OBJECTIVE

Salesforce Developer with 5+ years of experience designing scalable Salesforce solutions using Apex, Visualforce, Lightning Components, and REST/SOAP APIs. Proven ability to lead technical development, mentor junior team members, and integrate Salesforce with external systems to support mission-critical business functions.

PROFILE SUMMARY

Results-driven Salesforce Developer with 5+ years of experience in Salesforce CRM, specializing in Apex, Lightning Web Components (LWC), Visualforce, SOQL, and external system integrations. Expertise in Salesforce Flow, Process Builder, CRM Analytics, and cloud security.

- 5+ years of experience in Salesforce Marketing Cloud, designing automation workflows and creating dynamic content for personalized campaigns.
- Developed custom Salesforce applications using Apex, Visualforce, and Lightning Components; expertise in Sales Cloud automation, flows, and approval processes.
- Skilled in integrating Salesforce with third-party systems via REST/SOAP APIs, maintaining data consistency across platforms.
- Proficient in ALM processes, version control, CI/CD using Git, Copado, and Jenkins; passionate about scalable architecture and maintainable solutions.
- Integrated Salesforce Marketing Cloud with CRM and external systems using REST/SOAP APIs, SQL, and SSJS for seamless data flow.
- Expertise in SDLC, requirement gathering, design, implementation, and enhancement, with a focus on mobile-responsive and accessible front-end solutions using SLDS, Aura, and LWC.
- Strong in declarative customization, data model design, security settings, reports, and dashboards.
- Experienced in Test-Driven Development (TDD) with modern CI/CD pipelines (Copado, GitHub, Jenkins).
- Strong background in Salesforce Service Cloud, Sales Cloud, Community Cloud, and Marketing Cloud (Email Studio, Journey Builder, Automation Studio).
- Familiar with Apttus CPQ, FinancialForce ERP, and Quote-to-Cash implementations.

EDUCATION

Masters in Computer Science

University of Central Missouri

TECHNICAL SKILLS

- **Salesforce Platform:** Apex, SOQL, SOSL, Visualforce, **Lightning Web Components (LWC)**, Triggers, Batch Apex, **Salesforce Flow**, Process Builder, Validation Rules, **Lightning App Builder**, Lightning Experience, Einstein Activity Capture, Salesforce Lightning Design System (SLDS), Salesforce Shield, Sharing Rules, Permission Sets, Apex Asynchronous Processing, UML Diagrams, Financial Services Cloud (FSC).
Salesforce Platform Limits, Code Optimization
- **Programming Languages:** Python, JavaScript, HTML, CSS, Java, C#, jQuery
- **Force.com Tools:** Apex API, Apex Data Loader, Force.com Explorer, Migration Tool, Excel Connector, Workbench, **Eclipse IDE**, Lightning Component Framework, **ETL Tools** (Apex Data Loader, Workbench)
- **Integration & Customization:** Workflows, Approvals, Field Updates, Outbound/Inbound Messages, Reports & Dashboards, Custom Objects, Custom Settings, Custom Labels, Tabs, Email Services, Security Controls, Sandbox Environment, Custom Applications, **Account Management**, **Contact Management**, **Pipeline Management**, Process Modeling Tools & Best Practices, **Cross-functional Collaboration**, Custom Web Services, Connected Apps, Custom Web Services, Connected Apps.
- **Salesforce Ecosystem Tools:** **Salesforce Marketing Cloud** (Email Studio, Journey Builder, Mobile Studio, Automation Studio), Advertising Studio, CDPs, **Commerce Cloud**, **Tableau CRM (CRM Analytics)**, **Salesforce D2C**, Pardot
- **DevOps & CI/CD:** Jenkins, Git, GitHub, Bitbucket, Copado, **Salesforce DX (SFDX)**, VS Code, ANT, Salesforce Metadata API, Change Sets, GitHub Actions, Change Sets, TDD (Test-Driven Development)
- **Monitoring & Logging:** Splunk, SignalFX
- **Databases & Data Modeling:** SQL, SOQL, SOSL, BigQuery, MySQL, MariaDB, Postgres, Oracle, Schema Builder, Data Modeling & Schema Design, Debug Logs, Flow Errors, SOQL Monitoring
- **Salesforce Features:** Managed Packages, OAuth2, Apex Future Calls, Caching, Outlook Integration, Open CTI • **Customer Success Platforms:** Gainsight (basic experience), Vitals (familiarity), Salesforce CSM use cases Customer Engagement & Support Tools: Salesloft, TalkDesk, Gong, Zendesk, Freshdesk.
- **Web Services / APIs:** REST API, SOAP API
- **Web Technologies:** HTML, CSS, JavaScript, AJAX, XML, JSP, JDBC, SSJS (Server-Side JavaScript), SQL, JSON, REST APIs, SOAP APIs
- **Version Control & Issue Tracking:** GitHub, Bitbucket, CVS, JIRA
- **Tools & Development Practices:** Data Loader, Workbench, Tableau, DocuSign, Cirrus Insight, OwnBackup, Security Testing, Profiling Tools, Documentation, Functional & Technical Design, Unit Testing, Mentoring, Customer Interaction, Agile Methodology

PROFESSIONAL EXPERIENCE

Salesforce Admin / Developer

Cardinal Health, Topeka, Kansas, USA — Jul 2024 – Present

- Designed and deployed Salesforce Service Cloud and Sales Cloud solutions using LWC, Apex, and REST/SOAP APIs. Automated business processes with Salesforce Flow, Process Builder, and custom integrations, optimizing cloud system performance and data security.
- Developed Apex Triggers, Classes, and Visualforce pages for Lead, Opportunity, and Account management in Sales Cloud, enhancing user experience with custom integrations.
- Integrated Salesforce with third-party platforms through REST/SOAP APIs, ensuring secure and consistent data flow. Led code reviews, mentored junior developers, and managed ALM processes using Git and Copado.
- Customized Salesforce functionalities, including Flows, Workflow Rules, and Process Builders to automate service workflows, improving case handling efficiency.
- Developed Aura and LWC components using JavaScript to enhance dynamic UI behavior and user experience on Salesforce Lightning pages.
- Led data migration from legacy systems into Salesforce Service Cloud, ensuring data integrity and consistency across environments.
- Collaborated with cross-functional teams to gather business and technical requirements, aligning solutions with stakeholder needs.
- Partnered with Product and UX teams to design scalable CRM workflows and custom Salesforce solutions, applying data modeling principles for optimization.
- Designed UML diagrams to illustrate system design and integration flow between Salesforce and external systems.
- Ensured compliance with Salesforce coding standards and security protocols, performing unit tests and validation for data accuracy and system stability post-migration.
- Documented system configurations, migration plans, and technical processes for ongoing support and knowledge transfer.
- Delivered end-to-end Salesforce solutions (design, build, test, documentation, deployment) aligned with SDLC best practices. Collaborated with stakeholders to design integration strategies and proof of concept solutions.
- Built end-to-end integrations using Apex, REST/SOAP APIs, and custom objects, producing functional/technical documentation, training guides, and troubleshooting performance issues.
- Participated in Lightning implementation using Lightning App Builder and built Salesforce solutions for enrollment with LWC and Apex.
- Developed multi-step campaigns using Marketing Cloud Journey Builder and Email Studio, creating dynamic content and personalization logic to optimize customer engagement.
- Designed automation strategies with Automation Studio and SQL queries for campaign scheduling, triggered sends, and lifecycle journeys.

- Deployed code using Jenkins, Copado, and ANT scripts, following DevOps best practices with SFDX CLI for deployment automation and version control.
- Conducted technical code reviews, enforced development standards, and used Splunk for monitoring application logs to minimize system downtime.
- Wrote batch jobs, created analytic snapshots, and worked extensively with Visualforce and COPADO for back-promotion integration with FinancialForce ERP.
- Defined master-detail relationships, created record types, and set up RESTful integrations while working in VS Code and writing SOQL/SOSL queries.
- Translated functional requirements into technical specifications, collaborating with stakeholders to define clear deliverables and success metrics for Salesforce solutions, Proposed improvements to Salesforce processes, incorporating new features like Salesforce Flow, LWC, and Apex to enhance system efficiency, Created and maintained Salesforce documentation, detailing technical configurations, customizations, and troubleshooting procedures.

Salesforce Developer-XPO, Inc. - Kansas City, Kansas, USA

Nov 2023 – Jun 2024

- Integrated Salesforce with external systems using REST/SOAP APIs, MuleSoft, and Zapier. Led integration projects, improving operational workflows and automating key processes across platforms. Ensured data security and integrity in cloud-based integrations.
- Developed Aura components with Events, Handlers, Attributes.
- Implemented Web-to-Case, Email-to-Case.
- Worked in environments like SourceTree, MAVENS Mate, Sublime.
- Implemented OAuth 2.0 authentication and caching strategies for optimized Salesforce API performance. Managed Salesforce managed packages, including namespace handling and Apex extension updates. Integrated Salesforce with TalkDesk via Open CTI for real-time call logging and screen pops. Customized Service Cloud to sync with Zendesk for unified ticketing and case workflows. Familiar with Gainsight for customer lifecycle tracking, onboarding, and renewal management. Supported customer engagement automation with Salesloft-style campaign and activity tracking tools.
- Worked on Service Cloud and Sales Cloud using Enterprise Territory Management.
- Created Lightning Apps, communities, portals, dashboards.
- Developed custom Lightning UI for case management.
- Designed data mapping, transformation flows.
- Migrated large datasets using Data Loader.
- Created VF email templates, reports, dashboards.
- Hands-on experience with CI/CD using Salesforce DX, GitHub, Heroku Pipelines, Jenkins, and Copado; applied DevOps automation across multiple orgs
- Delivered enhancements in Agile sprints; followed Agile best practices including daily stand-ups, sprint planning, reviews, and retrospectives.

- Provided post-deployment support and feature enhancements in Salesforce, working closely with Sales and Marketing to adapt functionality to business changes.

Salesforce Developer-Diabsolut - Bangalore, India

Jul 2021 – Jul 2023

- Configured geocoding and route tracking in Salesforce Field Service.
- Managed user profiles, permissions, and technician assignments.
- Created templates and custom layouts for scheduling.
- Automated work orders using Flows and Process Builder.
- Built dashboards and reports for field operations KPIs.
- Customized Sales Cloud objects, implemented team-based access.
- Built secure interfaces using App Builder and component actions.
- Built responsive components using jQuery and AJAX to enhance interactivity across Visualforce pages and Lightning interfaces.
- Managed records using Salesforce Chatter.
- Created Workflow, Approval Rules, Tasks, Alerts.
- Implemented Apttus Upgrades from AppExchange.
- Built Apex Classes, VF pages using VS Code, Notepad++, Sublime.
- Debugged and resolved production issues in Salesforce Service Cloud, working closely with stakeholders to ensure business continuity.

Salesforce Admin-Bisleri - Mumbai, India

May 2019 – Jun 2021

- Migrated legacy data from Oracle DB to Salesforce using Apex Data Loader.
- Wrote SOQL/SOSL in Apex controllers, followed governor limits.
- Built Lightning pages using Lightning Design System.
- Wrote Apex test classes for deployment readiness.
- Implemented Sales Cloud, automated SFA: Campaigns, Leads, Opps.
- Developed rich UI with HTML5/CSS3 in Visualforce.
- Built cross-compatible VF pages for Classic and Lightning.
- Customized Apttus CPQ pricing, implemented packaging models.
- Built Apex triggers, classes, controllers, extensions.
- Configured Financial Cloud with workflows and validations.
- Migrated financial data and integrated ERP metrics.

CERTIFICATIONS

- **Salesforce Certified Administrator**
- **Salesforce Platform Developer I**
- Salesforce Certified App Builder
