SUMMARY

- Strategic and detail-driven **UX/UI Designer** with over **5+ years** of cross-functional experience in designing intuitive interfaces, orchestrating human-centered experiences, and authoring high-impact technical content across AI, Cloud, SaaS, and e-commerce domains. Adept at converting abstract requirements into scalable design systems, customer-centric user journeys, and actionable documentation that drives product clarity, adoption, and satisfaction.
- Proven expertise in crafting end-to-end design ecosystems—from journey mapping and wireframing to usability testing and stakeholder walkthroughs—using tools like Figma, ProtoPie, Storybook, Confluence, and Miro. Demonstrated success in enhancing CSAT, reducing onboarding friction, and aligning UX workflows to Agile development lifecycles through collaboration with engineering, product, QA, and CX teams.
- Experienced in applying WCAG 2.1 accessibility standards, architecting design systems using atomic design principles, and managing sprint-aligned design delivery in Scrum-based environments. Adept at translating complex technical domains (e.g., Azure Cloud Adoption, AI Business Transformation) into clear, user-friendly documentation, enhancing stakeholder alignment and time-to-market.
- Adept in research synthesis, A/B testing, and CX optimization using Google Analytics, Mixpanel, and Hotjar. Academic foundation in Human-Centered Interaction Design (MS, Harrisburg University), reinforcing the ability to blend cognitive psychology, usability heuristics, and visual design to craft inclusive and high-conversion product experiences. Passionate about building user-first, content-rich digital ecosystems that scale across devices and demographics.

TECHNICAL SKILLS

- **Design & Prototyping Tools:** Figma, Adobe XD, Sketch, Balsamiq, InVision, Lucidchart, Miro.
- **UX Research & Testing:** Hotjar, Lookback.io, UsabilityHub, Qualtrics, Google Forms, A/B Testing, User Surveys.
- **Journey Mapping & CX Tools:** Miro, Lucidchart, FlowMapp, CXInsight, Adobe Experience Manager.
- **Design Systems & Component Libraries:** Storybook, Zeplin, Zeroheight, Atomic Design Principles.
- **Web & Front-End Fundamentals:** HTML5, CSS3, JavaScript (basic), Responsive Design, Semantic Markup.
- **Project & Product Management Tools:** Jira, Trello, Confluence, Notion, Asana.
- **Technical Documentation & Writing:** Markdown, Google Docs, Microsoft Word, Confluence (Advanced Use), UX Spec Writing, Style Guides.
- **Accessibility & Compliance:** WCAG 2.1 Standards, ARIA Labels, Color Contrast Testing, Alt Text Best Practices.
- **Analytics & CX Optimization:** Google Analytics, Mixpanel, Microsoft Clarity, Heatmaps, Funnel Analysis.
- **Version Control & Collaboration:** Git (basic), GitHub, Figma Commenting, Cross-Functional Review Workflows.
- **Methodologies & Frameworks:** Agile, Scrum, Design Thinking, Lean UX, Double Diamond, Heuristic Evaluation.

PROFESSIONAL EXPERIENCE

Cognizant , UI Designer (Internship)

Jun 2024 – Aug 2024 | US

- Conducted user interviews and surveys via Qualtrics and Hotjar, capturing qualitative and quantitative data to identify 20+ friction points across onboarding and self-service channels.
- Mapped end-to-end customer journeys in Miro and Lucidchart, highlighting critical touchpoints and pain zones that guided senior team decisions, contributing to a prototype that improved CSAT forecasts by 15%.
- Designed clickable wireframes and low-fidelity prototypes for chatbot and help-center flows using Figma, which were iterated in weekly demos and reduced resolution time by 12%.
- Analyzed digital support metrics (session duration, bounce rates) in Google Analytics, identifying patterns that informed design improvements and increased self-service engagement by 18%.
- Collaborated with product, engineering, and marketing teams in Agile sprints via Jira, documenting and escalating CX process and UI pain points to drive sprint backlog prioritization.
- Documented detailed CX design specs—annotating customer flows, proposed UI changes, and rationale, in Confluence, ensuring traceability and speeding up development feedback loops by 20%.

EverestDX Private Limited, UX UI Designer

Mar 2022 – Apr 2023 | India

- Architected comprehensive UX flows, sitemaps, and process diagrams using Miro, translating product requirements into structured user journeys and improving onboarding completion rates by 18%.
- Crafted high-fidelity UI prototypes in Figma and Adobe XD, complete with micro-interactions and prototype annotations, enabling stakeholder walkthroughs that accelerated design approvals by 25%.
- Developed and maintained a modular design system defining tokens for typography, spacing, and color scales, in Storybook, and collaborated with developers during live handoff to ensure pixel-perfect implementation.
- Spearheaded usability testing sessions (moderated & remote) using Lookback.io and UsabilityHub, synthesizing research insights into actionable recommendations and reducing friction in task flow by 22%.

- Authored robust UX specification documents, comprising wireframes, design rationale, personas, and annotated screens, using Confluence, supporting smooth handover and reducing release cycle misunderstandings by 30%.
- Collaborated cross-functionally in Agile (Jira) with product managers, engineers, QA, and stakeholders, running design critiques, backlog refinement, and sprint demos to ensure alignment of UX outcomes with business objectives.
- Implemented accessibility (WCAG 2.1) standards by retro-fitting color contrast, semantic HTML prototypes, and focus management in code-level style guides, improving usability scores in A/B tests and enhancing developer compliance.

Smartbit Digital

UX UI Designer

Dec 2018 – Feb 2022 | India

- Designed and delivered 50+ responsive UI screens (web + mobile) using Figma, including interactive wireframes, storyboards, and click-through prototypes, accelerating stakeholder approvals by 20%.
- Built and maintained a lightweight design system with shared style guide (typography, spacing, colors, iconography), coordinating handoff through Zeplin, reducing developer queries by 30%.
- Coordinated with Agile scrum teams, UX researchers, product owners, and developers, to refine user flows and wireframes, integrating user feedback and usability test insights in weekly sprints.
- Integrated accessibility (WCAG 2.1) best practices, contrast checking, semantic UI components, and responsive grids, across all interfaces, improving overall usability and developer implementation fidelity.
- Leveraged basic HTML5/CSS3 knowledge during UI handoffs, reviewing and annotating Zeplin specs, ensured close collaboration with front-end engineers, resulting in faster build accuracy.

UI Designer

Jan 2018 – Nov 2018 | India

- Assisted the design team in creating basic wireframes and low-fidelity mockups for internal web applications using Balsamiq and Figma, gaining hands-on exposure to foundational UI/UX principles.
- Observed user interface review sessions with senior designers to understand real-world applications of typography, color theory, and spacing, contributing minor layout suggestions in iterative design cycles.
- Practiced building responsive layouts using Figma's auto-layout feature and component libraries, replicating common interface patterns to improve proficiency with modern design tools.
- Participated in daily stand-up meetings and team retrospectives to understand Agile workflows, including sprint planning and task management through Jira and Trello.
- Documented learning outcomes and maintained a personal design journal with reflections on accessibility guidelines, usability heuristics, and interface design trends as part of a self-guided learning track.

PROJECTS

Digital Transformation Service Page, UX Writing | Research-led Content Design | Visual Collaboration

- Designed responsive and accessible page layouts in collaboration with UI/UX teams using Figma to enhance visitor engagement on digital transformation services.
- Authored SEO-optimized articles on digital transformation and AI in business using structured research from Google Scholar, professional journals, and case studies.
- Collaborated cross-functionally to ensure tone, hierarchy, and information architecture aligned with brand strategy, resulting in a 30% increase in average time-on-page.

Local Grocery Mobile Application, UI/UX Design | CX Research | End-User Documentation

- Created wireframes and interactive prototypes for an e-grocery platform using Figma and user flow diagrams in Miro, tailored for mobile-first users.
- Conducted user behavior analysis through surveys and competitor benchmarking to inform feature prioritization and layout decisions.
- Authored a comprehensive User Guide with annotated visuals and tooltips, reducing onboarding time and support tickets by 25%.

AI Business Transformation Strategy, Research Writing | AI Integration in Business | Technical Content Creation

- Authored long-form content exploring the role of AI in business operations, highlighting automation, predictive analytics, and personalized CX strategies.
- Produced well-structured documentation using case-based insights to explain AI-driven scalability and ROI improvements for digital-first enterprises.
- Synthesized findings from academic literature, industry reports, and interviews to build strategic narratives targeted toward business and tech stakeholders.

EDUCATION

Human-Centered Interaction Design,

2023 – 2025

Harrisburg University of Science and Technology

Relevant Coursework: User Research and Usability Testing, Interaction Design Principles, Prototyping and Wireframing, Cognitive Psychology in Design, Design Thinking and Ideation, Information Architecture, User-Centered Design Methods, UX in AR/VR, Data-Driven Design, Accessibility and Inclusive Design, Visual Communication and Branding.
