

Raviteja Sangem Cincinnati, Ohio [Open to Relocation] +1 (470) 652 7048 ravitejasangem333@gmail.com LinkedIn	
EDUCATION	
Master of Science – Information Technology	GPA 4.00 / 4.00
University of Cincinnati, Ohio	
Bachelor of Engineering – Electronics and Communication Engineering	GPA 8.62 /10.00
Sreenidhi Institute of Science and Technology	
WORK EXPIERENCE	
NewYork State Government	Suny Albany, NewYork
Senior QA Engineer	October 2024 – Present
- Developed and maintained health-focused web applications using React and Angular, Java on Contentful CMS, for scalability and performance. - Led Salesforce Health Cloud testing, ensuring integration with EHR systems, including FHIR/HL7 standards, using Postman and RestAssured. - Automated API testing for external integrations Salesforce Health Cloud and FHIR-enabled health systems to ensure real-time data exchange. - Developed Apex test classes for Salesforce workflows, achieving 95% test coverage for Health Cloud custom objects. - Led manual and automation testing for a Electronic Health Records (EHR) system, ensuring with HIPAA and SOX-like regulatory standards. - Conducted data migration testing for patient data synchronization from EHR systems to Salesforce Health Cloud using SOQL & SOSL queries. - Designed performance test scripts with JMeter to simulate large volumes of patient record retrieval scenarios and validate system performance. - Conducted functional UI testing on patient data entry, appointment scheduling, and billing systems, verifying accuracy across multiple workflows. - Performed compliance testing for HIPAA & SOC 2 regulations, ensuring patient privacy and data encryption during testing. - Assisted in the migration from Selenium to Cypress to enhance test execution efficiency and improve UI testing responsiveness. - Implemented SOX-aligned change control processes, ensuring that updates and configurations were tested and validated before deployment. - Produced custom reports in Salesforce dashboards for test execution, defect tracking, and status monitoring, transparency and timely delivery.	
University of Cincinnati	Cincinnati, Ohio
QA Analyst	August 2023 – September2024
- Developed and maintained core functionalities for EMC NetWorker and its graphical interface (NMC), UI reliability and performance. - Designed and implemented Salesforce Lightning UI automation using Selenium, TestNG, and ApexTest for end-to-end CRM validation. - Developed automated test scripts for Sales Cloud and Service Cloud custom objects, workflows, and triggers to ensure accuracy and functionality. - Conducted API testing for banking platform integrations, validating SOAP and REST APIs with Postman, JMeter, and SOA Test. - Implemented data-driven test cases using SOQL & Apex for large-scale data migration scenarios. - Optimized Salesforce Shield Event Monitoring for audit trails, ensuring the security and compliance of sensitive financial data. - Integrated test automation scripts with GitLab CI/CD pipelines to ensure continuous delivery of Salesforce updates. - Automated Einstein AI analytics validation, focusing on predictive lead scoring and customer engagement algorithms for Sales Cloud. - Conducted performance testing on Salesforce API, simulating high-load conditions to ensure efficient transaction processing during peak hours. - Validated PCI DSS compliance, ensuring proper encryption, RBAC, and multi-factor authentication mechanisms for financial transactions. - Developed custom Jira dashboards for real-time test execution tracking, enabling stakeholders to access defect and progress reports. - Conducted cross-platform testing on Salesforce mobile applications, ensuring seamless user experience across Android and iOS devices.	
Cognizant Technology Solutions	Hyderabad, India
Software QA Engineer	September 2020 – July 2023
- Worked on SOX compliance testing, ensuring secure user role-based access and audit logging in pricing modules. - Designed and implemented Salesforce Service Cloud test cases for case management, SLA tracking, and customer interactions. - Automated end-to-end regression testing for custom objects, record types, and user roles using Selenium WebDriver and Java. - Contributed to Change Management and Compliance Testing, ensuring seamless deployment of pricing updates and modifications. - Conducted API testing for Service Cloud integrations with AWS Lambda, SAP, and third- ticketing systems using Postman and RestAssured. - Collaborated with developers and business analysts to understand CPQ configuration changes, ensuring validation before production release. - Created custom Apex test classes to validate Salesforce triggers, batch jobs, and scheduled processes for accurate data handling. - Integrated Salesforce SOX compliance validation, ensuring adherence to audit trails, change management, and security measures. - Developed performance testing scripts using BlazeMeter, simulating high-volume fleet tracking scenarios and assessing system response times. - Ensured high-quality test reporting by integrating Salesforce test workflows with Azure DevOps for seamless defect tracking and management. - Conducted smoke tests and user acceptance testing (UAT) for new Salesforce features before production releases.	
SKILLS	
Programming Languages: .Net, C#, Java, Python, JavaScript, TypeScript, Node.js, SQL, Scala, MATLAB, FitNesse, PowerShell, Bash	
Bug Reporting Tools: JIRA, HP ALM, Bugzilla, Confluence	
Automated Testing Tools: JUnit, TestNG, Cucumber, Sauce Labs, Selenium WebDriver, Postman, JMeter, SoapUI, Appium, Cypress, Playwright, Zephyr, Katalon Studio, Karate, AWS Lambda, AWS CloudWatch, Tosca Automation Tool, Rest Assured, SpecFlow,	
Testing Frameworks: TestNG, BDD Cucumber, Robot Framework, Serenity, Appium, Calabash	
Development Methodologies: Agile/Scrum, Waterfall, DB2, IMS, VSAM, Section 508	
Build/CI Tools: Jenkins, Maven, GitLab CI, Bamboo, Travis CI, Git, SVN, Bitbucket, Android Debug Bridge (ADB), Device Logging Tools	
Operating Systems & Tools: Linux (File management, grep, cat, bash, vim), Windows XP/7/8/10 Server, MS-Office ,Outlook, MS Excel	
Database Skills: MySQL, SQL Server, SQL PLUS, MongoDB, SQL Queries, Database Structure Principles	
CPQ Testing – Oracle CPQ, Salesforce CPQ, Pricing & Approval Workflows	
Web Services Testing: REST, SOAP, Postman, Apigee	
Manual Testing – Functional UI Testing, Regression Testing, End-to-End Testing	
Project & Release Management: Azure DevOps, Software Deployment, ERP & Salesforce Testing	
Test Automation: Selenium WebDriver, Cucumber, Appium, Katalon Studio, JUnit, TestNG, Postman, SoapUI, JMeter, Sauce Labs, Playwright	
Version Control Systems: Git, SVN, Bitbucket, Jira, Confluence	
PROJECTS	
Smart Shopping Cart Web Application (MERN Stack)	
- Developed a Full-Stack Web Application using React.js, Node.js, and Express.js, implementing user authentication (JWT), GraphQL APIs, and RESTful services for seamless front-end and back-end communication. - Designed and Styled Responsive UI using React.js, React-DOM, HTML, and CSS, ensuring an intuitive and visually appealing user experience for pages like users, products, cart, and checkout. - Managed Data and API Integrations by utilizing MongoDB for efficient storage/retrieval, implementing Axios for API requests, and maintaining global state with React Context API for cart functionality.	
PATENTS	
IoT and Machine Learning-based Headlight Intensity Changing device for Electrical Vehicles Issued on June 21, 2021	
Patent no: 2021101737
