PROFILE

A seasoned .NET Developer with 15+ years of experience in architecting, developing, and optimizing scalable software solutions within the Microsoft ecosystem. Skilled in utilizing technologies like C#, ASP.NET, and SQL Server to build innovative applications across diverse industries, including financial services, insurance, and healthcare. Recognized for delivering robust, high-quality solutions, adhering to best practices, and driving continuous process enhancements.

EMPLOYMENT HISTORY

Lead .NET Developer, Vantage West Credit Union

Jan 2020 — Present

- Lead development of core banking systems and integrations using .NET technologies.
- Architected and implemented RESTful APIs to improve data communication between internal and external systems.
- Developed and maintained .NET Core applications using a microservices architecture, ensuring scalable, high-performance financial solutions.
- Collaborated with cross-functional teams to design, develop, and maintain applications for both web and mobile platforms.
- Developed dynamic and responsive user interfaces using Angular and React, enhancing the user experience across devices.
- Utilized Azure DevOps for CI/CD pipelines to streamline development workflows.
- Played a key role in enhancing data security and regulatory compliance for member transactions.

Senior Software Engineer, Sedgwick

Jun 2015 — Dec 2019

- Developed and maintained enterprise-level software applications for claims management in the insurance sector using C#, ASP.NET, and SQL Server.
- Designed and optimized backend systems to handle complex claims processing and case management workflows in the healthcare industry.
- Integrated third-party services and APIs to enhance system functionality and provide a seamless user experience.

GraphQL	
MongoDB	
Redis	
Elasticsearch	
HTML	
CSS	
Javascript	
React	
Entity Framework	
AWS	
Git	
Azure DevOps	
Azure Functions	

- Conducted unit testing and code reviews to ensure software quality and maintainability.
- Worked on healthcare-specific modules for managing claims and ensuring compliance with healthcare regulations like HIPAA.

Backend .NET Developer, Fiserv

Jul 2009 — May 2015

- Designed and implemented software solutions for financial services applications, focusing on payment systems and account management.
- Developed high-performance backend services and APIs using C# and ASP.NET.
- Integrated third-party APIs and legacy systems to create unified platforms for financial transactions and reporting.
- Collaborated with QA teams to identify and resolve software defects, ensuring high levels of reliability and stability.
- Participated in agile development teams, contributing to sprint planning, development, and deployment.

EDUCATION

Bachelor of Computer Science, The College of New Rochelle

2005 — 2009
