

Vijay Bhaskar Reddy Venna

Java Full Stack Developer

(912) 323-9605 | vijaybhaskarreddyvenna14@gmail.com | LinkedIn

SUMMARY

Java Full Stack Developer with over 6 years of experience delivering scalable, cloud-native applications across **finance, insurance, and regulatory compliance** domains. Proficient in **Java (11–17), Spring Boot/WebFlux, React.js, Angular, and Microservices Architecture**, with strong expertise in **CI/CD, Kubernetes, and Azure DevOps**. Demonstrated ability to build secure, high-performance systems using **OAuth2, JWT, RBAC**, and industry-compliant standards such as **FINRA, SOX, and SEC**. Skilled in integrating RESTful and GraphQL APIs, messaging with **Kafka**, and managing data across **PostgreSQL, MongoDB, and MySQL**. Proven track record of driving end-to-end development in **Agile** environments with a strong focus on quality and performance.

SKILLS

Programming & Scripting Languages: Java (8–17), TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3
Frameworks & Libraries: Spring Boot, Spring WebFlux, Hibernate, JPA, Quarkus, Angular (9–13), React.js, Redux, Material UI, Apache Camel, Liquibase
API & Integration Technologies: RESTful APIs, GraphQL, OpenAPI (Swagger), JSON, XML, Axios, Apache Kafka, Kafka Streams, Twilio API, SendGrid API, X12 EDI 270/271
Security & Compliance: Spring Security, JWT, OAuth2, OIDC, Keycloak, RBAC, SAML SSO, SOX Compliance, FINRA, SEC Regulations
Cloud, DevOps & CI/CD Tools: Azure Cloud, Azure Kubernetes Service (AKS), Docker, Kubernetes, Jenkins, Azure DevOps, Git, Bitbucket, Maven
Databases & Testing: MySQL, PostgreSQL, MongoDB, Liquibase, JUnit 5, Mockito, TestContainers, SonarQube, TDD, Static Code Analysis

EXPERIENCE

- Java Full Stack Developer, Berkshire Hathaway, USA

Oct 2024 – Present

 - Engineered reactive microservices using **Java 17, Spring WebFlux**, and **Quarkus**, adhering to **microservices architecture** principles for scalable underwriting workflows in a **cloud-native** environment.
 - Developed responsive UI modules using **React.js, Redux, TypeScript, Material UI**, and **Axios**, enhancing the user experience for quote management and real-time premium adjustments.
 - Integrated external risk data feeds and internal systems using **Apache Camel, RESTful services**, and **JSON/XML** payload transformation, enabling intelligent data orchestration and low-latency processing.
 - Designed and consumed **GraphQL APIs**, implemented **OpenAPI (Swagger)** documentation, and ensured contract-first API development to streamline **front-end and back-end integration**.
 - Secured distributed services using **Keycloak, OAuth2, OIDC, RBAC**, and **token-based authentication**, ensuring **enterprise-grade security, SAML SSO, and compliance with internal infosec policies**.
 - Orchestrated containerized deployments on **Azure Kubernetes Service (AKS)** with **Azure DevOps**, managed **CI/CD pipelines**, implemented **Liquibase** for database versioning, and ensured high-quality delivery using **JUnit 5, TestContainers, Mockito, SonarQube**, and **static code analysis tools**.
- Software Engineer, State Street, USA

Jan 2024 – Aug 2024

 - Designed and implemented RESTful microservices using **Java 11, Spring Boot**, and **Hibernate**, enabling automated ingestion and validation of high-volume trade data under **FINRA** and **SEC** regulatory frameworks.
 - Built responsive UI components using **Angular 13, TypeScript, HTML5**, and **CSS3**, empowering compliance officers to monitor real-time trade breaches, exception alerts, and reporting statuses.
 - Developed Kafka-based messaging pipelines to stream market and order flow data, integrating with back-end services and storing structured and unstructured data in **PostgreSQL** and **MongoDB**.
 - Ensured enterprise-grade security using **Spring Security, JWT-based authentication**, and **role-based access control (RBAC)**, aligning with **SOX** policies and global compliance requirements.
 - Automated CI/CD pipelines using **Docker, Jenkins**, and **Git**, managed Agile sprints in **JIRA**, and maintained 90%+ code coverage using **JUnit, Mockito**, and best practices in **test-driven development (TDD)**.
- Software Developer, Experion Technologies, India

Mar 2018 – Dec 2022

 - Designed and developed RESTful microservices using **Java 11, Spring Boot**, and **Hibernate** to automate insurance claim processing workflows, reducing manual effort by 40%.
 - Built dynamic and modular front-end components with **Angular 9/12, HTML5**, and **TypeScript** to enable real-time visibility into policy and loan status for underwriters and customers.
 - Integrated third-party APIs including **Kafka, Twilio**, and **SendGrid** to support asynchronous claim updates, SMS notifications, and email alerts, enhancing user communication and system performance.
 - Implemented **JWT-based authentication** and **RBAC** using **Spring Security** to ensure secure and compliant access control across multiple user roles such as policyholders, underwriters, and auditors.
 - Utilized **MySQL** and **MongoDB** to handle structured and unstructured data for claims, borrower profiles, and decision logs, optimizing queries to reduce dashboard load time by 30%.
 - Deployed containerized applications using **Docker** and managed deployments through **Jenkins** and **Kubernetes**, enabling efficient CI/CD and zero-downtime rollouts across development environments.
 - Collaborated in **Agile Scrum** teams, participating in sprint planning, code reviews (via Git/Bitbucket), and unit testing with **JUnit** and **Mockito**, achieving 90%+ code coverage across modules.

EDUCATION

Masters in Information Technology and Management, Campbellsville University, USA

Jan 2023 – Aug 2024
