

SHAHRUKH SYED

Email: shahrakh.sde@gmail.com | Phone: +1 (872) 240-4964 | Chicago, IL | [LinkedIn](#)

Accomplished **Software Engineer** with **6+ years** of robust experience in software development across various industries. Proficient in **Java, J2EE, and MVC architecture**, with extensive expertise in designing and implementing microservices using **Spring Boot** and **Java**. Proficient in **front-end technologies** such as **JavaScript, Angular, React** and **jQuery**, and skilled in developing **RESTful services** and managing cloud-based infrastructure using **AWS**. Demonstrated ability to lead projects through the software development lifecycle, from requirements gathering to deployment, ensuring high-quality standards. Adept at using **CI/CD** tools like **Jenkins, Docker**, and **Kubernetes** for efficient deployment processes. Committed to leveraging technical skills and collaborative teamwork to deliver scalable and reliable software solutions that drive business success.

WORK EXPERIENCE

Edward Jones, St. Louis, MO

Mar 2023 – Present

Software Engineer

- Collaboratively worked with business analysts to devise requirements, conduct use case analysis, and execute **functional specification documents (FSD)** to streamline project delivery.
- **Optimized backend performance** by implementing microservices architecture with Spring boot, reducing system downtime and enhancing scalability.
- Authored comprehensive **JUnit test** cases for rigorous unit testing of service classes, enhancing code reliability and maintainability.
- Utilized **AWS** services including **EC2, S3, and RDS** to optimize task execution within cloud-based application environments.
- Configured and integrated **Redis** with Spring Boot applications to enable seamless **caching** and improve system **scalability**.
- Implemented **Docker** for **microservices containerization**, significantly improving development workflow consistency and reducing deployment timelines.
- Utilized **React** to build reusable **UI** components, enhancing user experience and accelerating feature development.
- **Orchestrated Kubernetes clusters** to automate the deployment, scaling, and management of containerized applications, boosting operational efficiency.
- Implemented and maintained **Apache Kafka** to streamline real-time data streaming, enhancing fault tolerance and improving distributed system performance by 20%.
- Performed critical performance validation tests, including load, backend failure, and memory leak assessments, to ensure superior application stability and performance.
- Applied advanced **J2EE** design patterns—such as Front Controller, **MVC**, Business Delegation, and Session Facade—to enhance **software architecture** robustness.
- Developed intuitive user interfaces and web page layouts for various modules using **JSF** and **JavaScript**, improving user engagement and experience.
- Leveraged Hibernate for **ORM**, skilfully mapping data representations from **MVC** models to **Oracle's** relational data model via a **SQL** schema.
- Crafted and maintained **RESTful API** services, which act as robust middleware interfaces between the application and external APIs, incorporating **OAuth2** and **SSO** to fortify web application security.
- Designed and implemented sophisticated stored procedures, triggers, and functions in **PL/SQL**, linked to **Hibernate** configurations to maintain stringent data integrity across Oracle database tables.
- Worked on **multithreading** to manage concurrent tasks and improve application efficiency.

FedEx Corporation, Pittsburgh, PA

May 2022 – Aug 2022

Software Engineer

- Developed a **Spring Boot**-based **RESTful web service** to efficiently handle **CRUD** operations (Create, Read, Update, Delete) for employee requests, with data storage managed in a relational database.
- Introduced new endpoints to existing **microservices**, tailored to meet specific project requirements.
- Leveraged **Eclipse IDE** for application development and configuration; achieved streamlined deployment to development environments via **Jenkins**.
- Implemented **Git** for robust version control, facilitating effective team collaboration and source code management.
- Ensured high-quality code by maintaining code coverage above 85% through extensive unit testing using **JUnit** and **Mockito**.
- Enhanced application functionality using **Angular 8**; designed a dynamic, role-based **HTML** navigation menu utilizing XML database mappings for adaptable user interfaces.
- Managed **Jenkins** for continuous integration, significantly reducing code smells and decreasing the incidence of major, critical, blocker, and minor issues within the codebase.

FedEx Corporation, Pittsburgh, PA
Software Engineer

Jun 2021 – May 2022

- Engaged in **agile scrum** processes, actively contributing to stand-up meetings to monitor and report on project milestones.
- Implemented messaging services using **JMS (Java Message Service)** for asynchronous communication in the project.
- Analysed project requirements thoroughly and communicated critical insights during client reviews.
- Authored detailed technical design documents and led technical reviews to ensure alignment with project specifications.
- Expanded **microservices architecture** by adding new endpoints to meet evolving project needs.
- Engineered and optimized **back-end** components including controllers, service layers, and DAOs using **Spring Boot**.
- Ensured **API** functionality and reliability by conducting tests with tools like **Soap UI** and **Postman**.
- Integrated third-party **APIs**, such as payment gateways and social media logins, into Laravel applications, ensuring seamless data exchange and secure transactions.
- Automated deployment of Spring Boot applications by implementing **CI/CD pipelines** using **Jenkins**, ensuring consistency and reliability.
- Proficient in using the Java **Collection Framework** to manage and manipulate data efficiently

DXC Technology
Software Engineer

May 2018 – May 2021

- Collaborated with **stakeholders** to define and comprehend business requirements while ensuring alignment through regular **client meetings** and status updates.
- Developed and rigorously tested a variety of web and enterprise applications using **Java, Spring Boot, JPA**, and Apache Camel, deploying on **Tomcat servers**.
- Designed and implemented responsive, dynamic websites using **HTML, CSS, JavaScript**, and **TypeScript** to ensure optimal user experience across devices.
- Orchestrated business and integration layers for key modules and created Data Access Object (**DAO**) classes using Spring **ORM** for effective data management.
- Authored comprehensive **unit test** cases and engaged in QA integration testing to maintain high standards of code quality.
- **Implemented microservices communication** using **Eureka Server, Load Balancer**, and **API Gateway** with Spring Cloud, ensuring efficient service discovery and load distribution.
- **Enhanced system reliability and fault tolerance** by integrating **Resilience4j** for circuit breaking, and implemented **Sleuth** and **Zipkin** for distributed tracing and monitoring across microservices.
- Provided technical feedback and insights, working collaboratively with a team of developers to drive project success and enhance workflow efficiency by 10%.

EDUCATION

Masters in Computer Science

Dec 2023

Loyola University Chicago

Bachelors of Science in Information Technology

May 2014

JNTU-H, India

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate ([View](#))
- Microsoft Certified: Azure Fundamentals ([View](#))
- Oracle Certified Professional: Java SE 11 Developer ([View](#))
- Software Development Life Cycle (SDLC) ([View](#))

SKILLS

Java Frameworks: J2EE, Spring, Spring Boot, Spring MVC, Spring Security, Hibernate, micro-services.

Databases: MySQL, MSSQL, Oracle, NoSQL.

Web Technologies: HTML, CSS, JavaScript, Bootstrap, AJAX, JSF, JSP, React, AngularJS, Angular 7,8,11,13.

Deployment Tools: Docker, Kubernetes, Git, Bitbucket, GitHub, Jenkins, Ant, Gradle, Maven.

Clouds: PCF, AWS, EC2, S3, Lambda, IAM, CloudWatch.

Messaging Tools: Apache Kafka, JMS, RabbitMQ

OS: Ubuntu Linux, Windows
