

Viral Shah

Scrum Master, Senior Business Analyst

+1 (508) 556-7012 | viralrrt@gmail.com | Millbury, Massachusetts, USA

PROFESSIONAL SUMMARY

Results-driven Senior Business Analyst and Certified Scrum Master with 11+ years of experience delivering complex IT solutions across Agile, SAFe, and Waterfall environments. Proficient in driving CMS, web portal, mobile app, and data migration projects by bridging business needs with technical execution. Proficient in translating strategic goals into detailed user stories, data mappings, and test scenarios, backed by strong SQL and data analysis expertise. Adept at leading cross-functional teams, streamlining processes, and ensuring high-quality, user-focused product delivery.

EXPERIENCE

Scrum Master, Senior Business Analyst, QA, Project Management

Amtrak, Washington, District of Columbia, United States

August 2023 - Present

- Apply Agile methodology using 3-week sprints for timely project deliverables, ensuring continuous collaboration and incremental value delivery.
- Gather and analyze requirements from business users and SMEs for enhancements and re-engineering across HR, Law, Intranet, Salesforce, and analytics applications.
- Work cross-functionally with vendors, product owners, QA teams, procurement, and internal stakeholders to ensure smooth execution and compliance with organizational policies.
- Create detailed RSDs, BRDs, and FRDs, along with business process flow diagrams in MS Visio to enhance clarity and alignment with business objectives.
- Serve as Scrum Master by facilitating daily stand-ups, sprint planning, reviews, retrospectives, and Scrum of Scrums to track progress, resolve blockers, and improve team efficiency.
- Conduct JAD sessions with lines of business, SMEs, and vendors to validate requirements and address open or critical issues effectively.
- Develop and manage JIRA epics, user stories, tasks, and bugs—defining acceptance criteria and maintaining traceability across the development lifecycle.
- Build project documentation in Confluence and design dashboards to provide transparency and visibility for stakeholders.
- Support SIT and UAT testing activities, validate functionalities against specifications, and track defect status through JIRA workflows.
- Create and maintain a Requirements Traceability Matrix (RTM) to ensure complete coverage and alignment of business requirements throughout the testing and deployment phases.
- Contribute to end-to-end project lifecycle activities from initiation through deployment and business sign-off, ensuring adherence to quality standards and timelines.

Senior Business System Analyst

Regal Rexnord, United States

May 2022 - July 2023

- Drive Agile delivery in a SAFe environment, applying SAFe Core Values and Principles while participating in all sprint ceremonies including daily stand-ups, sprint planning, reviews, and retrospectives.
- Gather and refine requirements by facilitating JAD sessions with stakeholders, SMEs, and project managers; document in JIRA as Epics, Features, and User Stories, ensuring acceptance criteria are clear and complete.
- Partner with Product Owner to manage backlog, prioritize scope, and serve as liaison between development, testing, and stakeholder teams to align deliverables with business goals.
- Collaborate with QA to design test scenarios, review test cases, conduct user acceptance testing, and deliver user training to ensure solutions meet documented requirements.
- Document data mapping specifications and define business rules in partnership with stakeholders and IT leads to support accurate data integration.

- Configure Product Information Management (PIM) systems to ensure product attributes, relationships, and pricing appear accurately on UI and integrate with services across web platforms.
- Design UML diagrams including process models, activity diagrams, use case diagrams, and sequence diagrams using Microsoft Visio to support system analysis and design.
- Manage Sitecore Content Management System configurations, including templates, components, dialogs, and widgets; integrate digital content such as images and videos for product development initiatives.
- Conduct Impact Analysis to assess system and process changes, mitigating risks and ensuring smooth implementation.

Scrum Master/Sr Business Analyst

Amtrak, Washington, District of Columbia, United States

June 2019 - April 2022

- Deliver Agile project solutions by leading 3-week sprints, daily scrums, sprint planning, reviews, and Scrum of Scrums, ensuring on-time deliverables and issue resolution across cross-functional teams.
- Collaborate with business stakeholders, SMEs, and technical teams to gather requirements for Amtrak.com web, mobile, and HR applications, including payroll, tax, and refund automation initiatives.
- Develop comprehensive functional and non-functional documentation such as RSDs, BRDs, and FRDs, and create business process flow diagrams using MS Visio for clear visualization of workflows.
- Facilitate JAD sessions with LOB partners, vendors, and SMEs to refine open and critical requirements while ensuring alignment across multiple workstreams.
- Partner with vendor management teams (AWS, PEGA) to define and document backend requirements for Amtrak eMD services.
- Oversee automation and validation of XML data transfers into Salesforce for tax and refund processing, ensuring accuracy of integrations.
- Build and maintain Confluence project pages to centralize documentation and provide transparent access to team members and stakeholders.
- Manage JIRA workflows by creating Epics, user stories, bugs, and enablers, defining acceptance criteria, and tracking progress with the product owner.
- Collaborate with QA during SIT and UAT phases by supporting defect triage, developing test plans, and uploading requirements into HP ALM for traceability via RTM.
- Drive releases across diverse Amtrak initiatives including Dotcom, Mobile App, COVID Form Compliance, Employee Companion, Rail Pass, and eMD enhancements.
- Design stakeholder dashboards to deliver analytics and actionable insights for internal and external reporting needs.

Sr Business system Analyst/Scrum Master

Mary Kay Global, Dallas, Texas, United States

January 2017 - June 2019

- Work in an Agile environment with two-week sprints, actively participating in daily scrums, sprint planning, and release reviews to ensure timely, high-quality deliverables.
- Conduct JAD sessions with stakeholders and vendors to refine business requirements, resolve critical issues, and align system enhancements with IT strategy.
- Develop and maintain product configuration within PIM and Sitecore CMS, managing digital content, workflows, and media assets for consistent user experience.
- Translate complex business requirements into detailed user stories and acceptance criteria in TFS, collaborating closely with product owners and developers.
- Design and optimize UX components in Figma, integrating responsive layouts with CMS and API-driven web services.
- Write and execute SQL queries to validate backend logic, support testing, and ensure data integrity across eCommerce workflows.
- Collaborate with QA and DevOps teams during UAT, release, and go-live support, triaging issues and ensuring smooth production deployments.

Business System Analyst

Bed Bath and Beyond, Union, New Jersey, United States

February 2014 – June 2015

- Supported kiosk and point of sale capabilities including data mapping and other BA and testing activities, business sign-off, vendor management etc.

Business Analyst

Best Buy, Minneapolis, Minnesota, United States

April 2012 - November 2013

- Supported dotcom capabilities, mobile app compatibility and geek squad services integration initiatives.

SKILLS

- **Business Analysis & Requirements Management:** BRD, FRD, RSD creation; User Story documentation; Use Case preparation; UML diagrams (Process, Activity, Sequence)
- **Programming Language & Visualization Tools:** Python, Power-BI, Tableau
- **Agile & Project Management:** Scrum, SAFe principles, Sprint planning, Backlog grooming, Daily stand-ups, PI planning, Change management, Release planning
- **Quality Assurance & Testing:** SIT, UAT, Test scenario development, Gherkin syntax, Defect triaging
- **Technical Skills:** SQL querying & data analysis, Source-to-target data mapping, API understanding, PIM configuration, CMS (Sitecore), Web technologies
- **Tools & Platforms:** JIRA, TFS, Microsoft Visio, SQL Server Management Studio
- **Stakeholder & Team Collaboration:** JAD sessions, Workshops, Cross-functional team coordination, Vendor management
- **UI/UX & Documentation:** Wireframes, Prototypes, Interface specifications, Process flow diagrams
- **Domain Experience:** eCommerce, Transportation, HR systems, Mobile apps, Web portals, Data migration projects

EDUCATION

MBA in Computer/Information Technology , Goldey-Beacom College, DE, USA

MBA in Finance Goldey-Beacom College, Goldey-Beacom College, DE, USA
