

VINAY KUMAR

+1 (508) 509-7664 | bodapatlavinaykumarreddy@gmail.com | linkedin.com/in/vinayreddy77 | github.com/bodapatlavinay

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with expertise in building and deploying enterprise web applications, APIs, and cloud-native solutions. Skilled in .NET Core, Java Spring Boot, Angular, React, and SQL Server, with hands-on experience in Azure, Docker/Kubernetes, and CI/CD automation. Strong background in REST API design, microservices, and secure authentication. Known for improving performance, reducing deployment time, and supporting Agile delivery.

TECHNICAL SKILLS

Languages: C#, Java, Python, JavaScript, TypeScript, SQL

Frameworks: .NET Core, ASP.NET MVC, Spring Boot, Hibernate, Entity Framework

Frontend: Angular 16, React.js (Hooks, Redux, TypeScript), HTML5, CSS3, Bootstrap

Databases: SQL Server, Oracle SQL, MySQL, Azure SQL

Cloud & DevOps: Azure App Services, Docker, Kubernetes, Azure DevOps, GitHub Actions

Testing: xUnit, NUnit, JUnit, Mockito, Jest, React Testing Library

Other Tools: Swagger/OpenAPI, Postman, Jira, Git, Microsoft Office Suite

WORK EXPERIENCE

Cortracker360

Jul 2024 – Present

Software Engineer

Novi, MI, United States

- Design, build, and maintain a cloud-based CRM using **ASP.NET Core (C#)** and **Angular 16** for 5K+ users.
- Create reusable Angular components (tables, forms, modals) and shared services to speed up feature delivery.
- Design REST endpoints in .NET; document with **Swagger/OpenAPI**; validate payloads and error contracts.
- Integrate front end with APIs using Angular **HttpClient**, interceptors, and RxJS for retries and caching.
- Implement **RBAC** and **JWT** auth flows (refresh tokens, protected routes, role guards).
- Tune **Azure SQL** indexes and queries; reduce API latency ~30% with pagination and n+1 fixes.
- Own CI/CD in **Azure DevOps**; build/test pipelines, environment variables, approvals, and release gates.
- Containerize services with **Docker**; deploy to **Azure App Services**; set health probes and autoscale rules.
- Set up application monitoring with **App Insights/Serilog**; add correlation IDs and structured logs.
- Run performance checks (Lighthouse/Chrome DevTools) and bundle optimizations; lazy-load Angular modules.
- Collaborate with PM/QA/Design in Agile sprints; write tickets, do code reviews, and support UAT sign-off.
- Handle production support rotation: triage incidents, write postmortems, and add guardrail tests.

Lance Soft Technology Services

Jan 2021 – Aug 2022

Software Engineer

India

- Build and maintain backend services using **Java 8+**, **Spring Boot**, and **Spring MVC**.
- Design REST APIs, DTOs, and validation; publish API specs via **SpringDoc/OpenAPI**.
- Secure endpoints with **Spring Security** and **JWT**; configure roles, filters, and CORS.
- Create React front-end modules (Hooks, Redux, TypeScript) and integrate with backend APIs.
- Write unit/integration tests using **JUnit** & **Mockito**; target $\geq 85\%$ coverage on core services.
- Tune SQL in **Oracle/MS SQL**; analyze EXPLAIN PLAN, add indexes; cut runtime by ~20%.
- Automate builds/deployments with **Azure DevOps** and **GitHub Actions**; trunk-based branching.
- Use **Postman** collections for API testing; add Newman runs to pipelines.
- Implement centralized logging and alerts; troubleshoot across logs, traces, and DB metrics.
- Participate in Agile ceremonies; break epics to stories; estimate, demo, and document changes.
- Collaborate with QA and Product to reproduce bugs, write repro steps, and verify fixes in staging.
- Mentor interns on project setup, Git workflows, and coding standards.

PROJECTS

Student Management System | *ASP.NET MVC, C#, SQL Server, Azure*

- Built secure role-based authentication and CRUD modules for student/teacher/admin flows.
- Optimized SQL queries and indexing; improved response times by **40%**.
- Designed analytics dashboards for academic forecasting and performance tracking.
- Deployed to **Azure App Services** with CI/CD for continuous delivery.

Healthcare Web Application | *.NET Core, Angular, SQL Server, Docker*

- Built a HIPAA-aware patient management system with secure auth and personalized dashboards.
- Designed/consumed REST APIs for patient–doctor chat, lab results, and billing integrations.
- Containerized with **Docker** and deployed to cloud for scale and reliability.

Sales Insights Dashboard (Capstone) | *React, Power BI, SQL, Python*

- Delivered interactive React dashboards backed by SQL/Python pipelines.
- Implemented forecasting models; achieved **92%** accuracy on quarterly trends.
- Reduced manual reporting effort by **50%** with automated refresh and reusable components.

EDUCATION

Master of Science in Computer and Information Technology	2024
<i>Lindsey Wilson College</i>	<i>KY, United States</i>

Bachelor of Technology in Mechanical Engineering	2021
<i>Kommuri Pratap Reddy Institute of Technology</i>	<i>Hyderabad, India</i>
