

# GODWIN PRINCE

United States | (607) 312-8569 | [godwinprish99@gmail.com](mailto:godwinprish99@gmail.com) | [LinkedIn](#) | [Portfolio](#) | [Github](#)

## PROFESSIONAL SUMMARY

Software Engineer with experience contributing to full-stack and cloud-based SaaS applications, with a growing focus on AI/ML-driven solutions. Experienced in building web applications using HTML, CSS, JavaScript, and React, and designing REST APIs using Java and Python. Strong foundation in frontend development, SQL, and applied machine learning concepts, with hands-on experience in Agile teams delivering reliable, scalable, and data-driven software systems.

## PROFESSIONAL EXPERIENCE

**Binghamton University**, Software Engineer Intern | Binghamton, New York

August 2024 - Present

- Developed and deployed backend services using Java, Spring Boot, and Kafka, enabling high-throughput event processing for large-scale ML workflows on HPC systems.
- Designed REST APIs with MySQL, MongoDB, and Kafka producers/consumers to support asynchronous ingestion of GPU and persistent-memory metrics, improving reproducibility and analysis efficiency.
- Implemented automated testing using Cucumber (BDD), JUnit, and GitHub/GitLab CI integrations, reducing review time by 60% and improving code quality and compliance

**Societe Generale**, Software Engineer | Bangalore, India

May 2022 – July 2023

- Contributed full-stack features of the Collateral Swap using Java, Spring Boot, Kafka, and ReactJS, deploying microservices on AWS and automating testing with JUnit, Cucumber, Mockito for reliability and performance
- Optimized core business logic within Spring Boot, improving transaction speed by 50% and automating feature-file generation through Maven and JSON, supported by concise documentation for internal and client use
- Developed event-driven financial workflows integrating NSFR and LCR analytics with REST APIs and Kafka, ensuring compliant, secure, and high-integrity trade operations
- Collaborated with cross-functional teams under Agile/Scrum, managing CI/CD deployments via (Jenkins, GitHub) and applying microservices architecture to enhance scalability and maintainability

**Imarticus**, Software Developer | Bangalore, India

August 2021 – April 2022

- Developed reusable UI components with HTML5, CSS3, JavaScript, and Bootstrap, improving dashboard responsiveness and boosting IPL data visualization engagement by 20% using Chart.js
- Collaborated with backend and security teams on code reviews, UI optimization with Lighthouse and Cucumber-based test scenarios, reducing load time and enhancing user experience
- Integrated ReactJS with REST APIs using Axios and Redux, consuming Kafka-driven backend data to build dynamic dashboards and improve maintainability and scalability

**Pantech Solutions**, Software Development Intern | Trichy, India

May 2020 - May 2021

- Assisted in developing and testing backend features using Java, Spring Boot, MySQL, and Maven, contributing to database optimization and automating test workflows with Python scripts and Postman
- Built and integrated UI components in ReactJS using Axios, Bootstrap, and REST APIs, applying full-stack practices and using GitHub and Jira for version control and Agile collaboration

## PROJECT EXPERIENCE

- **Personal Finance Tracker Web App** : Built a secure full-stack app using Spring Boot (JWT) and ReactJS to manage transactions, budgets, and analytics with real-time insights
- **LLM-Based Voice Agent Evaluation Framework** : Built an LLM-powered voice agent evaluation system to simulate real-world conversations and identify robustness and reasoning failures in conversational AI.

## TECHNICAL SKILLS

**Languages** : C, Java, Python, JavaScript(ES6+), SQL

**Frontend**: HTML5, CSS3, React.js, Bootstrap, Axios, JSON, XML, GraphQL, React Testing Library, Next.js, UI Bug Fixing

**Backend** : Spring, Spring Boot, Spring Security, Hibernate, Microservices, REST APIs, Kafka, Node.js, Fast API, Django

**Databases**: MySQL, PostgreSQL, MongoDB, SQL Server, DynamoDB, Redis

**Cloud & DevOps** : AWS(EC2, ECS, S3, Lambda, SQS, CloudWatch, Docker, Kubernetes, Jenkins, CI/CD, Github, Bitbucket, Git

**ML & AI Skills** : Numpy, Pandas, AI Agents, LLMs, Prompt Engineering, OpenAI API, LangChain, TensorFlow, PyTorch

**Development Practices**: Agile/Scrum, SDLC, TDD, BDD, System Design, JUnit, Mockito, Postman, Jira, Cucumber, Linux

## EDUCATION

**Master of Science in Computer Science** - Binghamton University, State University of New York

May 2025

**Bachelor of Technology in Information Technology** - Velammal Institute of Technology

May 2021
