

Yongchun (Ryan) Chen

(213) 706-5183 | Los Angeles, CA | yongchun@usc.edu | [linkedin.com/in/yongchun-chen](https://www.linkedin.com/in/yongchun-chen)

Technical Skills

Programming: Java, Python, JavaScript/TypeScript, and relevant libraries/frameworks.
Development: Spring Boot, Tomcat, Spark, Kafka, Jenkins, Docker, Git, Jupyter, Maven, Gradle.
Data and Cloud Services: MySQL, MongoDB, MSSQL, Firebase, Hadoop, Redis, AWS, GCP.

Work Experience

Art Sphere, Inc. Philadelphia, PA
Web Developer 12/2023 - Present

- Contributed to the development of a cross-platform mobile application, achieving widespread adoption by over 10,000 volunteers and demonstrating significant impact and user engagement.
- Led a 5 developers team focusing on the frontend, significantly improving the **UI/UX** design and interactivity, introducing critical features such as onboarding, volunteer hour tracking, and profile updates using **React Native**.
- Enhanced backend development by implementing **gRPC** for efficient, high-performance API communication across 10+ microservices, ensuring rigorous API documentation and robust implementation with **Java**. This integration facilitated seamless, bidirectional data exchange, and improved system throughput by 30%.

Mercury Systems, Inc. Princeton, NJ
Full-Stack Software Engineer 05/2023 - 09/2023

- Spearheaded the design and deployment of a web-based auction platform, utilizing **Java Spring** to enhance backend functionality and **React.js** for an intuitive frontend experience. Contributed to integrating **Hibernate** for advanced data management, which facilitated a seamless user transaction flow and supported a 20% increase in user engagement within the first three months post-launch.
- Initiated auction feature-rich **RESTful APIs** using **Spring MVC**, optimizing performance via multithreading to accommodate high volumes of simultaneous user requests effectively.
- Designed an intuitive and responsive user interface for the auction platform using React.js and **Ant Design**, emphasizing user-friendliness and accessibility. It was evidenced by a 25% increase in user satisfaction and retention.
- Secured **MySQL** database operations and security protocols with Hibernate and **Spring Security**, and proficiently managed **AWS** deployment, leveraging EC2 and RDS for scalable infrastructure.
- Launched the establishment of a **CI/CD** pipeline utilizing Jenkins and Docker, streamlining deployment processes and enhancing code integration and delivery efficiency.

SWS MU Fund Management Co., Ltd Shanghai, China
Software Engineer Intern 04/2021 - 08/2021

- Engineered an innovative **React.js** and **Java Spring** framework-based tool for efficient financial document management, boosting process efficiency by 20%. The tool was embraced by 100+ users internally.
- Revitalized the company's data handling infrastructure by transitioning from JDBC legacy to **Java Hibernate** with **MySQL**, which slashed data processing time by 30%, markedly bolstering system resilience and user trust.
- Lifted the usability and engagement of an automated financial data reporting tool using **Python Django**, reducing report generation time by 40%, thereby empowering business line teams with timely insights for strategic planning.

Additional Experience

Project: Social Trend Monitor 01/2024

- Developed a basic real-time alert and analyzing system for monitoring specific keywords on social media platforms. Utilized **Kafka** to stream tweets or posts containing these keywords in real time.
- Implemented **Redis** to cache recent keyword occurrences and their counts, allowing for quick access and analysis of the most discussed topics in a given timeframe.
- Developed an interactive dashboard using **D3.js** to dynamically represent keyword trends over time, showcasing expertise in real-time data visualization and effective caching strategies.

Education

Master of Science in Spatial Data Science | University of Southern California | Los Angeles, CA 05/2023
Bachelor of Engineering in Remote Sensing Science | Chengdu University of Technology | Chengdu, China 06/2021
