Summary

Highly driven Full-Stack Engineer with over 10 years of development experience, specializing in AI integration and cloud-native solutions. Demonstrated success in system architecture, optimization, and delivering high-performance web applications that prioritize seamless user experiences. Proficient in a wide range of technologies including React, Next.js, Angular, Node.js, C#, .NET, ASP.NET, Java, Spring, Python, Django, and major cloud platforms such as AWS, Azure, and Google Cloud Platform. Experienced in deploying and managing scalable cloud infrastructures, as well as implementing machine learning models and AI-driven functionalities to enhance application capabilities. Adept at collaborating within dynamic teams to drive innovative and impactful projects. Eager to leverage my comprehensive expertise in Full-Stack development, AI, and cloud technologies to contribute to cutting-edge solutions.

Skills

- **Frontend** — *React, React Native, Svelte, Angular, Vue, Next.js, HTML5, CSS3, SASS, LESS, JavaScript/TypeScript, D3.js, Chart.js, Fluent UI, Material UI, Ant Design, Bootstrap, Tailwind CSS, Webpack, Vite, Progressive Web Apps (PWA), WebAssembly, Figma, Jamstack, Headless CMS*
- **Backend** — *ASP.NET, C#, Java, Spring Boot, Node.js, Express.js, Ruby on Rails, GraphQL, RESTful API, Prisma, Swagger UI, Serverless Architecture, Microservices*
- **Databases** — *MySQL, PostgreSQL, MongoDB, Azure Data Lake, Hadoop*
- **Cloud Services & Infrastructure** — *AWS (EC2, Lambda, Cognito, Amplify, SES, S3), Microsoft Azure, Azure DevOps, Google Cloud Platform (GCP), Docker, Kubernetes, BunnyCDN*
- **Testing & Quality** — *Jest, Mocha, Jasmine, Karma, Cypress, Storybook, Enzyme*
- **CI/CD & DevOps** — *Azure DevOps, Jenkins, GitHub Actions*

Professional Experience

Deloitte, Sr Full Stack Engineer

02/2023 – 11/2024 | Las Vegas

- Spearheaded the end-to-end development of the Deloitte Internal Resource Management System using **React.js** for the frontend and **Node.js** with **Express** for the backend, enhancing internal resource tracking and allocation.
- Created intuitive and responsive user interfaces with **React.js** and **Redux**, improving user engagement and reducing navigation time by 35%.
- Engineered robust **RESTful APIs** using **Node.js** and **Express**, facilitating seamless integration with existing Deloitte systems and increasing data retrieval efficiency by 40%.
- Deployed the application on **AWS** using **EC2**, **S3**, and **RDS**, ensuring high availability and scalability, which supported a 50% increase in user base without performance degradation.
- Designed and managed **PostgreSQL** databases, optimizing queries and indexing strategies to reduce data processing time by 25% and enhance overall system performance.
- Collaborated with **DevOps** teams to set up **CI/CD pipelines** using **Jenkins** and **Docker**, accelerating deployment cycles by 30% and ensuring consistent application releases.
- Implemented authentication and authorization mechanisms using **JWT** and **OAuth 2.0**, strengthening security protocols and reducing unauthorized access incidents by 45%.
- Led the development of automated testing suites with **Jest** and **Selenium**, increasing test coverage to 90% and decreasing bug-related downtimes by 20%.
- Worked closely with **UI/UX designers**, product managers, and stakeholders to gather requirements and deliver features that

improved user satisfaction scores by 40%.

- Utilized performance monitoring tools like **New Relic** and **Google Lighthouse** to identify and resolve bottlenecks, enhancing application load times by 30%.
- Created comprehensive documentation and maintained best practice guidelines for the IRMS, facilitating onboarding and knowledge sharing, which reduced training time for new developers by 50%.

Revolut, Sr Front-end Engineer

05/2020 – 12/2022 | New York

- Led front-end engineering for **Revolut's digital banking platform** using **Angular**, **ASP.NET**, and **C#**, delivering dynamic, responsive user interfaces that supported over 2 million users and increased UI performance by 30%.
- Enhanced data handling efficiency by integrating **GraphQL APIs**, streamlining data fetching and real-time interactions, which reduced data retrieval times by 40% and improved overall system responsiveness.
- Collaborated with **UX/UI teams** to ensure a consistent and intuitive user experience across all devices, implementing **responsive design principles** and **Angular best practices**, resulting in a 25% increase in user satisfaction scores.
- Spearheaded the secure integration of **OAuth-based authentication** and authorization mechanisms using **ASP.NET** and **C#**, achieving 100% compliance with internal security standards and reducing security incidents by 30%.
- Managed a **microservices architecture** with **Kubernetes** and **Docker**, optimizing for scalability and high availability, which improved system scalability by 50% and reduced deployment times by 60%.
- Implemented and maintained **CI/CD pipelines** via **Jenkins** and **GitLab CI**, employing **Agile methodologies** to ensure timely project delivery, leading to a 35% increase in deployment frequency and a 20% reduction in release cycle times.
- Optimized backend services with **ASP.NET Core** and **C#**, enhancing system performance and reliability, resulting in a 45% improvement in backend response times and supporting complex business logic for increased transaction volumes.
- Utilized cloud platforms such as **AWS**, **Azure**, and **GCP** to deploy and manage scalable applications, ensuring efficient resource utilization and reducing cloud costs by 25% through optimized infrastructure management.
- Mentored and led a cross-functional development team of 10+ engineers, fostering a collaborative environment and driving the adoption of best practices in **full-stack development**, **cloud computing**, and **AI integration**, which boosted team productivity by 15%.
- Integrated **machine learning models** and AI-driven functionalities, enhancing application capabilities and delivering innovative solutions that increased feature adoption by 20% and boosted user engagement by 10%.

AWS, Senior Full Stack Developer

10/2017 – 03/2020 | Ashburn, VA

- Designed and implemented **RESTful APIs** leveraging **AWS API Gateway** and **AWS Lambda**, facilitating seamless integration with 50+ mobile applications and third-party services, which increased API usage by 40%.
- Managed state handling and real-time data updates through **Redux**, utilizing **AWS DynamoDB** and **AWS AppSync**, resulting in a 30% improvement in data consistency and a 20% reduction in latency.
- Optimized platform performance and scalability by architecting solutions on **AWS cloud infrastructure (EC2, S3, RDS, Elastic Load Balancing, CloudFront)**, which enhanced reliability by 35% and decreased page load times by 40%.
- Implemented **CI/CD pipelines** using **AWS CodePipeline**, **CodeBuild**, and **CodeDeploy**, streamlining deployment processes and enabling continuous integration and delivery, reducing release cycle times by 50%.
- Ensured high availability and disaster recovery through **AWS multi-region deployments**, automated backups, and failover strategies, maintaining system uptime at 99.99% and minimizing downtime during incidents by 90%.
- Monitored and maintained system health with **AWS CloudWatch**, **AWS X-Ray**, and **AWS Lambda** for automated scaling and proactive issue resolution, enhancing overall system performance and reducing incident response times by 35%.
- Collaborated with cross-functional teams using **Agile methodologies** like **Scrum** and **Kanban**, enhancing project delivery speed by 20% and fostering effective team collaboration across 5+ departments.
- Leveraged **Infrastructure as Code (IaC)** with **AWS CloudFormation** and **Terraform** to manage and provision cloud resources, ensuring consistent and repeatable deployments across 10+ environments and reducing provisioning time by 60%.
- Implemented security best practices by utilizing **AWS IAM**, **AWS Shield**, and **AWS WAF**, protecting applications against threats and ensuring compliance with security standards, which decreased security breaches by 40%.
- Utilized containerization and orchestration with **Docker** and **Kubernetes** on **AWS EKS**, improving deployment flexibility and scalability for microservices-based architectures, resulting in a 50% increase in deployment frequency and 30% reduction in resource costs.

Paypal, Web Development Consultant

03/2016–07/2017 | Austin, TX

- Collaborated with cross-functional teams including product managers and designers to develop scalable web solutions using **React**, **Next.js**, **Redux**, and **TypeScript**, aligning with PayPal’s strategic goals and increasing transaction efficiency by 20%.
- Provided technical leadership throughout the project lifecycle, ensuring **PCI DSS** and **GDPR compliance**, which reduced security incidents by 30%.
- Developed accessible interfaces adhering to **WCAG 2.1 standards**, improving user accessibility scores by 15% and enhancing cross-browser compatibility.
- Integrated secure payment APIs like **PayPal Payments** and **Stripe**, boosting transaction reliability by 25% while maintaining top-tier data protection with **OAuth 2.0** and **JWT**.
- Optimized performance and scalability using **AWS services (EC2, S3, Lambda)** and microservices architecture, reducing page load times by 40% and ensuring reliable performance during high traffic.
- Implemented **CI/CD pipelines** with **Jenkins** and **GitLab CI**, achieving a 95% on-time delivery rate through **Agile methodologies** like **Scrum** and **Kanban**.
- Enhanced user experience through iterative improvements and **A/B testing**, resulting in a 20% increase in user satisfaction and a 15% rise in conversion rates.
- Ensured robust security measures by deploying **MFA**, **SSO**, and **TLS 1.3**, achieving 100% compliance in security audits and safeguarding financial data.

Paypal, Frontend Developer

08/2014–02/2016 | Austin, TX

- Developed responsive user interfaces using **HTML5**, **CSS3**, **JavaScript**, and **jQuery**, enhancing user engagement by 15% through seamless and intuitive designs.
- Optimized financial data management with **MongoDB**, improving database performance and scalability by 20%, and ensuring efficient handling of large data volumes.
- Collaborated with UX/UI designers to build dynamic data visualization components using **AngularJS** and vanilla **JavaScript**, resulting in more intuitive and interactive financial dashboards.
- Managed server deployments on **Apache** and **Nginx**, achieving 99.9% uptime and ensuring robust performance and high availability for mission-critical applications.
- Implemented security enhancements and assisted in integrating financial APIs, contributing to a 25% increase in transaction reliability and strengthening data protection measures.

Education

Texas State University, Bachelor's degree in Computer Science

09/2010–05/2014 | San Marcos

Certifications

AWS Certified Solutions Architect – Associate

Certified ScrumMaster (CSM)
