

Professional Summary

Creative and performance driven **React Native Engineer** with 6+ years of experience in building **cross platform mobile apps** that are stable, fast, and user friendly. Adept at crafting seamless user experiences using **React Native**, while integrating powerful **iOS-native features** with **Swift** and **Objective-C** when needed. Comfortable working across the full mobile development lifecycle from wireframes to the App Store. Passionate about writing clean code, solving real user problems, and optimizing apps for performance. Collaborates well in fast paced, Agile teams and brings a strong focus on delivering business value through tech.

Technical Skills

- **Languages:** JavaScript, TypeScript, Swift, Objective-C, HTML5, CSS3
- **Mobile Development:** React Native, iOS SDK, CocoaPods, Xcode, Fastlane, App Store Connect
- **Frameworks:** Redux, Context API, React Navigation, Firebase, Axios, Lodash
- **Testing & Debugging:** Jest, Detox, Appium, Flipper, Xcode Profiler
- **DevOps/CI-CD:** Git, GitHub, GitLab, Bitbucket, Jenkins, GitHub Actions, CodePush
- **APIs:** RESTful APIs, GraphQL, Firebase Realtime DB, Firestore
- **Other Tools:** Postman, JIRA, Agile/Scrum, Slack, Figma, Zeplin
- **iOS Specific:** UIKit, Push Notifications (APNs), Deep Linking, Secure Keychain, Core Location

Professional Experience

React Native Engineer

Comcast | Aug 2024 – Present

At Comcast, I work on one of the company’s flagship streaming apps used by millions of subscribers. My primary responsibility is to design, develop, and optimize **cross platform features with React Native**, while taking ownership of key modules, especially on the **iOS side**, where native integration is critical.

- Led the end-to-end development of the **“Watch Offline”** functionality, allowing users to download and watch content without connectivity. This included managing local storage, handling encryption, and ensuring background download support leading to a **45% drop in support tickets** related to offline playback.
- Collaborated closely with native iOS engineers to **bridge custom Swift modules** into React Native, enabling advanced features like dynamic theming, custom media controls, and iOS native push notification handling.
- Worked on setting up and maintaining **Fastlane CI/CD pipelines** for iOS builds. This automated TestFlight uploads, versioning, and provisioning profile management, **reducing manual release efforts by 30%**.
- Routinely diagnosed and resolved **iOS specific performance issues** using tools like **Xcode Instruments** and **Flipper**, improving app responsiveness and launch times.
- Played a key role in sprint planning, grooming sessions, and peer code reviews, contributing to better collaboration, cleaner codebases, and timely releases.

Cross-Platform Mobile Developer (React Native + iOS)

Dev Rabbit IT Solutions | Jun 2021 – Dec 2023

At Dev Rabbit, I served as a cross-platform developer building applications for diverse industries including **fintech, health tech, and retail**. I was heavily involved in both greenfield projects and legacy modernization efforts.

- Designed and delivered 5+ cross platform mobile applications using React Native, with **40–50% of the projects requiring native iOS integration** through **Objective-C and Swift**.
- Took ownership of the **payment modules**, integrating Apple Pay and third party SDKs like Razorpay and Stripe on iOS, while ensuring PCI compliance and secure transaction flows.
- Worked directly with client side designers to implement **pixel perfect UI** based on Figma mockups, and ensured accessibility support for iOS via VoiceOver and Dynamic Type.
- Managed iOS provisioning profiles, signing certificates, and App Store submission for multiple apps, and led the release process using **Fastlane** and TestFlight for continuous delivery.
- Researched and integrated **iOS exclusive features** such as biometric login (Touch ID, Face ID), **Keychain** for secure storage, and **Core Location** APIs for GPS based services.

React Native Developer

Deloitte | Aug 2019 – Jun 2021

At Deloitte, I worked as part of an internal digital transformation team developing mobile solutions for HR, finance, and client engagement platforms used globally by Deloitte staff and clients.

- Developed and maintained enterprise mobile apps using **React Native**, collaborating with backend teams for REST API integrations and ensuring secure data exchange.
- Built complex forms, multi step workflows, and dynamic dashboards, improving user task completion rate by over 20%.
- Led the integration of **Apple Push Notification Service (APNs)** and handled deep linking for seamless in app navigation, especially for alerts and reminders.
- Wrote unit and integration tests using **Jest** and **Detox**, ensuring robust test coverage and faster QA cycles.
- Bridged **Swift based reusable components** into React Native to improve rendering speed and native feel on iOS, especially in performance critical areas like real time data dashboards.

Key Projects

iStream+ – OTT Mobile App

- **Stack:** React Native, Swift, Firebase, Redux, Fastlane
- Developed a feature rich media streaming app with personalized recommendations and download support.
- Integrated custom video player features via **Swift** to support background playback and offline streaming on iOS.

FinTrack – Personal Finance Tracker

- **Stack:** React Native, Firebase, Swift
- Built secure personal finance app with bank integration, spend analysis, and savings goals.
- Implemented **Secure Keychain storage** and **Touch ID/Face ID login** for enhanced iOS security.

HealthKart Clone – eCommerce App

- **Stack:** React Native, Node.js, TypeScript
- Created a shopping app clone with cart management, product filters, payment gateway, and iOS Apple Pay integration.
- Enhanced UX on iOS by implementing smooth transitions using **React Native Reanimated** and **native modules**.

Certifications

- **React Native Specialization**
- **iOS App Development with Swift 5**
- **Advanced React Native & Performance Optimization**
- **JavaScript Algorithms and Data Structures**

Education

Lamar University | Master of Science, Computer Science

Sathyabama Institute of Technology and Sciences | Bachelor of Engineering, Electronics and Communication
