

Yashwanth Sai
Sr Full Stack .NET Developer
Contact: +1 4695632375

Email: yashwanthcys@gmail.com

LinkedIn: <http://www.linkedin.com/in/fullstackdeveloper1>

Summary:

- Over 7+ years of professional expertise in client-server and web-based systems using various versions of Microsoft .NET Framework (2.0 to 4.6, .NET 5, .NET 6), C#, VB.NET, ASP.NET, ADO.NET, .NET WebServices, HTML, JavaScript, CSS, LINQ, AJAX, MVC, IIS, and JSON.
- Skilled in Agile and Waterfall development environments, including participation in SCRUM sessions, Test Driven Development (TDD), and Behavioural Driven Development (BDD).
- Experienced in designing, developing, and implementing data-driven desktop and web applications, both for clients and internal company use, covering Internet and Intranet applications.
- Direct experience creating and managing N-Tier systems with .NET Core, MVC, ASP.NET, VB.NET, ADO.NET, and SQL Server; proficient in C# 10.0 features, multithreading, and collections, using AJAX, LINQ, WCF, XML, and Web Services.
- Proficient with Razor view engine, MVVM design patterns, PRISM framework, ASP.NET MVC 3.0/4.0, and ASP.NET Web API for creating RESTful services, securing APIs with OAuth and JWT, and integrating both RESTful and SOAP protocols.
- I am proficient with ORM frameworks such as Entity Framework, ADO.NET, and Entity Framework Core, and experienced in handling XML and JSON data formats for efficient data exchange and storage.
- Practical experience with Azure Cloud services, including Azure API Management, Azure App Services, and configuring Azure Active Directory Authentication for securing web apps and REST APIs.
- Skilled in front-end programming using TypeScript, AngularJS, Angular 10+, HTML, CSS, JavaScript, Bootstrap, jQuery, and AJAX, with experience in front-end testing frameworks like Karma, Jasmine, Jest, Mocha, and Chai.
- Worked with databases such as SQL Server, PostgreSQL, and MongoDB, proficient in creating SQL Join Statements, Stored Procedures, Functions, Cursors, Packages, Database Triggers, and PL/SQL.
- Experienced with Azure DevOps CI/CD for continuous integration and deployment, proficient in testing frameworks such as XUnit and NUnit for .NET Core, using Postman, SOAP UI, and Swagger UI for webservice automation, and familiar with version control systems (Git, SVN, TFS) and code quality tools like SonarQube.

Technical Skills:

- **Languages:** C#.Net, ASP.NET, ASP.NET MVC, ASP.NET Core 3.1/3.0/2.0/1.0, .Net Core 3.1/3.0/2.0/1.0, .Net Framework 4.8/4.7/4.6/4.5, VB.Net, ADO.Net, Web API, LINQ, Web Services, Entity Framework.
- **Development Tools:** Xamarin Studio, Microsoft Visual Studio.NET, Visual Studio 2019/2017/2015, Visual Studio Code.
- **Web Development:** JavaScript, Angular JS, Angular 15/14/13/12/11/10/9/8/7/6/5/4/2, React Js, Node JS, JSON, AJAX, CSS, HTML, ASP.Net MVC, jQuery, HTML5, CSS3, ReSharper, Fiddler, SOAP UI, Postman.
- **Operating System:** Windows 10/8.1/7, Linux, MAC, Unix.
- **Database:** SQL Server 2008R2/2012/2014/2016,2017, Oracle 12c/11g/10g, DB2, Azure SQL.
- **Servers:** IIS 10, 8.5, 8, IIS Express, Windows Server.
- **Design Modeling:** OOPS, UML, MVC, Singleton, Session Façade, Singleton.
- **Version Control:** TFS, Azure DevOps, GIT, VSS, GitLab, Bitbucket,
- **Cloud Services:** Microsoft Azure and Amazon Web Services.
- **Services:** WCF, Web Services, Restful services, Web API, Microservices.
- **Reporting Tools:** JIRA, SSRS, SSIS, Crystal Reports, One Confluence.

Professional Experience:

Client: USAA, San Antonio, TX

Feb 2024 to Present

Role: Sr.Net Developer

Responsibilities:

- Responsible for analysis, design, implementation, management, and maintenance of full software development life cycle (SDLC) project.
- Created modules for Node.js server. Designed and built GUI screens using **ASP.NET (7/6/5) MVC5, C#.NET**, user controls, **JavaScript**, and data controls.
- Developed **SQL** and **T-SQL** stored procedures, functions, and triggers to fetch data from **MS SQL Server**, utilizing **LINQ** to SQL for database queries.

- Implemented Windows Presentation Foundation (**WPF**) components to create visually appealing and interactive GUI screens, enhancing the user experience.
- Collaborated with the **UI/UX** team to integrate modern design principles, leveraging **WPF** for seamless integration of rich visuals and animations.
- Utilized **XAML** to define the user interface and declaratively create **WPF** elements, leading to efficient **UI** development and customization.
- Employed data binding and **MVVM (Model-View-View Model)** architecture in conjunction with **WPF**, promoting clean separation of concerns and improved maintainability.
- Leveraged **Entity Framework 7.0** to create models and explored **REST API** tools. Employed NuGet package manager for updating browser controls.
- Played a key role in implementing features, enhancing code, and resolving bugs.
- Participated in UI design with Master Pages in **MVC 5**, enhancing layout using **HTML5, Bootstrap, Boots watch, and CSS**.
- Consumed **SOAP APIs** from enterprise customer systems and **RESTful APIs** from other applications and developed **W&C RESTful APIs**.
- Act within a cross-functional, scrum-based team focused on **agile** and continuous software delivery.
- Web development using **C#** within the integration project, assist in the transition from **AngularJS** to **Angular15** for the integration project and worked on designing templates.
- Proficiency in UI development with an **Angular Single Page Application (SPA)**.
- Develop UI Pages and Layouts by using **HTML5, CSS3, and jQuery, JavaScript, Typescript, Bootstrap and Material UI**.
- Strong technical and platform knowledge, in the areas of **.Net core 7.0** and **C#** to support as well as design, develop and deploy requested updates to new and existing cloud services.
- Developing **APIs** for Integration Project, Implemented and extensively used the Object-Oriented Programming concepts in **C#**, Solid principles.
- Experience with developing, implementing, monitoring, and troubleshooting the applications in the **Azure** cloud. Designing and implementing web services with security.
- Tying the applications for the Integration Project into the backend using **Azure Cosmos** and **MS SQL 2014** database.
- Responsible for checking cross browser compatibility, Responsive Web Design and hence worked on different browsers like **Safari, Firefox, Google Chrome, and Internet Explorer**.
- Used **GIT** for source code version control.
- Development of both unit testing and system testing scripts that will be incorporated into the **QA** process.
- Automating all deployment steps with infrastructure as code (**IAC**) and **Jenkins pipeline as code (JPAC)** concepts.
- Used **SonarQube** for verifying the code coverage and fixing vulnerabilities.
- Develop and implement innovative ideas for cross platform integrations involving multiple technology stacks for better software/application architecture.
- Collaborator and actively participating in resolving the dependencies across teams.

Environment: Agile, XML, SOAP, C#, .NET, ASP.NET, ASP.NET API, .Net Core 7.0, HTML, CSS, Angular15, JavaScript, jQuery, AJAX, Visual Studio 2022, RESTful, Entity Framework 7.0, JSON, Azure, IAM, Docker, Kubernetes, OAuth 2.0, SSRS, SSIS, SQL Server 2008 R2, SharePoint, Kafka, XUnit, Jasmine, Postman, CI/CD, Azure DevOps, GIT, JIRA, Bamboo, Microsoft WPF.

Client: Commonwealth of Kentucky - Frankfort, KY

Jan 2023 to Jan 2024

Role: .Net Developer

Responsibilities:

- Utilized .NET 5 to design and implement core application logic, APIs, and services.
- Developed robust and efficient code using C#, Created RESTful APIs and web services with ASP.NET Core.
- Build the frontend using Angular 12.0, with TypeScript for type safety and HTML5/CSS3 for structuring and styling.
- Use RxJS for handling asynchronous data streams and Bootstrap for responsive design.
- Integrate SignalR for real-time communication and WebRTC for peer-to-peer audio/video streaming.
- Implemented MVC architecture to separate business logic, user interface, and user input handling, enhancing maintainability and scalability of the application.
- Utilized Entity Framework Core for ORM to interact with SQL Server databases.
- Design and manage the database using SQL Server for relational data, MongoDB for NoSQL, and Azure Cosmos DB for distributed data.
- Developed and maintained RESTful APIs & Created the database and developed multiple T-SQL Procedures, Functions and SQL Queries.
- Configured and integrated Asterisk for VoIP signaling and media routing.
- Implement authentication and authorization using OAuth/OpenID Connect with IdentityServer.

- Ensured secure communication using HTTPS/TLS and JWT for API security, managing SSL certificates.
- Implemented Redis for caching frequently accessed data to improve application performance.
- Integrated Kafka for message brokering and managing asynchronous tasks.
- Containerized applications with Docker and managed them with Kubernetes for consistent environments, scalability, and reliability.
- Designed and managed XML configurations for call routing rules, user profiles, and system settings.
- Set up CI/CD pipelines in Azure DevOps for automated testing and deployment.
- Used Swagger to document RESTful APIs for enhanced maintainability and integration ease.
- Implemented xUnit for testing Angular components and services, alongside Postman and Selenium for thorough API and end-to-end testing, ensuring reliability and user satisfaction.
- Developed data integration solutions with SSIS for streamlined workflows and implemented SSRS for comprehensive reporting.
- Designed and implemented Service-Oriented Architecture (SOA) using WCF for efficient service communication.
- Implemented Microservices Architecture for backend services to ensure scalability and maintainability.
- Implemented serverless architecture for event-driven processes using Azure Functions and secured application secrets and managed certificates using Azure Key Vault.
- Used Azure AD for managing user identities and stored unstructured data like media files in Azure Blob Storage.
- Utilized JIRA for agile project management and integrating with Git for version control.

Environment: Angular 12.0, CSS, Bootstrap, HTML, WebRTC, SignalR, ASP.NET Core, Entity Framework Core, SQL Server, Asterisk, IdentityServer4, JWT, Redis, Kafka, Docker, Kubernetes, Apache, Azure DevOps, CI/CD pipelines, Swagger, xUnit, Postman, Selenium, SSIS, SSRS, WCF, WPF, Microservices, Azure AD, OAuth 2.0, OpenID Connect, Azure Blob Storage, Azure Functions, Azure Key Vault, Visual Studio Code, Git.

Client: Southwest Airlines - Dallas, TX

May 2022 – Dec 2023

Role: .Net Developer

Responsibilities:

- Web Design & Development of User Interfaces using ASP .NET, C#, XML, HTML. Middle Tier Business Component Development using C#.NET to incorporate business.
- Deploying ASP.Net Core web application using an Azure DevOps pipeline.
- Involved in migrating the data from SOA to RESTful services using ASP.NET Web API.
- Worked with SQL server database to save and retrieve the data.
- Implemented Cascading Style Sheet (CSS) to improve look and feel of the ASP.NET Web Page.
- Involved in writing Unit test cases for Business lawyers.
- Involved in the complete Software Development Life Cycle (SDLC) including Analysis, Design, Implementation, Testing and Maintenance using Agile Methodology.
- Involved in understanding user requirements, designing, and developing web applications and backend applications.
- Designed and developed front end using HTML, CSS, Angular Material and Angular 6.
- Actively involved in developing Web Application using Angular and supported components.
- Focused on developing reusable components such that application code is maintainable.
- Worked on Azure Web Jobs & Azure functions to perform asynchronous updates between our system and external APIs.
- Worked on creating CRUD API's using .NET Core. Design solutions for various system components using Microsoft Azure.
- Designed and developed the application using Angular 2, HTML, CSS, Bootstrap, JavaScript, jQuery, and NgRx.
- Worked with Microsoft Windows Azure includes a complete set of enterprise-ready data services, including Windows Azure Storage and SQL Databases. Used Angular UI Router for routing pages.
- Interacted with the client end-users during requirements gathering sessions.
- Used GIT for version control, bug tracking & fixing and configuration management.
- Performed Unit Testing (using N-Unit) and involved in Debugging & Supporting the application.

Environment: Agile, Scrum, .NET Framework, C#, ASP.NET Web API, Web API, Jenkins, Entity Framework, Visual Studio, MongoDB, SQL Server, JavaScript, JQuery, Angular 2/4, Typescript, Angular CLI, Angular Material, HTML, CSS, jQuery, MS Azure, SQL Azure, Azure DevOps, Windows, IIS, SQL Server, NUnit, Jira.

Client: Aditya Birla Insurance - India

Oct 2019 to Nov 2021

Role: .Net Developer

Responsibilities:

- Involved in SDLC from requirements to deployment, participating in Functional Testing, UAT, and stress testing to ensure system robustness and requirement adherence.
- Developed data-driven web applications using ASP.NET Web Forms and ASP.NET MVC, implementing CRUD operations and separating data, presentation, and business logic for scalability in VB.NET.

- Implemented SOAP web services for seamless component communication and data exchange and utilized caching in VB.NET for faster web page loading.
- Employed ADO.NET (Data Adapter, Data Reader, Dataset, Data Table) and XML for efficient data retrieval, manipulation, and configuration from SQL Server and XML files, displaying configurable data in front-end GUI.
- Designed intuitive ASP.NET UI elements using HTML, CSS, JavaScript, jQuery, Ajax, Kendo UI, and Knockout JS, enhancing user experience with Bootstrap for responsive design.
- Played a key role in AngularJS front-end development, crafting reusable components and ensuring compatibility across pages and frameworks.
- Worked extensively with SQL Server databases, writing complex queries, optimizing database performance, and managing data retrieval and storage for scalable applications.
- Managed code integration, maintenance, and security using Team Foundation Server (TFS), and deployed applications on Microsoft IIS for seamless accessibility and availability.

Environment: C#, VB.NET, ASP.NET, Web Form, ADO.NET, XML, Knockout JS, Kendo UI, Bootstrap, SOAP, .Net Identity, SQL Server, HTML, CSS, JavaScript.

Client: Tech Ahead, India,

Aug 2017 to Oct 2019

Role: .Net Developer

Responsibilities:

- Analysis of the specifications provided by the clients.
- Involved in requirement gathering, functional and technical specification.
- Used **N-tier** architecture for the **presentation layer, Business** and **Data Access Layers** using **C#**.
- Coding and debugging using **ASP.NET** and **C#**.
- Designed search results control to pull data from database and display in **Data Grid**
- Developed web forms using **ASP.NET** server controls and validated client side using **JavaScript**.
- Writing Database routines, stored procedures and fixing up standard specifications.
- Communication and collaboration, functioning software, and the flexibility to adapt to emerging business realities.
- Used a hybrid of waterfall and incremental model as the **SDLC**.

Environment: Visual Studio 2008, ASP.NET 2.0, JavaScript, IIS 6.0, Windows 2000 XP. NET Framework 4.0/3.5, C#.NET, ASP.NET, SQL Server 2008, CSS, XML, HTML.

Education:

- B. Tech in CS JNTU, 2018
