- Replication
- Linux
- Docker
- Kubernetes
- GitHub
- Terraform
- Ansible
- Jenkins

PROFILE SUMMARY

A seasoned IT professional with 6 years of experience, I possess a deep understanding of MongoDB internals and a proven track record in implementing effective backup and recovery strategies, as well as database deployment and maintenance. Excelling in performance optimization and data integrity, my skill set includes performance tuning, backup strategies, and proactive monitoring. Transitioning to cloud services, I served as a Cloud Engineer on the AWS platform. Extensive experience with AWS services like EC2, S3, RDS, IAM, VPC, Autoscaling, Load balancer. Proficient in designing and deploying scalable, highly available cloud architectures.

WORK EXPERIENCE

Sigma Software Solutions PVT LTD

DEC 2020 - PRESENT

MongoDB Database Administrator

- Expertise in setting up MongoDB clusters in an AWS cloud environment.
- Implement security measures, including authentication and authorization, to protect the MongoDB environment.
- Plan and execute MongoDB version upgrades, applying patches and updates as needed.
- Implemented data backup and recovery strategies to protect against loss and corruption.
- Troubleshooting and fixing MongoDB issues.
- Implement effective indexing strategies and aggregation queries.
- Maintain comprehensive documentation for configurations, backups, and operational procedures.
- Install, configure, and deploy MongoDB servers and clusters.
- Monitor and optimize database performance using tools and indexing techniques.
- Set up and manage replication and sharding for fault tolerance and scalability.
- Keep MongoDB software updated and migrate data during upgrades.

Sigma Software Solutions PVT LTD

OCTO 2018 - NOV2020

Cloud Engineer

- Establishing connectivity to AWS Resources in another VPC in another region using AWS VPC Peering.
- Configured S3 buckets with various life cycle policies to archive the infrequently accessed data to Storage classes based on requirement.

EDUCATION

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY

- Master of Business Administration

YCM OPEN UNIVERSITY

- Bachelor of Arts

LANGUAGES

- English
- Hindi
- Marathi

- Designed highly available, cost effective and fault tolerant systems using multiple EC2 Instances, Auto Scaling .
- Launching Virtual Private Cloud (VPC), creating subnet in the VPC, launching EC2 instance, configuring and maintaining the routing table, Internet gateway, NAT gateway within the VPC .
- Create IAM user and attached them roles and policies.
- Take automatic snapshot of EBS , Volumes by lifecycle manager.
- Working on kubernetes objects like networking, Horizontal pod autoscaling , labels, Selectors, Init containers.

PROJECT DESCRIPTION

- Project Name: IOT (internet of things)
- Designation: NoSql Database Administrator
- Environment: Database Architecture with MongoDB Fine-tune configurations-MongoDB and servers for performance improvement.
- Work alongside project teams (analysts, developers, testers and implementation managers) during software release and patching.
- Install, deploy and manage MongoDB on physical and virtual machines . Create, configure and monitor large-scale, secure, MongoDB sharded cluster.
- Support MongoDB in a high availability ,multi-data center environment .
- Configure and monitor numerous MongoDB instances and replica sets .
- All database administration tasks like backup, restore.
