 Streamwood, Illinois

TECHNICAL SKILLS

Backend

Python · Django · Flask · Fast API ·

Node.js · Nest.js

Frontend

JavaScript · React.js · TypeScript ·

Next.js · HTML · CSS

Databases, Clouds & DevOps

MySQL · NoSQL · PostgreSQL · GraphQL ·

MongoDB · AWS · GCP · Oracle · Jenkins ·

GitLab CI/CD · CircleCI · Azure DevOps ·

Terraform · Docker · Kubernetes

Microservices & Tools

Jest · Mocha · RESTful APIs · Socket.io ·

Trello · Jira · Github

PROJECTS

Leverage Labs

<https://leveragelab.com/>

Engineered a data-driven marketing platform with Python & React, integrating advanced analytics to optimize audience segmentation and campaign outcomes.

Klar

<https://www.klar.mx/>

Developed a secure fintech platform using Python, Django and Javascript ensuring seamless payment processing, fraud detection, and enhanced UX.

Chips Loyalty

<https://help.iwantchips.com/>

Created a loyalty rewards system with Python (Django) on Backend, incorporating real-time data processing and personalized customer engagement features.

ZAYDEN KOLE

SENIOR FULL STACK PYTHON DEVELOPER

ABOUT

Result driven and solution-focused Senior Full Stack Python Developer with 7 years of expertise in designing, building, and optimizing web applications. Skilled in developing scalable backend systems and interactive front-end interfaces, with a strong focus on performance, maintainability, and best development practices. Adept at collaborating with cross-functional teams, leading projects, and delivering high-quality software solutions that drive business growth.

PROFESSIONAL EXPERIENCE

Senior Full Stack Python Developer

2022 - Present

Genix

- Managed a team of 6 developers working on Python, Django, and React, ensuring high-quality code, best practices, and timely delivery of features.
- Led the development of a high-traffic web application, improving system efficiency by 30% and user engagement by 25%.
- Designed and implemented backend services, improving scalability and reducing load times by 20%.
- Developed and maintained frontend components, ensuring a responsive & intuitive UI.
- Optimized database queries, enhancing performance and reducing response time.
- Implemented best practices for code maintainability, security, and deployment automation.
- Collaborated with designers and product teams to translate business requirements into technical solutions.
- Mentored junior developers, conducted code reviews, and led knowledge-sharing sessions.

Full Stack Developer

01/2019 - 08/2022

I&E LLC

- Built and deployed web applications, focusing on seamless integration between frontend and backend, resulting in 30% improvement in application speed.
- Designed and optimized APIs and data models to support dynamic content and real-time functionality.
- Refactored legacy codebases, improving performance and maintainability.
- Integrated third-party services, optimizing workflows for smoother user interactions.
- Worked in an agile environment, collaborating closely with stakeholders to meet project goals.

Backend Developer

02/2018 - 01/2019

Remote Base

- Developed key features for a business management system, enhancing usability and efficiency.
- Assisted in database design and query optimization to support large-scale data operations.
- Created reusable components and libraries to streamline development processes.
- Contributed to system architecture discussions and helped refine technical strategies.
- Participated in debugging, troubleshooting, and performance tuning activities.
