

SUMMARY: A seasoned IT professional with 20 years of experience delivering robust, scalable enterprise solutions using cutting-edge technologies including AI and Cloud. Adept at managing end-to-end application development and deployment, both on premises, cloud environments and hybrid

- Demonstrated expertise in distributed streaming technologies and large-scale application delivery, utilizing Kafka, Flink/Beam, and advanced caching platforms such as Redis and Apache Ignite
- Extensive experience in modernizing business applications with AI-driven solutions, leveraging advanced technologies like unified vector database to build ultra-low latency
- Strong grasp of diverse architectural styles and design patterns for optimal system performance
- Extensive domain knowledge across banking, telecommunications, FMCG, insurance, and business process automation

EDUCATION: Bachelor of Engineering (Electronics & Communications Engineering), Andhra University, India

CERTIFICATIONS & AWARDS:

- ✓ AWS Certified Solution Architect
- ✓ Java Certified Professional
- ✓ TIBCO® Certified Professional - EMS
- ✓ Implementation of Redis at Large Scale
- ✓ Redis as a Vector Database

TECHNICAL EXPERTISE:

Cloud: AWS, OCI, Azure, GCP

AI: Embedding Models, Redis Vector DB, QDrant

In-Memory: Tibco Active Spaces, Apache Ignite, Elasticsearch, Redis

DevOps: Jenkins, Terraform, Kubernetes, Docker, Maven, Gradle, Nexus, Git, Ansible, Helm charts

Monitoring: Prometheus, Grafana, custom Dashboards, Open Census

Databases: Oracle, **MySQL**, SQL Server, Postgres, MongoDB

AWS Services: EC2, S3, ECS, EKS, Lambda, SNS, ECR, AWS Connect, Lex

Middleware: Tibco Product Suite, Java, Spring Boot, Web services

Messaging and Streaming: Tibco EMS, Solace, Kafka, Apache Flink/Beam

Big Data: Redshift, Hadoop, Aurora DB, DynamoDB

Scripting Languages: JavaScript, Bash, Python

Ticketing Tools: JIRA, Confluence

EXPERIENCE:

[Hermitage InfoTech](#), **Solution Architect**, New Jersey, US

Mar 2025 – current

- ✓ Working for a healthcare client on migrating existing CI/CD deployments platform to Git Ops based deployment

Technology Stack : Jenkins, Octopus, ArgoCD, GitHub Actions, Dev Ops, AWS

[Synechron Technologies](#), **Solution Architect**

Nov 2020 – Feb 2025

- ✓ The Real-Time Streaming (RTS) project focuses on delivering real-time events across the enterprise by leveraging robust and resilient solutions. It utilizes Kafka for streaming, Redis/Ignite for caching, and OpenShift (OCP) as the deployment platform for containerized applications.
- ✓ Automated deployments by building CI/CD pipelines using Jenkins, Ansible, ArgoCD, and Helm
- ✓ Designed and architected a robust Kafka Active-Active (A-A) platform to ensure high availability and fault tolerance
- ✓ Built an enterprise-wide caching platform using Apache Ignite to achieve sub-millisecond latency.
- ✓ Implemented an enterprise-grade monitoring platform leveraging Prometheus, Grafana, and the ELK stack for comprehensive observability and real-time insights.
- ✓ Migrated VMware Infra to the OCI cloud platform, ensuring improved scalability and performance
- ✓ Played a key role in modernizing critical applications such as ENBD-X and Assisted-X by integrating AI-driven deep search capabilities
- ✓ Developed Kafka connectors and implemented Apache Flink/Beam jobs for data enrichment, transformation, and seamless integration with downstream and upstream applications

Technology Stack

: AWS, Apache Ignite, Kubernetes, Ansible, Jenkins, Redis OSS & Enterprise, Kafka, Flink, OpenShift, Jenkins, Helm, ArgoCD

BDFInfoSec, Cloud Architect, UK**Jul 2019 – Jun 2020**

- ✓ Build a cloud-native solution - Lex Chat Bot Booking Appointment Solution
- ✓ Created AWS CloudFormation templates to provision and manage the cloud environment efficiently
- ✓ Developed code for DynamoDB and utilized DynamoDB Streams to trigger AWS Lambda functions for real-time data processing
- ✓ Played an integral role in setting up a comprehensive test bed for end-to-end testing
- ✓ Developed and implemented comprehensive cloud migration strategies

Technology Stack : Amazon Connect, Lex, AWS SSML, Lambda, SNS, Dynamo DB, EKS

Jio, Reliance, Solution Architect, Mumbai, India**Dec 2015 – Jan 2019**

- ✓ Designed and developed a high-performance in-memory distributed solution using TIBCO ActiveSpaces to support a 500-million-customer base
- ✓ Spearheaded enterprise-wide open-source initiatives, including the seamless migration of the caching platform from TIBCO ActiveSpaces to Apache Ignite
- ✓ Delivered one of the world's largest and most complex implementations of TIBCO ActiveSpaces and Apache Ignite
- ✓ Architected and deployed resilient, redundant Active-Active cluster solutions across primary and secondary data centers, ensuring high availability and the ability to handle large-scale, high-volume workloads

Technology Stack : Tibco Active spaces, Apache Ignite, REDIS, Dynamo DB, Java

Tibco Software, Solution Architect, Mumbai, India**Nov 2009 – Oct 2015**

- ✓ Delivered solutions using the TIBCO suite of products, including TIBCO BW, BE, EMS, AS, and TIBCO AMX Service Grid.
- ✓ Specialized in developing and optimizing the integration layer for seamless connectivity across systems.
- ✓ Designed and implemented SOA-based services for large-scale applications, ensuring smooth integration with clients' core systems.
- ✓ Conducted corporate training sessions on TIBCO technologies such as EMS and AS, enhancing team expertise.
- ✓ Established coding standards and design guidelines for TIBCO AMX Service Grid to ensure consistency and maintainability.

Technology Stack : Java, AMX 3.2, TIBCO BW 5.8, EMS, Tibco AMX SG, TIBCO BW, ADB Adapters, Tibco Business Connect

Liberty Mutual, Consultant, Indianapolis, US**Sep 2008 – May 2009**

- ✓ Contributed to the replacement of the existing Commercial Lines system with ECLPS, ensuring improved functionality and scalability.
- ✓ Played a key role in developing the Vehicle Insurance module, a critical component of the system.
- ✓ Utilized IBM WebSphere as the middleware layer and leveraged Java Core APIs for seamless integration and efficient processing

Technology Stack : Java, IBM WebSphere 7.0, Oracle 9i

Citibank, Technical Architect, Bangalore, India**Apr 2000 – Aug 2008**

- ✓ Worked on banking projects, building the solution end-to-end with Java technologies.
- ✓ Migrated the single-tier banking application to an n-tier application with Struts as the Front-end layer, WebLogic as the middle tier, and Oracle as the backend.
- ✓ Collaborated with the Architecture team on various initiatives, gaining in-depth insights into their models and proposing tailored solution architectures

Technology Stack : Tibco EMS, Java, WebLogic 8.1, Web Sphere 5.0, JMS, Oracle, Equation, Vision Plus

Additional Experience

- **Adesta** – Lead Engineer (1999-2000): Worked on building an on-line shopping store using Microsoft suite
- **CIC** – Software Engineer (1998-1999): Performed Y2K code compliance and reusable utility creation, Sydney, Australia
- **IMR**, Software Engineer (1997-1998), Performed Y2K Migration, Bangalore, India
