Professional Summary

Experienced Senior WebLogic & Linux Administrator with 9+ years supporting enterprise middleware environments across financial and telecom domains. Specialist in installation, configuration, clustering, automation, scripting, and performance tuning for WebLogic, SQL Server, and Linux systems. Proven success in high availability architectures, DevOps CI/CD, and cloud platform integration.

Core Skills

WebLogic Administration, Linux OS (RHEL, CentOS, SUSE), WLST & Bash scripting, SQL Server Admin, Python automation, High Availability Clusters, JVM tuning, Middleware Optimization, Jenkins/Ansible, AWS Cloud, System Monitoring, Security & Compliance.

Professional Experience

Verizon – Senior WebLogic Linux Administrator

Dec 2023 – Present Irving Tx

- Installed, configured, and maintained Oracle WebLogic Server domains, clusters, and deployments for enterprise applications.
- Optimized WebLogic high-availability clusters using thread tuning, managed server setup, and SSL/TLS certificates.
- Developed WLST scripts for deployment automation, configuration changes, and operational efficiency.
- Performed SQL Server admin tasks: database maintenance, backup, and performance tuning to support Java applications.
- Engineered Linux OS administration: patching, system monitoring, security compliance, and capacity planning.
- Automated middleware and OS tasks using Bash and Python scripts for service health and deployment.
- Built CI/CD pipelines with Jenkins and Ansible for rapid application deployments and upgrades.
- Monitored system health, resolved performance bottlenecks, and led troubleshooting for JVM and clustered resources.
- Collaborated with application/dev teams to support deployments, upgrades, and major outages.
- Led migration projects from legacy middleware platforms to AWS EC2, ensuring improved scalability.
- Designed and conducted performance benchmarking using AppDynamics and JMeter, reducing latency.
- Mentored junior admins and developed SOPs for streamlined operations.

AT&T – System Administrator WebLogic Linux Scripting

Dec 2020 – Dec 2023 INDIA

- Installed, supported, and configured WebLogic domains and clusters on Linux OS.
- Automated provisioning, patching, config updates using WLST and Bash scripting.
- Managed SQL Server integration and database performance tasks.
- Implemented Linux monitoring and security procedures to maximize middleware uptime.
- Developed Python scripts for middleware automation and integration.
- Deployed clusters with Apache HTTP for load balancing and optimized JVM parameters.
- Worked in CI/CD environments integrating Jenkins and Ansible for deployment efficiency.
- Collaborated with infra, DB, and Dev teams to troubleshoot and improve deployments.
- Documented operational processes and automation solutions for repeatability and training.
- Led troubleshooting for major outages, collaborating with cross-functional teams for rapid recovery.
- Coordinated security audits and compliance reviews for WebLogic/Linux environments.

Chola MS Insurance – Middleware Administrator

Jul 2016 – Dec 2020 INDIA

- Installed and maintained WebLogic 11g/12c, WebSphere, and JBoss on Linux enterprise infrastructure.

- Implemented SSL certificate management, patching, and vulnerability mitigation for middleware platforms.
- Developed WLST and Shell scripts for automated configuration, deployment, and monitoring.
- Assisted with SQL Server integration and conducted performance tuning for business-critical workloads.
- Engineered high availability solutions via clustering and load balancing with Apache.
- Automated Linux OS maintenance procedures, backups, and compliance checks.
- Documented operational runbooks and collaborated with development teams for continuous improvement.
- Developed and maintained upgrade runbooks for middleware versions, simplifying future migrations.
- Supported business-critical UAT and production deployments across distributed environments.
- Liaised with vendors for middleware tuning and integrated monitoring solutions.

Education

Bachelor of Engineering – Computer Science (2012–2016)
Sarva Bhartiya Shiksha Peeth
