

Pranavitha
.NET Developer
Pranavitha243@gmail.com
(469)864-1601

Professional Summary:

- Over 5 years of experience in Client/Server-tier architecture, Web Applications, and Object-Oriented Analysis and Design, with expertise in Agile (Scrum, Kanban) and Waterfall methodologies.
- Proficient in system design, analysis, implementation, testing, development, and maintenance of business applications using .NET, C#, and Windows services.
- Strong experience in developing scalable, high-performance applications using .NET Core, ASP.NET Core, and microservices architecture.
- Hands-on experience with cloud platforms, including Microsoft Azure (PaaS, IaaS, SaaS), Azure Functions, Azure App Services, Azure DevOps (CI/CD), Application Insights, and Key Vault.
- Skilled in building web applications using ASP.NET Core MVC, Blazor, and integrating RESTful APIs with Web API and GraphQL.
- Extensive experience with Entity Framework Core, LINQ, and ADO.NET for efficient data access and manipulation.
- Proficient in modern front-end technologies, including Angular (Angular 2+), React.js, JavaScript (ES6+), TypeScript, and Bootstrap for creating responsive Single Page Applications (SPA).
- Hands-on experience with Docker for containerization, Kubernetes (AKS) for orchestration, and OpenShift for managing cloud-native applications.
- Expertise in developing and deploying microservices, utilizing gRPC and RabbitMQ for distributed systems communication.
- Solid understanding of authentication and authorization protocols, including OAuth 2.0, OpenID Connect, and Azure Active Directory (AAD).
- Skilled in version control using Git/GitHub, GitLab, and Bitbucket, with CI/CD pipeline creation using Jenkins and Azure DevOps.
- Strong database design and development skills using SQL Server 2019, PostgreSQL, and NoSQL databases like Cosmos DB and MongoDB.
- Experienced in writing complex T-SQL queries, stored procedures, triggers, and optimizing database performance using indexing and query tuning techniques.
- Familiar with unit testing frameworks like xUnit, NUnit, and Moq for ensuring code quality and test coverage.
- Experience in migrating legacy applications from ASP.NET to .NET Core, modernizing architectures with microservices and cloud adoption strategies.
- Proficient in using Visual Studio 2022, Visual Studio Code, and integrating third-party libraries through NuGet Package Manager.
- Strong collaboration skills with cross-functional teams using collaboration tools like JIRA, Confluence, and Slack.

Technical Skills:

Languages	C, C#, VB.NET, T-SQL, PowerShell, Python (for scripting)
.NET Technologies	ASP.NET Core 6/7/8, ADO.NET, MVC, Razor Pages, LINQ, Blazor, WCF, Web API, .NET Framework 4.6.2/4.7.2, .NET Core 3.1/5/6/7/8
UI Technologies	HTML5, Bootstrap 5, TypeScript 4.x, CSS3, XML, JavaScript (ES6+), Angular 2+/12/13/14, React.js (18+), Redux, jQuery, Node.js, Tailwind CSS, Kendo UI
Web Technologies	HTML, DHTML, XML, XAML, CSS, AJAX, JSON, RESTful APIs, GraphQL
Databases	SQL Server 2017/2019/2022, Azure SQL Database, PostgreSQL, MongoDB, Cosmos DB, MySQL
Cloud & DevOps	Microsoft Azure (App Services, Azure Functions, Key Vault, Application Insights, Azure DevOps, Blob Storage), Docker, Kubernetes (AKS), OpenShift, Terraform, CI/CD Pipelines (GitHub Actions, Jenkins)
Web Servers	IIS 7.5/8.0/10.0, Nginx
Scripting Languages	JavaScript (ES6+), Bash, PowerShell, Unix Shell Scripting, batch file scripting
Frameworks	.NET Core 3.1/5/6/7/8, ASP.NET Core MVC, Blazor, Entity Framework Core, gRPC, SignalR
Reporting & Integration Tools	Microsoft SQL Server Reporting Services (SSRS), SQL Server Integration Services (SSIS), Power BI, Telerik Reporting
Source Repositories	Git, GitHub, GitLab, Bitbucket, Azure Repos

Development Environments	Microsoft Visual Studio 2017/2019/2022, Visual Studio Code, Rider
Project Management & Collaboration	Agile, Scrum, JIRA, Confluence, Slack

Education:

- **Master of Science in Computer Science** - Southern Arkansas University, Magnolia, Arkansas.
- **Bachelor of Science in Computer Science** - St.Martin's Engineering College, Hyderabad, India.

Client: Cigna, Plano, TX

Role: *Full Stack .NET Developer*

January 2024 – Present

Responsibilities:

- Developed and maintained web applications using **.NET Core 6/7, ASP.NET Core MVC, C#, Entity Framework Core, and SQL Server 2019/2022.**
- Followed **Agile (Scrum)** methodology — participated in daily stand-ups, sprint planning, reviews, and retrospectives, ensuring timely project delivery.
- Designed, developed, and unit-tested applications using **Visual Studio 2022** and **Razor Pages**, creating dynamic and responsive UI components.
- Built cloud-native solutions by migrating infrastructure from **IaaS to PaaS** using **Azure App Services, Azure Functions, and Azure Key Vault.**
- Managed and deployed **Docker containers** and orchestrated microservices with **Kubernetes (AKS)** and **OpenShift** platforms.
- Created RESTful APIs with **ASP.NET Core Web API** and integrated **gRPC** for efficient microservice communication.
- Implemented modern front-end solutions using **Angular 14+, React.js 18, TypeScript 4.x, JavaScript (ES6+), Bootstrap 5, and Tailwind CSS.**
- Utilized **Blazor** for developing interactive web UIs, ensuring seamless client-server communication.
- Integrated cloud AI solutions using **Azure Cognitive Services** and **Azure Machine Learning** for real-time insights.
- Optimized database interactions with **Entity Framework Core** and **LINQ**, writing complex **T-SQL** queries, **stored procedures, functions, and triggers.**
- Employed **Git/GitHub** and **Azure Repos** for source control, ensuring robust version management and CI/CD pipeline configuration via **Azure DevOps.**
- Enhanced application performance by implementing **Dependency Injection (DI), caching strategies, and asynchronous programming.**

- Developed and consumed **RESTful APIs** and **GraphQL** endpoints for seamless data exchange between client and server applications.
- Used **Kendo UI** components to build rich, dynamic user interfaces.
- Migrated legacy applications from **.NET Framework 4.6.2** to **.NET Core**, modernizing architecture and enhancing scalability.
- Leveraged **Microsoft SSRS** and **Power BI** for reporting and data visualization, ensuring actionable insights for stakeholders.
- Conducted unit testing using **xUnit** and **Moq** to ensure code reliability and maintainability.
- Collaborated with cross-functional teams using **JIRA** and **Confluence** for task tracking and documentation.
- Addressed and resolved production issues by performing root cause analysis and deploying hotfixes, ensuring minimal downtime.

Environment: .NET Core 6/7, ASP.NET Core MVC, Blazor, C#, Entity Framework Core, SQL Server 2019/2022, Visual Studio 2022, Azure DevOps, Docker, Kubernetes (AKS), OpenShift, Angular 14+, React.js 18, TypeScript 4.x, Bootstrap 5, Tailwind CSS, Azure App Services, RESTful APIs, GraphQL, Git/GitHub, JIRA, Power BI.

Client: eBay, San Jose, California

Feb 2022 - Dec 2023

Role: .NET Developer

Responsibilities:

- Developed and maintained web applications using **ASP.NET Core 6**, **C#**, and **Entity Framework Core 6**.
- Implemented **MVC** and **Microservices** architectures for scalable and maintainable applications.
- Created **RESTful** and **SOAP** web services to facilitate data exchange between systems.
- Utilized **Azure Cloud services** for secure and scalable deployment of applications.
- Developed responsive user interfaces using **Angular 13+**, **React 18**, and **TypeScript 4.5+**.
- Worked with **SQL Server 2019**, **MySQL**, and **DynamoDB** for data management, writing complex queries, stored procedures, and triggers.
- Utilized message queue technologies like **Apache Kafka** for efficient data processing.
- Employed **NUnit**, **xUnit**, and **Postman** for thorough testing of applications.
- Implemented **CI/CD pipelines** using **Git**, **Bitbucket**, and **Azure DevOps** for automated deployments.
- Collaborated with cross-functional teams in an **Agile (Scrum)** environment to deliver high-quality software.
- Designed and documented API specifications using **Swagger UI** for easy integration.
- Improved application performance by optimizing code and database queries.
- Implemented **OAuth2** and **JWT** for secure user authentication.
- Conducted code reviews and provided constructive feedback to team members.
- Automated deployment processes, reducing manual effort and increasing reliability.
- Developed custom middleware components in **ASP.NET Core** to handle cross-cutting concerns like logging, authentication, and exception handling.
- Implemented caching strategies using **Redis** and **MemoryCache** to improve application performance and reduce database load.

- Created complex UI components using **Angular Material** and **Bootstrap** for a consistent and responsive design.
- Leveraged **Docker** and **Kubernetes** (versions 1.23–1.25) for containerization and orchestration of microservices.
- Integrated third-party APIs and services to extend application functionalities.
- Conducted performance tuning and load testing using tools like **JMeter** and **Azure Load Testing**.
- Implemented real-time communication features using **SignalR** in **ASP.NET Core** applications.
- Developed custom attribute-based routing and filters for **ASP.NET Core MVC** applications.
- Designed and implemented data migration strategies for legacy systems to new platforms.
- Configured and managed application monitoring and logging using tools like **ELK Stack** (Elasticsearch, Logstash, and Kibana) and **Azure Monitor**.
- Participated in **DevOps** initiatives to streamline development workflows and improve collaboration between development and operations teams.
- Created comprehensive unit and integration tests to ensure application robustness and reliability.
- Managed version control and code branching strategies using **GitFlow**.
- Conducted regular knowledge-sharing sessions and workshops to mentor junior developers and promote best practices within the team.

Environment: Agile (Scrum) methodology, C#, ASP.NET Core 6, Entity Framework Core 6, MVC and Microservices architectures, RESTful and SOAP web services, Azure Cloud services, Angular 13+, React 18, TypeScript 4.5+, SQL Server 2019 (with exposure to SQL Server 2022 for late projects), MySQL, DynamoDB, Apache Kafka, NUnit, XUnit, Postman, Git, Bitbucket, Azure DevOps CI/CD, Swagger UI, OAuth2, JWT, Redis, Docker, Kubernetes (v1.23–1.25), ELK Stack (Elasticsearch, Logstash, Kibana), SignalR.

Client: Renasant Bank, India.
Role: .NET Developer

Jan 2020 - Dec 2021

Responsibilities:

- Involved in requirement gathering, requirement analysis, defining scope, and design by reverse engineering the existing application.
- Worked on **Agile, SCRUM** development methodology.
- Involved in the creation of a lot of User controls and custom controls using **C#, ASP.NET** that build up the pages.
- Created and deployed **ASP.NET (MVC)** using **C#** used them to generate a web application.
- Worked with advanced concepts of ASP.NET Core MVC such as Models and Providers, Filters used for developing backend technology.
- Designed different components using **C#.NET** and built **N-Tier** architecture with extensive use of object-oriented programming techniques like Inheritance, Interfaces etc.
- Worked on various **AWS** cloud activities including AWS virtual machine (EC2 instances), AWS active directory integration, AWS express route and AWS app service.
- Used **ASP.NET** Data Grid, Data List and Repeater controls for displaying the data in a clear format.
- Created intuitive, flexible User Interfaces using latest web technologies using **React**.

- Consumed **WCF** Services responsible for communicating and providing real time data from integrated servers to client applications.
- Developed a web application by using **ASP.NET MVC**, **Web API** with **Entity Framework (EF)** in the environment of **Visual Studio**.
- Used **ASP.NET** Validation Controls for Server-side Validation.
- Worked on **UI** layer using **HTML5**, **CSS3** to build rich, flexible and user interactive web pages.
- Developed and maintained applications using a tech stack that includes **AWS**, **C2S**, **React**, **Angular**, **Python**, **JavaScript**, **TypeScript**, and **Docker**.
- Utilized **LINQ** to Entities extensively for data retrieving, Querying, storing and manipulation.
- Used **ADO.NET** for database connectivity and populated back-end data using **SQL Server**.
- Developed and maintained **PowerShell scripts** to automate daily operational tasks, reducing manual errors and improving system uptime.
- Utilized **PowerShell** for configuration management and deployment automation, ensuring consistent and reliable system setups.
- Used **SQL** as database for writing **SQL queries, joins and stored procedures**.
- Implemented automated UI and end-to-end tests with **Selenium** and **Jasmine**, validating user interfaces and workflows across various browsers and devices.
- Used **TFS** server for version control and to manage agile methodology.

Environment: .Net 4.7, ASP.NET, C#.NET, ADO.NET, WCF, XAML, MVC, Entity Framework, AWS, Razor, Visual Studio, HTML5, CSS3, JavaScript, DOM, Angular 7, LINQ, SQL, TFS, Agile and Windows.
