PROFESSIONAL SUMMARY

Experienced Senior Full-Stack Developer with 8+ years of experience delivering scalable, high-performance applications across HealthTech, FinTech, and Enterprise SaaS industries. Specialized in Node.js/Express and React.js with TypeScript, building robust RESTful APIs, microservices, and seamless front-end integrations using Next.js, Vue.js, and Angular. Skilled in backend technologies including Python/Django, Java/Spring Boot, C#/.NET Core, PHP/Laravel, Go, and Ruby on Rails. Proficient in AWS, GCP, Docker, Kubernetes, and CI/CD pipelines, ensuring secure, efficient, and reliable software delivery.

PROFESSIONAL EXPERIENCE

Goji Labs

Mar 2023 - Jul 2025

Senior Full Stack Developer

San Francisco, CA

- Led backend architecture and API development for Huupe, the world's first smart basketball hoop, using Node.js, Express, and MongoDB, handling 10K+ real-time events/day and improving data reliability by 99%.
- Integrated React.js, Next.js, and TypeScript for real-time gameplay dashboards, reducing latency by 35% and enhancing UX consistency.
- Delivered "UBYou" Health & Wellness platform with Django and React.js, implementing AI-driven personalization that boosted daily engagement by 40%.
- Built scalable microservices with Java Spring Boot integrated with Angular applications for TGS EdTech, delivering a fast and reliable experience to 100K+ users with 99.9% uptime.
- Designed CI/CD workflows using Docker, AWS ECS, and GitHub Actions, cutting deployment time from 3 weeks to 5 days.
- Created internal admin dashboards and analytics tools with MERN stack, reducing client reporting time from 2 weeks to 3 days.
- Collaborated with founders and PMs to translate ideas into production-grade systems that contributed to \$50M+ in client funding.
- Mentored 4+ junior developers, introducing code review and branching standards that improved code stability by 25%.

Orangesoft

Apr 2021 - Jan 2023

Full-Stack Developer

Remote

- Engineered Jelikalite project, a clinical health app integrating Bluetooth wearables using Node.js and React.js, improving patient adherence by 25%.
- Built C#/ASP.NET + Angular.js trial automation system, reducing patient onboarding time from 3 days to 6 hours.
- Designed and maintained RESTful APIs in Node.js and Python/Django, improving data sync performance by 40%.
- Migrated monolithic systems to microservices architecture using Docker and Kubernetes on GCP, reducing downtime by 50%.
- Built admin dashboards with React.js and TypeScript, improving internal operations and reducing manual work such as reporting and project planning by 40%.
- Worked with data scientists to add AI-powered predictive analytics and enabled proactive treatment alerts that reduced health incidents by 25%.
- Introduced Git flow and documentation standards that reduced onboarding time for new engineers by 30%.
- Partnered with QA and DevOps teams to implement CI/CD pipelines, ensuring consistent test coverage and automated deployments.

Imaginovation

Jul 2020 - Mar 2021

Full-Stack Developer

Remote

- Engineered MagicTask, an enterprise task management system using Node.js, Express, and MongoDB, supporting 10K+ concurrent users with a 30% faster task operation rate.
- Built internal automation tools with Django and PostgreSQL, cutting manual processes by 50% and improving reporting accuracy.
- Optimized APIs and database queries through caching strategies, reducing response times by up to 35% across core services.
- Deployed scalable infrastructure on AWS EC2 and S3, achieving 99.9% uptime and improved CI/CD reliability.
- Assisted in deploying Django projects to AWS EC2 and S3, ensuring high availability (99.9%) and scalable infrastructure.
- Partnered with frontend teams to integrate React.js and Django templates, accelerating release cycles by 20% and increasing user engagement by 25% through responsive UI improvements.

Upwork | Freelance Full-Stack Developer

Feb 2017 - Jun 2020

Full-Stack Developer

Remote

- Delivered 10+ full-stack web and mobile projects for individual clients across industries such as e-commerce, real estate, and healthcare, earning a 98% client satisfaction rate.
- Developed custom CMS and business portals using PHP/Laravel and Ruby on Rails, improving client operational efficiency by up to 40%.
- Implemented secure, high-performance backends with Django and MySQL, optimizing data flow and reducing load times by 25–30%.

- Collaborated closely with non-technical clients to translate business ideas into functional systems, ensuring on-time delivery of 95% of projects and repeat client engagements.

TECHNICAL SKILLS

- **Backend:** Node.js (Express), Python (Django/Flask), Java (Spring Boot), C# (.NET Core), PHP (Laravel), Go, Ruby on Rails
- **Frontend & Mobile:** React.js, Next.js, Vue.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Jenkins, Nginx
- **Database & Storage:** PostgreSQL, MySQL, MongoDB, Redis
- **Tools & Collaboration:** Git, GitHub, Jira, Agile/Scrum

EDUCATION

University of Texas At Austin - Austin, TX

Bachelor's Degree, Computer Science

Aug 2016 - May 2020
