

Vishalini | Sr Digital Analytics Engineer

Email id:Vishalinikatta111@gmail.com | Phone no:+1(479) 866-0963

LinkedIn Id: <https://linkedin.com/in/katta-vishalini-405a40174>

PROFESSIONAL SUMMARY:

Around 9 years of experience in Digital Analytics and Data Engineering with the right mix of technical and functional knowledge.

Key Highlights:

- **Digital Analytics Expertise:** Extensive experience with Adobe Analytics, Google Analytics (UA & GA4), Adobe Target, IBM Core Metrics, Web Trends, and Adobe Customer Journey Analytics (CJA), along with tools like Adobe Launch, Tealium, and GTM.
- **Adobe Customer Journey Analytics (CJA):** Worked on Adobe Customer Journey Analytics (CJA) initiatives, specializing in data integration, advanced analytics, and delivering actionable insights for optimizing customer experiences across digital touchpoints.
- **Customer Profiles & AEP:** Built and maintained real-time customer profiles in Adobe Experience Platform (AEP) by aggregating data from multiple touchpoints to enable personalized customer experiences.
- Extensively **used SQL for querying and manipulating large datasets from digital marketing** campaigns, enabling the extraction, cleaning, and transformation of data for detailed analysis and reporting
- **Technical Skills:** Proficient in Java, JavaScript, jQuery, AngularJS, and debugger tools, with expertise in configuring third-party pixels like Facebook, LinkedIn, Twitter, and Google DoubleClick.
- **Data Integration & Reporting:** Synthesized data using KPIs, created dashboards, and delivered actionable insights to stakeholders, senior management, and marketing teams. Skilled in integrating diverse data sources in AEP for advanced analytics. BI tools like Tableau & Power BI.
- **Training & Strategy:** Trained business stakeholders to leverage analytics tools for self-service reporting and executed end-to-end digital analytics strategies, including implementation, reporting, and optimization.
- **Agile Collaboration:** Participated in daily SCRUM meetings to monitor project progress, resolve issues, and ensure alignment with digital marketing strategies such as paid search, video, and social media.

EDUCATION:

Bachelors in Computer Science

JNTU Hyderabad (May 2016)

TOOLS AND TECHNOLOGIES:

Analytical Tools	Adobe Analytics, Adobe Experience Platform (AEP), Adobe WebSDK, Adobe Customer Journey Analytics (CJA), Segment
Web Analytics	Adobe Analytics, Adobe Target, Google Analytics 4
Tag Managers:	Adobe Launch, Google Tag Manager, Tealium
Database & Related Tools:	SQL, Google Cloud Platform, Snowflake
BI Tools:	Google Looker Studio, Tableau, Power BI
Defect tracking tools:	JIRA, Test Director/Quality Center and Bugzilla, Observe Point.

PROFESSIONAL EXPERIENCE:

Client: Omnicom Health Group
Role: Sr Digital Analyst

May 2021 - Till Date

- Implemented and configured **Adobe Analytics** to track and analyze user behavior across various Pharmaceutical websites.
- Website tagging across all business pages using Adobe Analytics. **Created rules in Adobe Launch** to track Pageviews, links, buttons, downloads.
- Collaborated with cross-functional teams to align data strategies and provided training sessions on best practices for leveraging **Adobe Experience Platform (AEP)** tools.
- Developed and managed the data integration process from Adobe Experience Platform (AEP) to **Adobe Customer Journey Analytics (CJA)**.
- Worked on multiple **web Analytics projects involving end-to-end Adobe Analytics** development, support, and testing and data analysis.
- Led the implementation of **Adobe Experience Platform (AEP)** for data management and customer experience optimization.
- Led the implementation of analytics using Universal Analytics and various Google Analytics 4 properties across various HCP and Patient websites.
- Conducted regular audits and optimizations to ensure accurate and reliable data collection, leveraging **Adobe Analytics** advanced features and functionalities.
- Created Tags in GTM to track Pageviews, links, buttons, downloads. Created reusable Web Properties in Launch for easy onboarding of new sites.
- Worked with Agencies & implemented various marketing pixels such as Google Floodlight, AdWords & Facebook pixel across marketing channels for Digital Marketing.
- Analyzed large datasets within **CJA** to derive actionable insights, enhancing business strategies.
- Participate in the development, design, testing and deployment of solutions built on the Adobe Experience Manager platform.
- Spearheaded the integration of **Adobe Customer Journey Analytics (CJA)** with existing marketing platforms to streamline data collection and analysis.
- Managed and maintained **Adobe Launch** configurations for seamless deployment of tracking scripts across Verizon's websites.
- **Worked on troubleshooting any issues found** while implementing the basic & advanced tracking requirements and worked with developers to perform any code (Data Layer) changes needed.
- **Created technical documentations in Confluence** application for business users and used Jira tracking system for tracking development status & defects

Client: Innocean
Role: Sr Digital Analytics Consultant

Aug 2019 - May 2021

- Monitored and troubleshooted **Adobe Launch** implementations to identify and resolve issues, ensuring data accuracy and integrity.
- Analyzed performance impact, dependencies and prerequisites of tagging implementations on client related properties.
- Conducted and analyzed measures that determined the depth of GA exploration and the conversion rate Confidential which
- Configuring **Marketing and Social media tags** like Facebook Pixel, Bing, 4Cite, Snapchat, Artsai, LinkedIn **in Adobe Launch**
- Created efficient data models in **Tableau** to optimize performance and ensure accurate data representation.
- Worked with **Analytics teams to ensure that all tagging specs/code** are properly implemented while minimizing performance impact.

- **Collaborated with other analysts and** other business intelligence personnel to design, develop, and support ongoing data and analytics dashboards across a variety of data sources for the digital channels.
- Integrated data from multiple sources, including SQL Server, Excel, Azure, and APIs, to create comprehensive datasets for **Power BI** reports.
- Implemented Third Party Analytics tools and Pixel tags through GTM, Google Analytics, Ad server Pixel Tags. Responsible for Business analysis and requirements gathering while preparing the test strategy documents.
- Implemented **AEP Target** for personalized content delivery, resulting in improved conversion rates and customer satisfaction.
- Solid experience in data visualization using Tableau, google Data Studio in the Business Intelligence Industry to connect MySQL databases to develop reports, tables, charts, dashboards.
- **Created rules in Adobe Launch to track Page views, links, buttons, downloads.** Highly capable in using **Launch** for building Rules which are injected into web pages for tagging.
- Worked on native testing and debugging using web debugging proxy tools like **Observe point, Omni bug and Adobe Analytics debugger.**
- Combined Matplotlib In Python and Google Data Studio to generate plots, histograms, power spectra, bar charts, time-series charts, error charts, scatterplots, correlation tables, etc. to create reports and do presentations.

Client: Humana

Jun 2018–July 2019

Role: Sr Digital Analyst

- Conduct comprehensive analysis of digital performance metrics including website traffic, user engagement, and conversion rates across various digital channels such as websites, mobile apps, and social media platforms.
- Interpret complex data sets from **digital analytics platforms such as Google Analytics, Adobe Analytics,** and CBRE's internal systems to derive actionable insights that drive digital strategy and decision-making.
- Integrated data from multiple sources, including SQL Server, Excel, Azure, and APIs, to create comprehensive datasets for **Power BI reports**
- Provide strategic recommendations to optimize **digital campaigns, website usability,** and overall digital presence based on data-driven insights and industry best practices.
- Developed and maintained custom reports, **dashboards, and visualizations in Adobe Analytics** to track, analyze, and visualize key performance indicators (KPIs), user behavior, and campaign performance across Verizon's digital platforms.
- Develop and implement **measurement plans for tagging in Google tag manager** to track and measure the effectiveness of digital marketing campaigns, ensuring alignment with business objectives. Prepare and present regular reports to stakeholders, highlighting key findings and actionable recommendations.
- Lead initiatives focused on improving conversion rates and user experience across digital properties **through A/B testing,** user journey analysis, and optimization strategies.
- Develop attribution models to accurately measure the contribution of each digital marketing channel to conversions and business outcomes. Collaborate with marketing teams to optimize budget allocation based on performance insights.
- Utilized **Adobe Analytics** advanced features, including segmentation, attribution modeling, and data visualization, to provide actionable insights and recommendations to marketing, product, and executive teams.
- Collaborate closely with cross-functional teams including digital marketing, IT, design, and business development to align digital initiatives with broader business goals. Serve as a subject matter expert on digital analytics, providing guidance and support to internal stakeholders.

Client: Capital One

Aug 2017–May 2018

Role: Data Developer/Digital Analyst

- **Tracked website analytics and reported findings** to clients. Performed debugging to enable end-to-end, client-facing testing of responsive web and mobile apps for iOS and Android platforms.
- Maintained and built tagging and data structures across digital properties utilizing data-layers using Adobe Tools (**Adobe Analytics, Adobe Launch & Adobe Target**).
- Responsible for perpetual in-depth analysis of audience measurement and site activities.
- Created **parameterized reports and ad-hoc reports** using Report builder.
- Imported nightly raw beacon file into an **SQL-compliant database** for regression analysis for prediction of lower-funnel events based on history of consumer's previous upper-funnel actions. Created tagging specifications for Omniture – Site Catalyst implementation (Props, Evars, events).
- **Developed reports and Dashboards** to meet clients' needs in Adobe Analytics and Target Advice on testing protocols and practices to ensure testing needs are met. Implemented A/B tests and help prioritize testing.
- Responsible for creating the table-less designs meeting W3C standards & 508 Compliance focusing on accessibility. Created rules in **Adobe Launch to track Page views**, links, buttons, downloads. Created reusable Web Properties in Launch for easy onboarding of new sites.
- **Adobe tag validation with major debugging tools** like Digital pulse debugger, chrome developer, Charles, Omni bug, etc. Design, build, run and analyze experiments and personalized experiences using Adobe Target.
- **Custom link tracking, dynamic variables**, (SAINT classifications, multivariate testing), in order to deliver the web metrics.
- Architect and design Adobe target technical solutions to drive multi-touch/multi-channel marketing, defined by the buyer's journey.

Client: Amazon

Jun 2016 –July 2017

Role: Digital Analyst

- Effectively collaborated **with Business analysts during the requirement review process** and contributed to design and development of client and server database applications.
- As part of knowledge sharing, trained marketing team members on reporting and analysis using **Adobe Analytics**.
- Maintained and updated HTML/CSS templates on a regular basis and as required and Designed UI modules using HTML, CSS, and JavaScript.
- Analyzing the **data using tools like Excel, SQL, Python, Tableau & Sisense** for insights such as the Metrics like Clicks, Leads, Ad Copies, Creatives, Keywords and Touch Point Analysis (Last Touch, First Touch & Multi Touch Attribution models)
- Implemented Presentation layer using CSS Framework, Angular JS, and HTML5.
- Implementing **the basic & advanced tracking requirements** and work with developers to perform any code (Data Layer) changes needed
- Logging the **defects, tracking and following up** with the Development team.
- Prepared test scripts based on the **Functional and technical Documents** and Executed **SQL Queries** for testing integrity of data in **database (Backend Testing)**
- Used Quality Center for test scripts preparation and execution and involved in Peer reviews and Defect review meetings.
- Worked on multiple **web Analytics projects involving end-to-end Adobe Analytics** development, support, and testing and data analysis.
- Actively participated in sprint planning meetings to provide input on testing timelines and dependencies.
- Configuring **Marketing and Social media tags in Adobe Launch**.
- Documented and communicated test results and findings to stakeholders, including detailed defect reports and recommendations for resolution.

- **Validated and Audited using Observe Point, Adobe Analytics Debugger**, Adobe Marketing Cloud Debugger, Firebug, IETester, Chrome Inspector.
- Provided ongoing support to end-users by troubleshooting issues and providing timely resolutions.
- Contributed to continuous improvement initiatives by suggesting enhancements to testing processes and methodologies.
