

Mowna Ravi

RPA Technical Lead - Blue Prism AD01 Certified

80+ Process Assessments | 95+ Bots Delivered | 8 Years IT Experience

Texas | 9453586414 | mownaravi1816@gmail.com | [Mowna.linkedin.com](https://www.linkedin.com/in/mownaravi)

Professional Summary

Engineering professional with 8 years of IT experience with extensive exposure on robotic project analysis, Software design, development, debugging, deployment, documentation & Testing. Expertise in development of software robots using various automation tools. Experienced in RPA assessment and solution design for business processes (Web applications, Desktop based, SAP, Mainframe Applications)

- Currently, working with IBM as RPA Tech Lead Developer (Full time) performing different RPA technical activities leading part of the team responsible for process implementation and delivery.
- Onshore & Offshore client interfacing experience across multiple geographies like UK, Canada, Africa, and USA
- Analyze the feasibility of New/Existing process suitable for automation.
- Involved in different phases of SDLC in various projects and Implemented End to End RPA
- Experience with the Waterfall and Agile software development processes

Achievements: CIO Team Award, Growth Award, Performer Award, On the Spot Award & Learning Achievement Award

Projects

GST Input Credit-Hotel Booking

ARMS Update

BSEG Data Extraction

GPX Automation

Air Ticket Refund

Front end RTV Letters

Invoice Correction

PO Closure Buy@IBM

CAAPS Auto IPVN Rejection

PO-Printing Buy@IBM

Certifications

Blue prism Accredited Developer Exam, IBM RPA, Uipath Advanced certification, Automation anywhere advanced certified, DOT.NET, AI for IBMers, Data science methodology

Work experience

April 2020 - Present

**RPA Technical Development Lead
IBM PVT LTD**

- Serve as the RPA COE technical interface.
- Providing a superior level of experience and knowledge of the RPA solution and associated methodology to support colleagues through all phases of the delivery lifecycle.
- Mentoring colleagues through trainings and providing advice and guidance on best practice and development techniques.
- Providing architectural control over solution designs to ensure consistency and continuity across the company's delivery teams.
- Identifying new process opportunities and accurately analyzing and estimating new processes, quickly assessing feasibility.
- Identify opportunities to design and build automation for more time consuming and iterative tasks and document the analysis for solution design.
- Review code for compliance and reuse and ensure code complies with RPA architectural standards.
- Lead problem identification/error resolution process, including tracking, repairing & reporting defects.
- Identifying and communicating the technical infrastructure requirements
- Designing process solutions in accordance with standard tool design principles and conventions.
- Working within project planning constraints, communicating any identified project risks and issues to the delivery/project manager accordingly and providing inputs to the change control process.

March 2021 - June 2023 RPA Tech lead & Iteration Manager

IBM PVT LTD

- Lead and assign projects to the RPA members to ensure projects are delivered on time with quality.
- Helping client in understanding the benefits of RPA over traditional automation with various seminars, POC's, use cases and propose solutions on RPA using Blue Prism.
- Total of 80+ Bots deployed in Production with hassle-free delivery.
- End to End coordination with process owners, developers & IT teams to implement projects.
- Identify opportunities to design and build automation for more time consuming and iterative tasks and document the analysis for solution design.
- Serve as the RPA COE technical interface.
- Review code for compliance and reuse and ensure code complies with RPA architectural standards.
- Lead problem identification/error resolution process, including tracking, repairing & reporting defects.
- Identify best practices and continuous improvement in RPA solutions.
- Participate online meetings to demonstrate the capabilities of RPA for on-going projects and potential clients.
- Provided Exception handling at every possible scenario for a robust error-free development.
- Plan 1-1 sessions with developers and plan training on RPA whenever necessary.

April 2020 - March 2021 Senior Software Developer- RPA

IBM PVT LTD

- Driving RPA process improvements and sharing best practices effectively
- Experience in working with high density robots.
- Developed & Deployed process both attended & unattended.
- Understanding of end-to-end RPA life cycle.
- Involved in code review and lead development team.
- Designed solutions utilizing RPA best practices and
- Maintain BOTS & Technical responsibility on end-to-end project delivery.
- Experience in staging and deploying the automation solution in Dev/UAT/Prod environments

June 2019 - April 2020 Software Engineer- RPA

SCHNEIDER ELECTRIC

- Designed Functional Requirements Documents for an RPA project for Business Stakeholders.
- Hands on & involvement in each phase of Software Development Life Cycle.
- Interacted with Windows-based application, Web based application & Surface automation.
- Responsible for overseeing the Quality procedures related to the project.

April 2017 - June 2019 Software Engineer

Prodapt Solution

- Design, Develop, Test and Publish code in RPA-Blue prism.
- Interacted with Windows-based application, Web based application & Surface automation.
- Involved in Process discovery & code retrospectives.
- Work closely with business to understand requirements.
- Involved in POC for RPA execution.
- Define and identify re-usable automation flows.
- Publishing development status reports to stakeholders
- Implementing the new concepts as per the process based on the client requirements.

Key Skills

ASP.NET, VB.Net,HTML, SQL, SAP Scripting, Python
Tools: JIRA, BOX, GITHUB, Azure, Trello

Education

2012 - 2016 Bachelor of engineering: Computer science
Visvesvaraya Technological University
