

Gudala Ruchitha | Salesforce Developer/Admin

Atlanta, Georgia, USA | +1(205) 878-8247 | ruchitha.gudala@jobhuntus.com | [LinkedIn](#)

Professional Summary

Salesforce Certified Developer/Admin with hands-on experience at **Morgan Stanley (USA)** and **Version1 (India)**, specializing in **Salesforce Sales, Service, and Experience Cloud**. Expertise in **Apex, LWC, Flows, Process Builder, and Lightning Experience migration**, improving business efficiency by automating processes. Skilled in **REST/SOAP API integrations, data migration using ETL tools, and CI/CD deployments** with **Salesforce CLI, GitHub, and Copado**. Strong knowledge of **security frameworks, compliance standards (SEC, FINRA)**, and Agile methodologies, ensuring smooth project execution and system reliability.

Education

Masters in Computer Science University of Alabama, Birmingham, USA	Dec 2024
Bachelor of Technology in Computer Science Geetanjali College of Engineering and Technology, India	May 2022

Professional Exeperience

Salesforce Developer/Admin Morgan Stanley, NY, US	July 2024 – Current
- Contributed to the implementation and enhancement of Morgan Stanley's Intelligent Client Engagement Tool, integrating it with Salesforce to support client meeting summaries and follow-up actions. This initiative improved financial advisors' efficiency by 30%, streamlining manual processes and enhancing productivity for over 500 advisors. - Assisted in developing and customizing Salesforce solutions using Apex, Lightning Web Components (LWC), Flows, and Process Builder, contributing to improved automation and data accuracy within wealth management processes, achieving a 20% reduction in case resolution time. - Participated in integrating Salesforce with external systems via REST and SOAP APIs, enabling seamless data exchange for investment portfolio tracking and comprehensive customer insights. - Collaborated on designing and optimizing custom reports and dashboards, providing financial advisors with actionable real-time insights into client interactions and investment trends. - Supported the automation of KYC (Know Your Customer) processes through declarative and programmatic tools, ensuring compliance with financial regulations such as SEC and FINRA, and reducing manual intervention. - Assisted in managing Salesforce security features, including role hierarchies, profiles, permission sets, and sharing rules, ensuring data confidentiality and access control. - Contributed to data migration and cleansing efforts using Data Loader and ETL tools, improving data integrity and boosting reporting accuracy by 25%. - Assisted in the deployment of Salesforce solutions through CI/CD pipelines, ensuring smooth feature rollouts and minimizing production downtime. - Played a key role in automating follow-up task tracking using Salesforce Flows, reducing manual effort by 40%, allowing advisors to focus more on client relationships. - Contributed to developing end-user training and documentation, facilitating smooth adoption of Salesforce functionalities and best practices within financial advisory teams.	
Salesforce Developer/Admin Version1, India	Jun 2021 - April 2023
- Designed, built, and configured Salesforce applications to align with business objectives, enhancing operational efficiency and improving business processes. Successfully migrated 5+ Salesforce Classic applications to Lightning Experience, resulting in a 35% increase in user efficiency and adoption. - Customized Salesforce objects, fields, and relationships to optimize data structure, streamline workflows, and improve data integrity, leading to a 40% reduction in manual data entry errors. - Developed modern Lightning applications utilizing Salesforce Lightning Design System, App Builder, and Lightning Components to create high-performing, responsive user experiences. Optimized Lightning Components to reduce page load times by 40%, improving system performance. - Built and maintained Salesforce Community sites, boosting user engagement by 50% through improved accessibility, self-service capabilities, and UI enhancements. Upgraded legacy Salesforce systems to Lightning Experience, delivering a more intuitive user interface and driving seamless user adoption. - Designed intuitive page layouts, compact layouts, and automated flows, automating 80% of business processes, reducing manual intervention and enhancing operational efficiency. Developed robust user interfaces using HTML, CSS, JavaScript, and Salesforce LWC, ensuring scalable and high-performing solutions, and deploying efficiently using Salesforce CLI and package.xml. - Implemented a comprehensive user access management strategy, reducing security risks by 60% and ensuring compliance with organizational policies and industry best practices. Supported SIT, UAT, HOTFIX, and Regression Testing cycles, ensuring seamless deployments and system integrity during monthly releases, which contributed to a 20% reduction in post-release defects. Led test planning, script development, and execution, improving test coverage and ensuring rigorous compliance with quality standards. Conducted knowledge transfer sessions, equipping teams with best practices for integrating and managing TestRail status in Jira, fostering collaboration and improving test tracking. Maintained detailed test documentation, streamlining defect tracking processes and maintaining an updated repository for future reference.	

Technical Skills

Salesforce CRM & Platform: Sales Cloud, Service Cloud, Experience Cloud (Communities), Financial Services Cloud, Classic to Lightning Migration, Intelligent Client Engagement Tool, KYC Automation, Workflows and Validation Rules, Approval Processes, Profiles, Roles, Permission Sets, Sharing Rules, Relationship Management, Custom Objects, Reports, Dashboards, Search Layouts, Page Layouts, Record Types, Process Builder, Reporting, Platform Events, Workbench, Lightning Flows.

Force.com Development: Lightning Web Components (LWC), Aura Components, Salesforce Lightning Design System (SLDS), Visualforce Pages, Apex, Flows, Process Builder, Salesforce CLI, Package.xml, Developer Console, Apex REST/SOAP Services, Salesforce CPQ, Asynchronous Processing (Batch Apex, Future Methods, Scheduled Jobs).

Integration & APIs: RESTful APIs, SOAP APIs, Salesforce Connect, External System Integrations (Investment Portfolio Tracking, Financial Data APIs), Middleware Tools (MuleSoft, Informatica), Postman, OAuth 2.0, Web Services (REST/SOAP).

Salesforce Security & Compliance: Role Hierarchies, Profiles, Permission Sets, Sharing Rules, Field-Level Security, Organization-Wide Defaults (OWD), Data Confidentiality, Compliance with Financial Regulations (SEC, FINRA), Salesforce Shield (if applicable), Security Best Practices, Encryption, Audit Trails.

Data Management & Migration: Salesforce Data Loader, ETL Tools Data Migration and Cleansing, Data Modeling, Custom Objects and Fields, Validation Rules, Reporting Accuracy Enhancement, Data Deduplication, Bulk API, CSV Imports, SOQL & SOSL Queries.

CI/CD & Deployment: Salesforce CLI, GitHub, Bitbucket, Change Sets, Jenkins, Azure DevOps, Copado, CI/CD Pipelines, Salesforce DX, Unlocked Packages, Automated Deployments, Metadata API, Version Control, Test Environments.

Testing & Quality Assurance: System Integration Testing (SIT), User Acceptance Testing (UAT), HOTFIX, Regression Testing, Test Planning, Test Execution, Defect Tracking, TestRail, Selenium (if applicable), JIRA for Test Management, End-to-End Test Coverage.

Training & Documentation: End-User Training, Knowledge Transfer Sessions, Documentation for Best Practices, Process Automation Training, User Adoption Strategies, Confluence, Standard Operating Procedures (SOPs).

Programming Languages: Apex (Classes, Triggers, Batch, Scheduled), SOQL, SOSL, SQL, Java, JavaScript, HTML, CSS, XML, C, C++, Salesforce CLI.

Development Methodologies: Agile/Scrum, SDLC (Software Development Life Cycle), Waterfall, Iterative Development, Continuous Improvement, Sprints, Daily Stand-ups.

Databases: SQL Server, MySQL, MS Access, DB2, Salesforce Sales Cloud, Service Cloud.

Web Technologies: HTML, CSS, JavaScript, XML, SOAP, REST, AppExchange, OAuth 2.0, Web Services Integration, Responsive Design, Cross-Browser Compatibility.

Deployment & Collaboration Tools: JIRA, Salesforce App Builder, GitHub, VS Code, Checkmarx Security Tool, Copado, MuleSoft, Eclipse, Confluence, Microsoft Teams, Slack, Dreamweaver.

Certifications

- Salesforce Certified Administrator
- Salesforce Certified Platform Developer I & II
- Salesforce Certified Advanced Administrator
