PROFESSIONAL SUMMARY

Results-driven **Frontend Developer** with a strong foundation in **React.js, JavaScript, and MERN stack**. Holds a **Master's degree in Computer Science** and hands-on experience developing **scalable web applications**. Skilled in **modern frontend frameworks**, and **backend integration**. Passionate about building user-friendly digital experiences while leveraging best practices in **UI/UX design, software engineering, and cloud technologies**. Strong problem-solving skills with a focus on **collaboration, clean code, and continuous learning**.

TECHNICAL SKILLS

- **Programming & Frameworks:**
JavaScript (ES6+), Java, C, PHP, React.js, React Native, Node.js, Express.js
- **Databases & Backend:**
MongoDB, MySQL, RESTful APIs, CRUD operations
- **Web Technologies:**
HTML5, CSS3, Bootstrap
- **Version Control & Tools:**
GitHub, Expo CLI, Postman

EDUCATION AND CERTIFICATION

1. Bachelor of Engineering in Computer Engineering | S. S. A. I. E. T - GTU 2017-2021
 - Pursued a bachelor's degree in computer engineering with a CGPA of 9.81 out of 10.00.
2. Master's in computer science | California State University – Dominguez Hills 2022-2025
 - Gained a master's in computer science with a CPI of 3.67 out of 4.00, concentrating in Software Engineering.

WORK EXPERIENCE

1. PHP Developer Intern – Red & White, Surat (*June 2019 – Aug 2019*)

- Spearheaded the development of a robust Admin panel, crafting efficient CRUD APIs using PHP and MySQL. Demonstrated strong teamwork and communication by effectively collaborating with team members to integrate their insights and deliver a high-quality product.

- Proficient in core web development technologies including HTML, CSS, JavaScript, and PHP, with a proven ability to solve complex problems, as evidenced by the successful implementation of role-based user authentication.

2. Web Developer – WebOsmotic, Surat *(January 2022 – April 2022)*

- Developed responsive and user-friendly web interfaces using **HTML, CSS, JavaScript, and Bootstrap**.
- Led the **design and implementation of a modern Admin panel**, ensuring intuitive navigation and optimized performance.
- Applied **UI/UX best practices** to create visually appealing web applications that enhanced user engagement.
- Collaborated with cross-functional teams to align design goals with business requirements.

HANDS-ON PROJECTS

1. XLedger – Blockchain-Based Organ Donation System *(MERN Stack, Blockchain, Smart Contracts)*

- Engineered a smart organ matching system using Ethereum smart contracts and Ganache.
- Automated donor-recipient matching based on medical criteria, improving efficiency by 30%.
- Designed and implemented a private blockchain network to ensure secure transactions.
- Integrated React.js frontend with Node.js backend for seamless data visualization.

2. Go Driver – Mobile Driver Booking App *(React Native, PHP, MySQL, Node.js, Expo CLI)*

- Built a React Native mobile app that enables users to book drivers on-demand.
- Designed and optimized the backend architecture, improving response times by 25%.
- Led a team of developers using GitHub, enhancing collaboration and version control efficiency.

3. Organ Care – Web-Based Organ Registry System *(MERN Stack)*

- Developed a **real-time organ tracking system**, allowing hospitals to **monitor organ availability**.
- Implemented a **secure database architecture** to store medical records using **MongoDB**.
- Designed an interactive **user dashboard**, enhancing usability and engagement.
- This experience honed my leadership, communication, and project management skills, emphasizing the importance of teamwork and a collaborative environment for achieving successful project outcomes.

4. Organ Care – Web-Based Organ Registry System *(MERN Stack)*

- Created a **personalized diary management system** with features like **tagging and categorization**.
- Integrated **secure authentication** using JWT to protect user data.
- Optimized database queries for **faster data retrieval**, reducing API response times by **40%**.
