used **JavaScript** and jQuery to utilize the plug-ins.

Experienced migrating the standard and custom objects in standard experience to **lightning** experience.

Handled ongoing customization/ alteration of Salesforce.com. to increase benefits and usability.

Worked on **Salesforce1** Platform to build Mobile App by enabling **Lightning Components** for use in **Salesforce1** mobile platform to make **Lightning** Application mobile.

Created custom fields, pick lists, dependent pick lists, and validation formulas to the custom objects.

Used Single sign-on, **SAML** settings to enable the user to login to various applications.

☐ Written **Apex** Test classes to meet Unit testing before migrating from **Sandbox** to Production environment.

Use **SOQL & SOSL** considering the Governor Limits for data manipulation using the apex code.

Design, create and maintain user roles, profiles and hierarchies. Monitor application storage usage and archive data as needed.

Created case escalation rules to escalate cases automatically if they are not resolved within a certain period, also worked on app-exchange tools for tracking orders.

0 Developed **Apex Triggers, Apex Classes** and Test methods, Controllers & Extensions to support **Visualforce pages, Test Classes** for Unit testing as per the functional needs in application.

Customized standard Sales force objects like Accounts, Contacts, Case management and Solutions. Developed and created customized reports and dashboards.

0 Developed Test classes for all the **Apex** classes and Triggers with minimum 92% code coverage **for triggers and classes.**

Implemented **Salesforce.com web services** client using sales force **web services API, Java, XML and partner WSDL.**

Exported data from legacy system and imported into **SFDC** through Apex data loader for **data Migration.**

Worked with an admin team and management team to create users, roles, public groups and implemented role hierarchies, sharing rules and record level permissions to provide shared access among different users also involved in working with Admin in the business office to upgrade handoffs in production.

Followed Scrum **Agile methodology** for the iterative development of the application and participated in weekly Sprints, daily stand-up meetings and customer reporting backlogs.

Used Source tree to move the code from one environment to another environment and Target Process to maintain sprint stories and defects.

Environment: Salesforce.com, Security Controls, Escalation rules, Assignment rules, Record types, Custom objects and Fields, Relationships, Apex Classes, Visual Force (Pages & Components), Workflows, Rules, Eclipse, Force.com Explorer, Apex Data Loader.
