PROFESSIONAL EXPERIENCE

Cloud Engineer

Oct 2023 – Present

Symbolic | Irvine, CA

- Supported the annual revenue of \$40,000,000 by expertly engineering highly scalable cloud infrastructure solutions that consistently achieved 99.9% uptime through robust deployment methodologies.
- Reduced \$300,000 in annual downtime costs by resolving 30+ automation halts through refined infrastructure code and cross-functional collaboration.
- Mitigated key robotic vehicle failure modes effectively by strategically leveraging real-time telemetry data analysis and comprehensive log aggregation tools, ultimately achieving a 15% reduction in operational downtime.
- Monitored overall system health, addressing 95% of critical Azure-based alerts swiftly within established Service Level Agreements, consistently preserving the uninterrupted functionality of essential warehouse operations.
- Led development of crucial infrastructure KPIs effectively via CI/CD pipelines and intuitive dashboards, significantly improving system visibility and reducing downtime by a notable 22%.
- Cut annual infrastructure costs by \$125,000 by optimizing resource allocation and storage provisioning strategies.
- Enabled a substantial 30% reduction in incident response time by seamlessly integrating AWS CloudWatch metrics, efficient Lambda functions, and automated alert notification workflows across critical systems.

Cloud Engineer & IT Specialist

Jan 2023 - Aug 2023

JerseyStem | Chatham, New Jersey

- Automated \$350,000 in engineering hours by implementing infrastructure provisioning and deployment processes using Terraform and Ansible, leading to faster time-to-market for new applications.
- Generated \$750,000 in projected annual cost savings by architecting and implementing a serverless infrastructure on AWS, optimizing resource utilization and reducing overhead.
- Prevented an estimated \$1,200,000 in potential losses by proactively identifying and remediating critical security vulnerabilities in the cloud environment, ensuring business continuity and data integrity.
- Provided flexible and on-demand IT support to nonprofit organizations, reducing IT resolution time by 35% through efficient troubleshooting and documentation.
- Optimized IT workflows by strategically integrating Jira, Slack, and Google Workspace platforms, resulting in a 30% reduction in overall response time and improving cross-functional team collaboration on critical projects.

PROJECTS

osTicket via Azure

<https://github.com/Michael-DTran/osTicket>

- Championed the transition to Azure virtual machines, enabling remote desktop access and resolving three critical system vulnerabilities auditors had previously flagged.
- Administered and maintained the ticketing system by configuring workflows and user permissions for 20+ support agents, resulting in a 15% improvement in ticket resolution times, and implemented documentation.

Active Directory via Azure

<https://github.com/Michael-DTran/Active-Directory>

- Architected virtualized directory system within Windows domain, facilitating secure authentication protocols and access controls, enhancing overall network security posture by resolving 15+ vulnerabilities.
- Spearheaded directory-enabled application integrations, which supported streamlined authentication and authorization workflows for 15+ internal tools, improving UX scores by 30% during employee onboarding.

Deployed a React App on AWS S3 with Static Hosting and HTTPS via Cloudfront

<https://github.com/Michael-DTran/React-Domain-Proj>

- Established SSL certificate using AWS Certificate Manager for domain hosted on Route 53, securing website communications via HTTPS and reducing latency by 15 milliseconds through edge caching.
- Implemented automated deployment pipelines using CI/CD, streamlining updates and ensuring seamless application rollouts with zero downtime.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Psychology and Social Behavior | University of California, Irvine

NuCamp Backend, SQL, and DevOPS Developer with Python

AWS Certified Solutions Architect - Associate (SAA)

SKILLS

AWS (S3, Route 53, CloudFront, Certificate Manager) | Azure (Active Directory, Virtual Machines, Networking) | Windows & Windows Server | Linux | Bash | PowerShell | Python · CI/CD (Jenkins, GitHub) | Git | GitHub | MySQL | SQL | Docker | RESTful APIs | System Administration | Jira | Confluence | Excel | Kanban | SAP | Familiar: Kubernetes | Terraform | CloudFormation | Ansible | Chef | Prometheus | Grafana | DataDog | ELK Stack (Elasticsearch, Logstash, Kibana) | Cloud Security | CDN | GCP | IAM | Networking (VPC, Subnets) | Serverless (Lambda, API Gateway) | Infrastructure as Code (IaC) | Monitoring & Logging | Security Best Practices | Automation Scripting
