EDUCATION

Illinois Institute of Technology

Chicago, IL

Master Of Computer Science, GPA (4.0/4.0)

Aug 2023 - Apr 2025

- Web Application Development, Big Data, Computer Networks, Operating Systems, Information Security.

JSS Academy of Technical Education

Bangalore, IN

Bachelor Of Computer Science and Engineering, GPA (3.6)

Aug 2016 - May 2020

- Data Structures and Algorithms, Artificial Intelligence, Mobile Application Development, Software Engineering.

TECHNICAL SKILLS

Languages: .NET, C sharp, HTML, CSS3, JavaScript, PHP, Python, Go, C/C++, Bash, Java, SQL, React

Cloud and Databases: AWS, Azure, MySQL, Firebase, MongoDB

Frameworks and Tools: Git, Docker, MVC, Bootstrap, CI/CD, Jenkins, JIRA, Selenium, Agile methodologies

EXPERIENCE

Software Engineer Intern

May 2024 – Present

Cook County Sheriff's Office

Chicago, IL

- Designed and implemented C sharp applications for automating security log analysis, increasing efficiency by 30%.
- Developed ASP.NET Core Web APIs, reducing manual data processing efforts by 40%.
- Integrated automated testing frameworks using NUnit, improving test coverage.
- Built a microservices-based logging system using .NET Core, enhancing real-time threat monitoring.

Software Engineer II

Nov 2021 - Aug 2023

Trellix

Bangalore, IN

- Developed key features for Data Loss Prevention software, driving 20% increase in sales, 15% rise in subscriptions.
- Wrote optimized JavaScript integrated AJAX for dynamic content updates, improving application responsiveness.
- Implemented authentication and authorization using OAuth and JWT, enhancing API security.
- Developed containerized applications using Docker and integrated CI/CD pipelines for streamlined deployments.
- Resolved over 500 warnings and optimized the codebase, achieving a 40% reduction in defects.

Software Engineer

Oct 2020 - Nov 2021

McAfee, LLC

Bangalore, IN

- Architected and deployed a multi-threaded logging system for McAfee Agent to improve the efficiency of data collection and error tracking, resulting in a 30% reduction in debugging time for production issues.
- Built and integrated RESTful APIs in Python, connecting internal tools with third-party services like Okta, enhancing workflow automation and reducing manual tasks by 25%.
- Developed an ETL pipeline to migrate structured data into SQL Server, improving data consistency.
- Built asynchronous message processing pipelines using C sharp, RabbitMQ, and MongoDB, increasing data throughput by 25%.

Software Engineer Intern

Feb 2020 - Aug 2020

McAfee, LLC

Bangalore, IN

- Automated software testing using NUnit, Selenium, cutting QA testing time by 50%.
- Leveraged JavaScript to create seamless and interactive user experiences, improving page load times.
- Deployed containerized SaaS applications using Docker, integrating CI/CD pipelines for reliable deployments.
- Created custom .NET debugging and profiling tools, improving error resolution time by 40%.

PROJECTS & RECOGNITION

Pharmacy Management System | HTML, CSS, Javascript, MySQL

- Web and database application reduced manual work in pharmacy stores with automated billing greater than 30% and patient record management, improving employee productivity.
- Designed SQL stored procedures and triggers, reducing database load on high-traffic services.
- Implemented database optimization, implementing SQL indexing strategies that cut query response times in half.

Pet Hotel Management | HTML, CSS, Javascript, MySQL, Bootstrap

- Led the development of a responsive, user-friendly interface with interactive UI components, improving booking and communication features, leading to a 25% increase in customer engagement.

SummarizeAI | React, Python, Flask, MongoDB, Bootstrap

- Developed a feature-rich React-based web application to summarize lengthy texts into concise summaries, enhancing user comprehension and productivity.

Scholarships & Hackathons

- Awarded scholarships from Microsoft, WiCyS, Women in Cloud, ISACA, Illinois Tech for academic excellence, leadership, and exceptional problem-solving abilities.
- Won first place at Tik-Tok Tech Jam, Drive Capital (Microsoft), and HackRTC (IEEE USA) by delivering innovative, high-impact solutions to complex technical challenges.
