

Alex Marco

SR. Quality Assurance Engineer

San Francisco, CA

(628)277-2540

marcoalex.mail@gmail.com

Professional Summary

Over 7 years of experience in automation and manual testing for Mobile, Web-based, and Client-Server applications. Proficient in both Scrum Agile and Waterfall methodologies, with a comprehensive understanding of the software development lifecycle (SDLC). Skilled in creating test plans, designing test cases, and developing detailed test documentation for automation. Extensive experience in manual and automated testing using tools such as Robot Framework, Selenium, and Appium. Solid understanding of Object-Oriented Programming (OOP) principles, with practical implementation of automated tests using Python. Hands-on experience with AWS services, particularly S3, for cloud-based applications. Proficient in analyzing logs on Unix-based servers and collecting and interpreting data for troubleshooting. Strong background in SQL query writing and database management, enabling comprehensive data-driven testing strategies. Background in hardware testing, including Bluetooth, Firmware, Spatial Audio and etc... A quick learner, adept at adapting to fast-paced environments, with excellent analytical and problem-solving abilities. Strong organizational skills, capable of managing multiple projects and meeting deadlines effectively.

Technical Summary

Platforms: Windows, Mac OS, Linux.

Mobile OS: Android, iOS

Bug Tracking & Management: Jira, Quality Center (ALM), Buganaizer, Test Rail, Test Tracker (Google Tool), qTest, TestLink, Confluence.

Hardware: Hookshot, STM32 Programmer CLI, Ellisys Bluetooth Vanguard, Debug Board A20.

Testing Tools: ADB, Android Studio, BCM Trace Viewer, Target Manager, Atlassian UI Specs, PS5 Remote Viewer, Jenkins CI/CD, Appium, Python, Java, GitHub, Imply, Vysor, Postman, REST APIs, Charles Proxy, Selenium WebDriver, Xcode, Yslow, Notepad++, Visual Studio Code, Zeplin, MySQL, Soap UI (Ready API), RSpec, DevTools Protocol, JMeter.

Professional Experience

Senior QA Test Engineer

Spotify, San Francisco, CA,

Oct 2022 – Dec 2024

- Conducted comprehensive manual and automation testing of Spotify's web-based Home page, focusing on sections like Popular Artists, Popular Albums, Popular Radio, Featured Charts, Trending Episodes, and Spotify Playlists.
- Automated end-to-end test scenarios using **Selenium WebDriver** to reduce testing effort and improve test accuracy.
- Performed functional, regression, and UI testing to ensure seamless user interaction and flawless performance across devices.
- Validated search field functionality and category navigation for accuracy and responsiveness.
- Collaborated closely with developers and product managers to identify, document, and resolve defects, ensuring timely and high-quality product releases.
- Verified data consistency within dynamic Home page components, ensuring accurate content updates.
- Created detailed test plans, test cases, and test scripts to maximize coverage of functional and edge cases.
- Automated and parameterized Postman API calls using JavaScript to streamline testing, save time, and minimize human errors during sprint activities.
- Participated in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, to support iterative development cycles.

Position Highlights: Jira, Test Rail, Chrome/Safari/Firefox, Python, JavaScript, Selenium, Pytest, Git Hub, CI/CD Jenkins, Figma, Jama, Charles Proxy, Postman, API, DevTools Protocol, RSpec, JMeter.

QA Test Engineer

Google, Mountain View, CA

August 2021 – Aug 2022

- Designed and executed test plans, test cases, and test scenarios to ensure the functionality and quality of Pixel Buds.
- Conducted testing processes for various components of the product such as firmware updates, Bluetooth connectivity, phone calls, spatial audio, notifications, and Google Assistant integration.
- Tested Bluetooth range in various environments to determine the effective communication distance with Pixel Buds.
- Assessed the audio quality of Pixel Buds when connected to Ellisis, including call clarity, music playback, and voice assistance.
- Tested the speed at which Ellisis reconnects to Pixel Buds after being out of range or disconnected temporarily.
- Assessed how well Ellisis manages background noise during Bluetooth communication, ensuring clear and undisturbed audio.
- Participated in daily stand-up meetings and provided updates on the status of testing activities.
- Performed smoke, sanity, and regression testing to ensure that the bug had been fixed and the product worked properly.
- Utilized Unix and shell scripts to automate repetitive testing tasks, streamline the execution of test cases, and efficiently manage large datasets during the testing process.
- Worked closely with developers and PM to understand the requirements and identify test cases.
- Modified and maintained test cases due to changes in the requirements.
- Successfully collected logs during the testing activities with ADB commands.
- Identified and reported defects in a timely manner and worked with the development team to resolve them.
- Collaborated with PM to manage the task for the project, including defect resolution and data analysis.

Position Highlights: Buganizer, Python 3.7, Test Tracker, Android Studio, Windows/iOS/ChromeOS, Linux, ADB, Hookshot, STM32 Programmer CLI, WUT, Ellisis Bluetooth Vanguard, Debug Board A20, BCM Trace Viewer, Unix, Shell Script.

Sr. Software QA Engineer

Sony PlayStation, San Francisco, CA

Apr 2019 – May 2021

- Covered testing on PlayStation5 console for main Home page.
- Created test cases to cover gaps for existing features.
- Developed test cases from scratch for new upcoming console features.
- Created and managed tests cycles, tests suites, test cases for sprint in qTest Manager.
- Performed Sanity, Smoke, Regression testing for different areas of Home page.
- Reviewed, tested developer's PR's to make sure that fixes or changes fixed and applied properly.
- Analyzed console logs and reported to the development team.
- Maintained Jenkins test automation Sanity, Smoke, Regression pipelines.
- Involved in a lot of meetings such as stand up's with developers, cross team meetings, bug triage, etc...

Position Highlights: Jira, qTest Manager, Target Manager, Atlassian UI Specs, Kanban Board, PS5 Remote Viewer, Confluence, Slack, Jenkins CI/CD, Git Hub, Imply Jama Test Case Design.

Software QA Engineer

H-E-B, Austin, TX

Feb 2017 – Mar 2019

- Tested My H-E-B e-commerce mobile app.
- Designed and executed test plans, test cases, and test scenarios to ensure the functionality and quality of the project.
- Tested the app on Android and iOS to ensure that it is compatible and functions properly on different mobile platforms.
- Performed all types of testing ensure that the application meets the requirements and specifications.
- Conducted performance testing to ensure that the app can handle a high volume of traffic and transactions without crashing or slowing down.
- Worked on testing various components such as search field, coupons, prices, discounts, and integration EBT card.
- Used Charles Proxy Breakpoints, Map Local and Rewrite rules to simulate app behavior.
- Analyzed app crash reports and reported to the development team to identify and resolve issues found during testing.
- Performed REST API testing using Postman to make sure calls return correct data.
- Participated in daily stand-up meetings, sprint planning meetings, and retrospectives to provide updates and feedback on the testing process.

Environment: Jira, Agile/Scrum, GUI, Emulator, Simulator, iOS, Android, Vysor for Android, Postman, REST API's, Charles Proxy, Mac OS, Test Rail, , Android Studio, Xcode.

**Bachelor's Degree in Moldova State University
The Faculty of Economic Sciences (2005-2010)**
