

Yash Patel

Full-stack Developer

Email Id: yash.kpatel701@gmail.com | Phone No: +1 (647) 219-2010 | Location: Toronto, ON

Summary

- Around 4 years of experience as a Full Stack Developer in the Analysis, Design, Development and Testing and Implementation of applications.
- Developed UI pages with HTML5, CSS3, Bootstrap, JavaScript, JSON, and ES6 features.
- Designed and developed RESTful Microservices using Spring boot consumed by other microservices in other Java applications with spring data.
- Designed CSS templates for use on all pages on the website working with CSS Background, positioning, text, border, margin, padding, and table.
- Implemented Node-Router, Node Redux architecture, ES6, web pack, and Grunt to turn the application into Single Page Application.
- Defined new validations through Angular JS for the form field validation implemented through HTML.
- Stored the data in the form of JSON structure-based documents, stored in a collection using MongoDB.
- Created Single Page Application with loads multiple views using route services and added an elegant user experience to make it more dynamic by using the React.JS framework.
- Utilized GitHub repository for version control and implemented & maintained the branching and build/release strategies utilizing Git.

Skills

Methodologies: SDLC, Agile, Waterfall, Scrum

Language: HTML5, CSS3, JavaScript, TypeScript, Java, Python, PL/ SQL

Frameworks: React.JS, Node.JS, Spring, SpringBoot, Spring MVC, Angular, Bootstrap, Materialize CSS, jQuery, Express.JS

Tools: Git, GitHub, Visual Studio, Visual Studio Code, Jupyter Notebook, RStudio, Jira

Databases: MySQL, MongoDB

Other Skills: REST API's

Operating System: Windows

Education

Post-Graduation Diploma in Information Technology Solution | 2022 - 2023

Humber College Institute of Technology & Advanced Learning, Toronto, Canada

Bachelor of Engineering in Information Technology | 2016 - 2020

Sardar Vallabhbhai Patel Institute of Technology, Vasad, India

Experience

Honda, Toronto, ON

Role: Full-stack Developer | Feb 2023 - Current

- Expertise using React Components, Reducers, and Actions to implement MVC and Redux architecture and having experience with middleware such as redux-thunk.
- Participated in Agile methodology for application development and used JIRA as a project management tool.
- Handled all the client-side validation using JavaScript and jQuery.
- Involved in implementation of RESTFUL web service APIs using Node.js, which were consumed by making AJAX calls and JSON as data exchanging tool.
- Used angular-cli tool to configuring the angular project and building it for development of Angular application using Angular.
- Created AWS Lambda using Java to perform event-driven processing.
- Developed certain features of the application functionality i.e. CRUD (Create, read, update, delete) features using Express JS, Node JS, and MongoDB.
- Use React.JS to create a more responsive webpage, which can be compatible with all browsers and compatible with different devices.
- Built a RESTful API to save and retrieve using a remote server in Java using Spring Boot, and MongoDB.

Phoenix Technologies, India

Role: Jr. Full-stack Developer | Dec 2020 – Jan 2022

- Implemented various screens for the front end using React and used various predefined components from NPM (Node Package Manager) and redux library.
- Used MongoDB to store Big Data in JSON format and aggregation is used in MongoDB to match, sort, and group operations.
- Used NodeJS with Angular for server-side rendering. Implement modules into Node JS to integrate with designs and requirements.
- Developed certain features of the application functionality i.e. CRUD (Create, read, update, delete) features using Angular JS and Responsive Design.
- Good Experience in Object Oriented Analysis in developing Front-End and Back-End frameworks using various design patterns.
- Associated with various phases of the Software Development Life Cycle of the application like requirement gathering, Design, Analysis, and Code development.

X-Logic Technologies, India

Role: Front-end Developer | Aug 2019 – Nov 2020

- Created the back end using Node.JS, and Express.JS and included the npm package Axios (Promise-based HTTP client for the browser and node.js) to get results from multiplesearch APIs.
- Research and report on performance optimization techniques in MySQL.
- Have worked on big data (Splunk enterprise) to generate the Rest API and integrated that API into Client-side code using Node JS, and Express JS.
- Developed JSX files for maintaining contents like video, images, and audio and displayed them in Flash application. Used Responsive Web Design.
- Converted wireframes and design concepts into usable and aesthetically pleasing web interfaces by utilizing CSS pre-processors like LESS together with HTML5, CSS3, and CSS.
- Employed JavaScript technologies, including AngularJS and ReactJS, to develop interactive and user-focused websites that improve user interaction.

Projects

Quant-Trading-Platform | Jun 2023 – Aug 2023

- Spearheaded the development of a comprehensive dashboard providing real-time market data and news for cryptocurrencies, including Bitcoin, meeting the increasing demand for reliable insights in the dynamic cryptocurrency market.
- Implemented a 'Contact Us' feature, enabling direct communication with users to gather feedback and foster a community-driven approach, enhancing user satisfaction and platform usability.

Prediction of Personal Loan | Jun 2022 – Aug 2022

- Developed and implemented an analysis and prediction project for personal loan conversion of bank customers using the k-Nearest Neighbor Model in Python.
- Achieved an impressive 88.6% prediction accuracy for the dataset.

BookMate: Your Ultimate Book Management Solution | Mar 2022 – Apr 2022

- Created BookMate website, using HTML, CSS, and JavaScript, an innovative book management website that allows users to organize and keep track of their reading lists.

SportTrack: An App for Efficient Sports Event Management | Oct 2019 – Mar 2020

- Developed SportTrack, an all-in-one solution for sports event management that optimized resources, minimized errors, and improved customer satisfaction.
