

RAHUL CHALLA

Irving, Texas | Cell: +1 (510) 399- 9596 | Email: rahul.challa@outlook.com | <https://www.linkedin.com/in/rahul-challa/>

PROFESSIONAL SUMMARY

Diligent and proactive IT Business Data Analyst with 6.5+ years of proven track record in providing critical support for production systems and processes for various Franchise critical applications within the Banking Finance industry with utmost appreciations from Clients. Operated as the NAM regional lead with demonstrated expertise in managing high-impact incidents, conducting in-depth root cause analysis, and implementing long-term solutions to maintain uninterrupted performance and availability of critical systems.

TECHNICAL SKILLS

- **SQL Database:** Oracle SQL, PostgreSQL
- **Programming:** Shell Scripting, Unix/Linux, R-program, HTML, CSS, JavaScript, CAPL, Java basics
- **Technical tools:** ETL, Tectia, Eclipse IDE, BitBucket, RLM, Jenkins CI/CD Pipelines, JIRA, ServiceNow
- **Reporting tools:** Tableau Desktop, Tableau Public, Tableau Server, Tableau Prep Builder and Excel reports
- **Monitoring tools:** ITRS, AppDynamics, IBM GRID, Autosys
- **Cloud:** GCP services, Kubernetes Engine, BigQuery, Cloud Storage, IAM Roles & Policies
- **Operating Systems:** Windows, Linux AMI, Unix/Linux, CentOS, Red hat, Oracle EBS system
- **MS - Excel:** VBA Macros, Pivot table
- **Others:** Exposure to Selenium Manual & Automation testing, Jupyter Notebook, MS Power Point

PROFESSIONAL EXPERIENCE

IT Business Data Analyst

March 2023 - April 2025

Citi Bank (ACE Market Risk Application) - Irving, Texas

- Analyzed ACE Market Risk factors, including fluctuations in trades, rates, asset class pricing to assess potential financial crisis across Citibank's diverse global portfolio, **contributing to more than 20% improvement in risk exposure accuracy.**
- Performed scenario analysis and stress testing on Linux servers, simulating diverse market conditions includes batches downloads and trades process with mappings and catalogs and ACE pricing. Enabled successful delivery of risk pricing to business stakeholders using IBM GRIDs and ITRS tool, before the regional SLA breaches to avoid discrepancy and helping the client avoid financial discrepancies **exceeding minimum \$5M daily.**
- Integrated Shell scripting in Linux to automate repetitive pricing core hour processes, saving **2+ hours per day** and **reducing manual errors by 90%**, significantly increasing processing efficiency and operational reliability.
- Facilitated the timely and accurate delivery of End-of-Day (EOD) Market Risk reports, including various reports for various Runtypes, Stress Testing, and Scenario Analysis, consistently achieving **95% SLA compliance.**
- Assess the impact of changes to core banking systems, applications, and infrastructure, proposing mitigation strategies and ensuring smooth integration with minimal disruption on production systems and processes and ensure that proper procedures are followed, **reducing unplanned downtime by 15%**
- Acted as a key liaison between business users and technical teams, monitor systems performance, health, and availability using ITRS and IBM GRID dashboards, proactively identifying potential issues and generating reports on key metrics using Tableau and efficiently resolving data and reporting inquiries, resulting in a **55% improvement in user satisfaction** and **reducing response time by 40%**
- Contributed to a **20+ successful production releases** by supporting User Acceptance Testing (UAT) and performing thorough post-deployment validations with **zero high-impact incidents.**

- Adept at collaborating with business leaders, cross-functional teams and stakeholders to align technology initiatives with business requirements, translating them into data-driven risk mitigation plans, **increasing operational efficiency by 30%**

IT Business Analyst

November 2019 - February 2023

Citi Bank (Oracle ERP - P2P Payment Application) - Tampa, Florida & Irving, Texas

- Oversaw DML, TCL, DQL processes for analyzing and testing millions of financial transactions, including Invoices, Purchase Orders, Account Payables, against Citi Bank's franchise critical Financial Risk Reporting Payments applications, **across 90+ countries**, leveraging ETL, Oracle SQL, and CI/CD pipelines.
- Negotiated and managed PROD CPU utilizations, space optimizations with multiple vendors, stakeholders, and business leaders to increase space efficiency at reduced costs, this led to lower CPU utilizations across all PROD servers and enhanced P2P application performance, **achieving a 15% reduction in invoice processing time**.
- Designed and optimized **ETL** mappings and transformations to analyze and process unstructured data, filter abnormalities, and convert data as per business requirements, **reducing data processing time by 35%** and improving & ensuring data integrity and accuracy for structured and semi-structured data.
- Design and implement interactive dashboards and dynamic reports using Tableau desktop, and Tableau Server, enabling executives to track application performance and key financial metrics, and customer insights in real time, **leading to a 15% improvement in decision-making speed**.
- Performed SQL-based data analysis and transformations in Oracle SQL, optimizing user payment processes through Concurrent programs in P2P system, **leading to \$2.5 million successful transactions** before NAM regional SLA breaches, preventing penalties from US/Canada government.
- Resolve Techno-Functional issues related to Oracle Purchasing, Account Payables, iProcurement, P2P Xpress, eInvoice, iSupplier (P2P cycle). Involved in Oracle ERP systems Release 12 up-gradation Project, Company Separation project, **Oracle upgrade from R12.1.3 to R12.2.9**
- Utilize the **JIRA** tool for managing, and maintaining appropriate documentation of requirement analysis, design details, and Defect lists with their resolutions, test plans, test cases to enhance current system configuration and tracking user stories, sprints, and project requirements for the application development and enhancements.
- Responsible for analyzing data on various **Oracle SQL** tables and developing SQL scripts as per the business requirements and migrating, and deploying the data fix to DEV, UAT & PROD using **Java Eclipse IDE, Bitbucket, Jenkins CI/CD Pipelines**, and **RLM** tools are effectively utilized in the application development lifecycle, helping streamline testing and deployment processes.
- Responsible for identifying and providing comprehensive technical support throughout the SDLC process, identifying and resolving data issues, corruptions, gaps, and recommending best practices for continuous improvement after working with **Oracle ERP Vendor**.
- Leverage **ServiceNow** for incident, change, and problem management, ensuring timely resolution of issues and smooth integration of new features in line with business rules and SLAs.

IT Analyst

October 2018 - October 2019

Citi Bank (CRS- Real Estate Applications) - Tampa, Florida

- Establish and support development environments independent of server installation, configuration, maintenance and trouble-shooting and responsible for coordination of user acceptance testing. Monitoring and Providing Post Implementation Support doing sanity test and working with functional teams for accurate testing.
- Oversaw scheduling and maintaining Vulnerability Assessments, infra items include CPU, GEM, VTM patches to overcome the security treat for Citibank and working closely with DBA, UNIX, Windows, and Cloud stakeholders to apply the patches successfully every quarter and timely update to business leaders.
- Troubleshooting production ServiceNow incidents that require detailed analysis of issues on web and desktop applications for REALM, REMS, Autosys batch jobs failures, and Oracle SQL database.
- Orchestrating with different stakeholders to move the new servers to BAU and decommissioning old unused servers. Also, playing a crucial role in major disaster recovery activity to ensure Continuity of Business - COB every year and making it successful.

- Resolve complex incidents, monitor solutions, and establish standards, procedures, and guidelines, including supporting and maintaining existing reports and BI solutions.
- Expertise in creating Change Requests after gathering business requirements and moving it to Implementation phase to make the new enhancements and do the validations of PROD and work with DEV to troubleshoot any issues ensure the application is available for the users for BAU activity.

INTERNSHIP EXPERIENCE

Technical Consultant

September 2017 - May 2018

Marist College (Digital Education Department) - Poughkeepsie, NY

- Designing Gateway Sakai website for Marist College using HTML, CSS, and JavaScript.
- Developing, designing, and maintaining a Digital Education website using the Omni Update tool.
- Identify ways to improve design by providing reviews, feedback, and recommendations of developments.

Web Developer

May 2017 - August 2017

Marist College (Web Services Department) - Poughkeepsie, NY

- Developed a website for the '2018 Super Conference' sponsored by Marist College, NEACAC and, NYSACAC using the Life-Ray tool and GIT.
- Handled tickets from clients. Tested and updated the data according to their requirements.

Market Research Analysis Intern

February 2015 - June 2016

IHS Markit (Automotive Semiconductor Industry) - Munich, Germany

- Extensively used MS Excel and Pivot tables for reporting the status in complex Excel sheets.
- Research and data analysis of different ECUs, sensor modules, other PCBs for Infotainment Systems at the BOM level. Research and identify Automotive Tier-1 for each supplier and all ECUs in various domains.
- Prepared a database for MAP & MAF sensors for Powertrain, this includes research on each 'Model' of BMW
- Filtering out the SoCs with the corresponding part numbers of Automotive OEMs such as Toyota, Honda, Ford, etc., for ADAS, Infotainment systems, made research to find the SoC suppliers.
- Built a database, which includes all components such as sensors, and ECUs that includes semiconductor chips for Automotive OEMs (Audi, Volkswagen, BMW) for all domains such as ADAS, Powertrain, Chassis & Safety, Body & Convenience and Infotainment according to the production forecasts by each OEM model, vehicle type and segments.
- Prepared a robust model Semiconductor Market Tracker for Infotainment systems for OEM and AM, which includes Vehicle sales & Segments by regions, Vehicles production by regions, ECU shipments, Attachment Rate, Average Component Per Box, Semiconductor shipments, ASPs, Revenues.
- Master's thesis on hardware architectures & semiconductor components for different Infotainment systems.

Internship and Student Assistant

August 2013 - January 2015

Continental Automotive GmbH (Automotive & Powertrain Industry) - Regensburg/Lindau, Germany

- Developed a VBA program using macros to copy multiple strings from multiple databases to a completely new structured database to reduce manual effort by 10-15 hours weekly.
- Testing the ECUs according to the test plan using Vector CAN.LIN tool and Diagnostic Engineering tool (DET) for Ford Motor Company (FMC) client.
- Conducting the test according to the test plan and generating the necessary report for it in DOORS.
- Built a flashing station and tested BMW '7' Series Front View Multi-Functional Stereo Cameras (MFC4B0-BMW) for applications such as Lane Departure Warning, Traffic Sign Recognition, etc. using different automotive tools and creating and maintaining manuals the test cases.

- Created panels such as Velocity Changer, Acceleration and Steering Angle, Yaw Rate etc., using Vector Canoe. IP VN5610 Ethernet Interface Rest Bus Simulation, CAPL program.
- Installing development tools of BMW such as E-Sys Tool. Testing and Flashing ECUs and ZGW using E-sys tool in HIL station.
- Built and maintained the HIL Simulator using insights information.

ACHIEVEMENTS

- Multiple times Best team awards by the Organization for being the active team player and adapting quickly to the role of Data and Business IT analysis.
- Appreciations from Citibank Senior Vice Presidents in regards of my efficient work as a NAM region coordinator in providing fast and accurate results to the business end users and controlling various Applications and ServiceNow incidents.
- Built a website for New England Association for College Admission Counseling (NEACAC) and New York State Association for College Admission Counseling (NYSACAC) Super Conference, which went live without any PROD issues (<https://superconference.marist.edu/>)
- Built a database for a major South Korean semiconductor company using all systems and semiconductor components in the span of few hours saving around 5000 Euros.

EDUCATION

Marist College - Poughkeepsie, NY

August 2016 - May 2018

- Master of Computer Science in Information Technology
- Specialization: DBMS, Data Mining, Web Technologies, 'R' Program, DSS
- GPA – 3.57/4.0

Technische Hochschule Deggendorf (THD) - Deggendorf, Germany

April 2012 - October 2015

- Master of Science in Electrical Engineering and Information Technology
- Specialization: Automotive and Industrial Drive Systems, Micro and Nano Electronics
- High Honors: First Class Degree

Jawaharlal Nehru Technological University - India

September 2006 - June 2010

- Bachelor of Technology in Electronics and Communication Engineering
- Specialization: Embedded and real time Systems
- High Honors: First Class Degree

PROFESSIONAL CERTIFICATIONS

Google Cloud Certified - Associate Cloud Engineer

January 2025

- Proficient in designing, implementing, and managing cloud infrastructure on GCP

Irving, Texas
