PROFESSIONAL EXPERIENCE:

Business Analyst (Part-Time)

Jan. 2024 – Present

Hireworks

- Interviewed stakeholders to gather requirements on what features need to be built and translated the findings into user stories for the development team
- Facilitated backlog refinement meetings with developers to achieve a shared understanding of the feature details being built
- Successfully collaborated with a team consisting of 9 members across 2 continents by adapting a communication approach that accommodated for different time zones
- Conducted in-depth research of competitor features and market share to maximize the value the product being built offers
- Drove creation of user stories and user acceptance criteria, enabling the development team to align what is being developed with stakeholder vision
- Assisted in the creation of wireframe designs to ensure clarity in the final design produced by the UX/UI designer

Team Leader

May 2019 - Sep. 2021

J&B Painting Co.

April 2022 - Present

- Provided high quality workmanship from prepping to final coat across interior and exterior projects for both residential and commercial projects
- Trained 15+ new hires, reducing onboarding time and cost while improving the new employee experience
- Address presenting issues immediately through clear communication with the client
- Collaborated with suppliers to save the company 15% in supply costs
- Conducted performance interventions for underperforming team members to increase team productivity and understanding

Analyst

Oct. 2020 – April 2022

Progress Coaching

- Created custom assessments and provided custom reports to said assessments to aid clients in developing their talent
- Instituted the use of a new assessment tool to provide automated generation of reports which reduced manual labor or report creation
- Worked closely with clients through frequent and transparent communication to ensure custom assessments being built were meeting their needs
- Collected data from client assessments and presented analysis and findings through visual tools to provide clear insights for the client
- Streamlined transition from outdated tools to new ones by completing online tutorial courses

Business Analyst (Contract)**June 2019 – Aug. 2019***Milwaukee Brewers*

- Analyzed 68,000 rows of group ticket sales data and presented the findings to key members of the strategic sales and marketing teams
- Results helped drive changes to strategic decision making around ticket sales, specifically to the locations in which group sales packages are marketed
- Utilized a statistical programming language, R, to organize and manage the initially messy dataset
- Analyzed ticket sales data to spot trends and created visual representations through tables, graphs, and charts to offer actionable next steps to strategic partners
- Worked closely with head of business intelligence through weekly 1 on 1s to ensure correctness of analysis while adhering to a tight deadline
