

Vanitha D
Power BI Developer

Email: vanithad355@gmail.com

Contact: 858-217-7717

Professional Summary:

- Over 6+ years of experience working on SQL server integration services (SSIS), SQL server reporting services (SSRS), SQL server Analysis Services (SSAS) and TSQL Development.
- Good knowledge of Data Warehouse/Data mart concepts and Expertise in data modeling for OLAP & OLTP systems from design and analysis to implementation including the conceptual, logical and physical data models.
- Experience with Relational and Dimensional data modeling using ERWIN, understanding of Ralph Kimball and Bill Inmon methodology for Dimensional Modeling, Star and Snowflake Schemas. Thorough understanding of DW concepts like Facts, Dimensions, Surrogate keys, drill down and drill across approach.
- Experienced in Installing, Upgrading and Configuring Microsoft SQL Server 2017/2016/2014/2012/2008.
- Experienced in client requirement Analysis, Physical, Logical design, development (using Erwin, normalization and SQL Server Enterprise manager), Resource Planning, Coding, Debugging, Testing, Deployment, Support and Maintenance of business applications using Power BI SQL Server 2014/2012/2008, DTS, SSIS, SSAS and SSRS 2012/2014/2016/2017.
- Expert in TSQL DDL/DML, perform most of the SQL Server Enterprise Manager and Management Studio functionality using T-SQL Scripts and Batches.
- Experience in writing complex SQL queries involving multiple tables inner and outer joins.
- Experience in optimizing the queries by creating various clustered, non-clustered indexes and indexed views.
- Experience in Creating Tables, Views, Triggers, Stored Procedures, Power BI User Defined Functions and other T- SQL statements for various applications.
- Worked Extensively on ETL process using SSIS package.
- Excellent in Data Extraction, Transforming and Loading (ETL) using SQL Server Integration Services (SSIS), DTS, Bulk Insert, BCP.
- Expert in design and development of SQL Server Integration Services (SSIS) packages and using various control flow task and data flow transformation.
- Excellent in creating SSIS Packages for integrating data using OLE DB connection from heterogeneous sources (Excel, CSV, Oracle, flat file, Text Format Data) by using multiple transformations provided by SSIS such as Data Conversion, Conditional Split, Bulk Insert, merge and union all.
- Expert in creating various type of reports such as Complex drill down & drill through reports, Matrix reports, Sub reports and Charts using SQL Server Reporting Services (SSRS) based on Relational and OLAP databases.
- Used logging in SSIS package to maintain the Log and Audit information in the SQL tables. Used Checkpoints in packages to enable the package to run from the point of failure.
- Used Package Configurations such as XML, SQL Server and Environment Variables to make dynamic changes to packages.
- Experience in report writing using SQL Server Reporting Services (SSRS) and creating various types of reports like table, matrix, and chart report, web reporting by customizing URL Access.
- Experience in writing expressions in SSRS and Expert in fine tuning SSRS reports. Developed drill down, drill through, parameterized, cascaded and sub-reports using SSRS.
- Experience in design and implement processes for deploying, upgrading, managing, archiving and extracting data for reporting using SQL Reporting Services (SSRS).
- Scheduling the Reports Weekly and Monthly basis as per the Client Requirements and providing security for reports.

Technical Skills:

RDBMS	MS SQL Server 2017/2016/2014/2012/2008/2008R2, Oracle
Programming Languages	Java, SQL and T-SQL
Tools & Packages	SQL Server Management studio, Enterprise Manager, Profiler, Business Intelligence Development studio (BIDS), DTS, ETL, Visual Studio .NET and TOAD
BI Tools	SQL Server Reporting Services (SSRS), SQL Server Integration Services (SSIS), Data Transformation Services (DTS), SQL Server Analysis Services (SSAS), MS Visio and Power BI
Operating Systems	Windows 10/8.1/8/7/XP, Windows Server 10/8.1/8/7/XP
Web Technologies	HTML, JavaScript, XML, Xpath

Education

Master in Information Technology Management from Concordia University

Professional Experience:

Client: United Health Group, Addison, TX
Role: Power BI Developer
Duration: April 2023 to Present
Responsibilities:

- Developed and deployed interactive Power BI reports and dashboards for various business units, enhancing visibility into claims processing, utilization trends, and operational KPIs.
- Built complex data models using DAX and Power Query, optimizing performance and enabling advanced analytics features.
- Performed ETL processes using SQL Server and Power Query; integrated data from disparate sources including flat files, Excel, SQL Server, and APIs.
- Implemented row-level security (RLS) and role-based access control in Power BI Service to protect sensitive healthcare and HIPAA-compliant data.

- Automated data refresh processes and built scheduled workflows using Power BI Service and Power Automate, improving report reliability and timeliness.
- Collaborated with business stakeholders, analysts, and developers to gather requirements and translate them into effective BI solutions using Agile methodology.
- Migrated legacy reports from Excel and SSRS to Power BI, enhancing visual storytelling and interactivity.
- Developed parameterized and paginated reports for regulatory and audit compliance using SSRS and Power BI Report Builder.
- Used Git for version control and collaborated via JIRA in an Agile/Scrum environment for sprint-based BI development.
- Conducted UAT (User Acceptance Testing), training sessions, and documentation to ensure successful adoption of Power BI solutions.

Environment: MS SQL Server 2017/2016, Visual Studio data tools, Microsoft SQL Server Reporting Service (SSRS), Microsoft SQL Server Integration Services (SSIS), Visual Studio 2017 and MS Office 2016

Client: Centene Corp, Saint Louis, MO

Duration: August 2021- March 2023

Role: SQL Server Developer

Responsibilities:

- Documented and delivered functional specification document to the project team. Assisted the Project Manager to develop both high-level and detailed application architecture to meet user requests and business needs
- Worked extensively in writing and debugging complex stored procedures, triggers, Inner Joins, Outer Joins, views and user-defined functions.
- Involved in designing, developing and testing of the ETL (Extract, Transformation and Load) strategy to populate the insurance data from various source systems feeds using SSIS
- Installed, configured and maintained SQL Server Integration Services (SSIS).
- Created packages using Integration Services (SSIS) for data extraction from Flat Files, Excel Files OLEDB.
- Participated in requirement gathering, cube design, application design, SSAS development, training operational users.
- Implemented SQL Server OLAP services (SSAS) for building the data cubes. .
- Developed MDX Scripts to create datasets to perform reporting and included interactive drill down reports, report models and dashboard reports.
- Developed custom selection of reports ordering using SQL Server Reporting Services (SSRS)
- Used SSRS to create reports, customized Reports, on-demand reports, ad-hoc reports and involved in analyzing multi-dimensional reports in SSRS.
- Created a tree view application to view the recent reports generated and a scheduler to schedule a selected report to be run on a particular date.
- Developed reports using SSRS and published as PDF, Excel, and CSV formats.
- Maintain Operators, Categories, Alerts, Notifications, Jobs, Job Steps and Schedules. Monitor connections, locks and performance of SQL server.
- Designing and building data load procedures using MS SQL Server.
- Designed and implemented Stored Procedures and Triggers for automating tasks.
- Configured product meta-data tables to support client data reporting needs.
- Incremental and full database recovery with experience of complex recovery scenarios.
- Performance: Analyzed database performance with SQL query manager and Optimized indexes to significantly improve queries

Environment: SQL Server 2014/2012/2008R2/2008, T-SQL, SQL Integration Services (SSIS), SQL Reporting (SSRS), SSAS, Business Intelligence Studio, Visual Studio 2008, Erwi4.0, SharePoint, MOSS2007, C#, HTML, Visual Source Safe (VSS),

Client: CVS Health, Woonsocket, RI

Role: SQL BI Developer

Duration: January 2019 – July 2021

Responsibilities:

- Developing Stored Procedures, functions and database triggers and maintained referential integrity and implemented complex business logic.
- Creating and executing SQL Server Integration Service packages to populate data from the various data sources, creating packages for different data loading operations for many applications.
- Creating SSIS Packages using SSIS Designer for exporting heterogeneous data from OLE DB Source, Excel Spreadsheet to SQL Server.
- Migrating DTS packages to SSIS packages with new features of SQL SSIS.
- Building MDX queries and Data Mining Expression (DMX) queries for Analysis Services & Reporting Services.
- Creating multiple reports (SSRS) in Drill mode using tables, financial tables, crosses tabs and chart in SQL Server.
- Designing and implementing parameterized and cascading parameterized reports using SSRS.
- Used SQL Profiler for troubleshooting, monitoring, and optimization of SQL Server and non-production database code and T-SQL code from developers and QA.
- Used SQL Server Profiler to trace the slow running queries and tried to Optimize SQL queries for improved performance and availability.
- Developed a comprehensive reporting environment utilizing data from multiple sources and creating analysis using SQL Server Reporting Services (SSRS).
- Involved in complete SSIS life cycle in creating SSIS package, building, deploying and executing the package in both the environments (Development and Production).
- Used SSIS to create ETL packages (.DTSX files) to validate, extract, transform and load data to data warehouse databases, data mart databases.
- Created SSIS packages to extract data from OLTP to OLAP systems and scheduled Jobs to call the packages and Stored Procedures.

Environment: MS SQL Server, SQL Integration Services (SSIS), SSRS, Data Transformation Services, Business Intelligence Development Studio (BIDS), T-SQL, Visual Studio, Windows 2012 Enterprise, MSOffice.
