EXPERIENCE

WELLS FARGO, San Antonio, Texas

Technology Business Systems Consultant - Wells Fargo, 2012 – Current

Lead projects that involved analyzing and resolving business and technical problems for Wells Fargo internal and third-party hosted Black Knight applications across Consumer Lending/Finance Technology from assessment to execution. Responsible for enterprise-wide strategic change initiatives focused on optimizing processes, procedures, and operational platforms.

- Implemented modernized security/technical solutions utilizing Agile/Waterfall methodologies on internal and external application across cross functional teams.
- Directed enterprise-wide infrastructure projects, including cloud migrations, network upgrades, and data center consolidation achieving improved performance and cost savings.
- Led infrastructure upgrades for servers and storage, reducing operational costs and enhancing efficiency.
- Extensive experience writing business requirements, ensuring they are clear, comprehensive, and align with stakeholders needs. Translating complex business processes into detailed documentation to guide development.
- Oversaw projects in the PMO including business, IT, audit & compliance, and strategic initiatives.
- Research, analyze/document current PMO practices and help define opportunities for improvement and maturity.
- Understands business process flow improvements and work with technical teams to plan, create, document, and implement automated technical solutions for cost efficiencies.
- Conducts system integration testing to ensure interfaces between system components meet technical requirements.
- Works closely with Systems Architects to identify cost-effective technical solutions and provides recommendations to technical leadership and business stakeholders.
- Partner with vendors and 3rd-party management teams to ensure application risk assessments are completed and gaps are remediated by compliance deadlines.
- Vendor management to include SOW, vendor selection, vendor metrics and vendor oversight to include invoice management.
- Implemented client-facing projects that increase back-office productivity.
- Managed consumer default portfolio objectives to establish common, cross organizational target state models to drive end to end service delivery redesign, resulting in greater efficiencies and reduction in resource capacity plans.
- Orchestrated VendorScape database modernization migration that eliminated 3rd party hosted critical data and \$2 million cost avoidance.
- Responsible for overseeing a multi-year enterprise-wide program to deliver data modernization cloud standards across processes, procedures, and technology platforms to National Institute of Standards and Technology (NIST) standards.

Senior Systems QA Analyst – Wells Fargo, 2010-2012

Completed testing activities for assigned projects that included initiation, creation, planning, execution, and validation of complex test data scripts and defect management for User Accepted Testing (UAT).

- Utilized HP Quality Center as a test repository for test case documentation, requirement traceability, and defect reporting.
- Developed complex SQL queries to perform backend data integrity testing.
- Assigned Test Lead on high impact projects to include Wells Fargo client loan consolidation, 6-Day MSP batch cycle (MSP client 512), Servicemembers Civil Relief Act (SCRA) workstation.
- Worked extensively with vendors, development, and project teams through the defect management process.

Manager – Wells Fargo, 2009 – 2010

Managed 12 team members. Planned, scheduled, and assigned work tasks and collaborated with internal and external stakeholders during all phases of project development / implementations.

- Consistently met department objectives (productivity, quality, and customer service) for Home Affordable Modification program (HAMP) and Managed Asset Portfolios (MAP) initiatives.
- Analyzed productivity statistics of auditors, prepared reports and documentation related to department activities.
- Planned, coordinated, and facilitated training, workshops, and staff development. Provided continuous coaching and mentoring that ensured ability of team to exceed expectations.
- Implemented Wells Fargo and Government policies and procedures related to HAMP/MAP compliance.
- Mitigated risk by creating ad-hoc reporting to identify control gaps in processes.

Business Systems Analyst – World Savings/Wachovia, 2008 – 2008

Identified, researched, and resolved technical issues; tracked and monitored problems to ensure timely resolution.

- Managed hardware/software enhancement projects used for identifying and capturing business requirements.
- Project Manager for implementation of new products, services, processes and applications.
- Developed and implemented SQL server platform used for migration from World Savings to Wachovia standards.
- Performed comprehensive data analysis and developed/presented recommendations to senior management on software enhancements.

Manager – Final Documentation/Post Closing – World Savings, 2004 – 2008

Analyzed productivity statistics of auditors, prepared reports, audit controls and prepared documentation related to department activities.

- Audited the exception process to ensure mortgage loan documents and trailing documents complied with mortgage and investor guidelines.
- Evaluated and made recommendations to automate business process.
- Ensured the efficiency of business operations, functional internal controls, created and implemented changes or improvements when necessary.

BUSINESS PROJECT MANAGER – USAA FEDERAL SAVINGS BANK (1999 – 2002)

- Directed up to 25 team members as Project Manager for several major projects involving E-Commerce. Successfully transferred business plans into executable project plans within parameters of the Business Project Management Process (BPMP). Used a variety of tools that included MS Project, Project Tracker, and Microsoft Office (Word, Excel, and Access). Partner with vendors and 3rd-party management teams to ensure application risk assessments are completed and gaps are remediated by compliance or SHRP deadlines.
- Vendor management to include SOW, vendor selection, vendor metrics and vendor oversight to include invoice management.
