OBJECTIVES

To leverage my technical expertise and analytical skills in a challenging and innovative environment that fosters growth and organizational excellence.

CERTIFICATION

1. CSM- Scrum Alliance
2. Microsoft Azure AZ-900

PROFESSIONAL SUMMARY

- A highly skilled and seasoned Senior .Net Developer with over 11 years of comprehensive experience in the IT industry, specializing in the design, development, and implementation of robust client/server, web, and Windows applications. Demonstrated expertise in leveraging the full capabilities of the Microsoft .NET framework and C# programming language to deliver scalable and efficient solutions. Adept in all phases of the Software Development Life Cycle (SDLC), from requirements gathering and analysis through to deployment and support.
- Possesses a deep understanding of object-oriented programming principles, design patterns, and best practices. Expert in developing secure, high-performance web applications and services using ASP.NET, MVC, Entity Framework, and Web API, complemented by strong front-end development skills in HTML5, CSS3, JavaScript.
- Proficient in developing Windows and web applications with the .NET framework, including C#, ASP.NET, ADO.NET, MVC, SQL Server, Entity Framework, WCF, WPF, and Web services.
- Expertise's in object-oriented programming (OOP), analysis (OOA), design (OOD), and design patterns.
- Strong experience in managing security policies: Authentication, Authorization, Identity, Encryption, Personalization, Membership, Roles, Profiles, and Resource Access Control.
- Skilled in implementing 3-Tier Architecture: Data Access Layer (DAL), Business Logic Layer (BLL), and User Interface (UI). Hands-on experience with source code management tools like Git and Subversion.
- Proficient in developing Continuous Integration/Delivery pipelines and automation/integration.
- Familiar with cloud service providers Azure.
- Developed Windows applications using WPF and SOA applications using WCF.
- Implemented WEB API REST services communicating in XML and JSON.
- Experience with SOAP, WWF, Silverlight, SQL Server, LINQ, and Entity Framework.
- Skilled in ADO.NET components, Win32 kernel internals, developing SSIS packages, and generating reports with SSRS.
- Versed in version control with TFS, VSS, GIT, and SVN.
- Configured WCF endpoints, behaviors, Bindings, and contracts.
- Strong experience with OOP concepts, multithreading, exception handling, and memory leakage debugging.
- Conducted unit testing with NUnit, integration, performance.
- Worked on third party tools like Airtable, Filestack, Twilio, Plivo
- Developed numerous integration services using SOAP/API with C#.

TECHNICAL SKILLS

Web Technologies	HTML4/HTML5, CSS/CSS3, XPATH, Bootstrap, AJAX, JSON, XML, XSL, XSLT
Programming Languages	C#, ASP.NET, MVC, ADO.NET, Web Forms, Web Services, WCF and LINQ
Frameworks	.NET Framework all versions .NET Core all versions
IDE Tools	Visual Studio 2022/2019/2015/2013/2012/2010/2005
Design Patterns	MVC, MVP, MVVM
Intermediate Technologies	Web API, WCF, Web Services
Databases	SQL Server all versions
Application Servers	IIS 6.0, IIS 5.0.
Source Control	GIT, TFS (Team Foundation Server), VSS (Visual Source Safe), SVN
Database Utilities	SQL Server Management Studio, SQL Server Enterprise Manager, SQL Server Profiler
Web Debugging Tools	Fiddler, Developer Tools, Postman HTML Agility Pack
Operating Systems	Windows Server 2000/2003, XP/Vista/7.
Project management tools	Airtable, Azure Devops, Jira, Confluence.
Payment Gateway	Authorize.Net
Others	Web API OOP SOAP Postman Fiddler WCF SOA REST XML&XSD YAML JSON SOAPUI GIT AZURE Database Management SQL Server RabbitMQ Micro Services Communication Teamwork &Collaboration Rapid learning Language Skills Technical skills Troubleshooting. Various.Net libraries Seri log Auto mapper Dapper Redis

PROFESSIONAL EXPERIENCE

Capgemini

Aug 2024- March 2024

Role: Manager,

Client: AMFAM (American Mutual Insurance), USA

Nov 2024- March 2025

Domain: Insurance

Responsibilities:

- Handled the team of 9 developers(both OnShore and OffShore)
- Software Development Lifecycle Expertise: Spearheaded comprehensive involvement in all phases of the software development lifecycle (SDLC), from analysis and design to implementation, testing, and deployment, ensuring robust and scalable software solutions.
- Agile Scrum Leadership: Demonstrated leadership in Agile Scrum environments by actively participating in and occasionally leading status meetings, code reviews, and sprint planning sessions, contributing significantly to the team's agile practices and project deliverables.
- Implemented Serilog for all the pods in the micro services.
- Migration of the applications from .Net 3.1 to .Net 8.0
- Deployment Tracking and Reporting: Perform thorough deployment tracking and status reporting, providing stakeholders with comprehensive, up-to-date insights.
- Leadership and Mentorship: Provided invaluable mentoring and training to team members on the functional flow of the application and micro services.

- Conducted weekly performance reviews against established targets, analyzing incident/ticket resolution metrics to provide insightful feedback and drive continuous improvement.

Environment: Visual Studio 2019, C#, .NET 4.7, .NET CORE 3.1, .Net Core 8.0, MS SQL Server 2017, ASP.Net MVC 5.0/4.0, Entity Framework Core 6.0/5/4.3, Azure DevOps, Git , Bootstrap, LINQ, Jira, Confluence.

Client: PowerCircle Axa IM, USA

Aug 2024- Nov 2024

Domain: Insurance

Responsibilities:

- Handled the team of 6 developers(both OnShore and OffShore)
- Engaged comprehensively in the Software Development Lifecycle (SDLC), ensuring thorough analysis, design, development, testing, and deployment of software applications.
- Agile Scrum Leadership: Demonstrated leadership in Agile Scrum environments by actively participating in and occasionally leading status meetings, code reviews, and sprint planning sessions, contributing significantly to the team's agile practices and project deliverables.
- Developed web API endpoints and implemented JWT token authentication.
- Designed logic for investment calculations based on criteria passed.
- Developed background processes to import data from Excel sheets.
- Conducted unit and integration tests using Nunit and collaborated on architecture changes.
- Deployed using CI/CD pipeline.
- Code review of the peers

Environment: Visual Studio 2019, C#, .NET 4.7, .NET CORE 3.1, .Net Core 8.0, MS SQL Server 2017, ASP.Net MVC 5.0/4.0, Entity Framework Core 6.0/5/4.3Web API, Azure DevOps, Git, LINQ.

Client: Metasys Software.

Feb 2014 to Aug 2024

Role: Technical Lead

Client: Netemb (G7 Solutions, USA)

Jan 2018 to Aug 2024

Domain: Product

Responsibilities:

- Handled the team of 14 developers.
- Involved in each phase of the project like Requirement Gathering, Analysis, RFP Document, Estimation, designing, coding, unit testing and deployment.
- Excelled in crafting high-quality designs utilizing RESTful web services, jQuery, HTML, CSS, and w3DS, showcasing expertise in modern web technologies.
- Spearheaded the development of robust applications employing ASP.NET, MVC, Web API, Entity Framework demonstrating advanced .NET framework skills.
- Demonstrated proficiency in web development with extensive use of Ajax, TypeScript, jQuery, JSON, XSLT, CSS, and HTML5, delivering dynamic and interactive web applications.
- Mastered the creation of insightful reports using Crystal reports.
- Utilized Visual Studio 2019 and .Net CORE 8.0 Framework for the implementation of sophisticated business logic, showcasing cutting-edge .Net development skills.
- Enhanced client-side experiences using Ajax with jQuery, JavaScript, and JSON, focusing on creating responsive and interactive web interfaces.
- Developed high-performance database applications in C# with SQL Server and Microsoft Access, leveraging ADO.NET components for optimal data access and manipulation.
- Showcased expertise in client-side web development using HTML, CSS3, Bootstrap, creating engaging and user-friendly web interfaces.

- Designed and developed comprehensive Windows Forms, Web Forms, and Web Services, utilizing ASP.NET, XML Dataset, and the .NET Framework, following agile methodology practices.
- Authored advanced T-SQL queries, triggers, CTEs, functions, and stored procedures in SQL Server 2016, enhancing database functionality and performance.
- Worked on the performance of the application.
- Migrated the project from .Net framework to .Net Core framework.
- Worked on ISD architecture.
- Wrote sophisticated business logic in C# to interface with database stored procedures, enhancing application functionality and data interactions.
- Revitalized websites with HTML5/CSS3/JavaScript and Bootstrap, backed by SQL databases, delivering modern, responsive designs and robust backend functionalities.
- Implemented efficient data access using ADO.NET and LINQ, optimizing data retrieval and manipulation for high-performance applications.
- Utilized multithreading techniques to develop concurrent applications, ensuring efficient code execution and system stability.
- Developed SOAP-based XML Web Services for critical business logic components like financial account management and purchase orders, enhancing system integration and functionality.
- Code Review of the peers.
- Written unit test cases using Nunit.
- Implemented code to import the data from 3rd party tools like Airtable, Excel, FTP, Email.
- Scheduled the background process on VM in Task scheduler

Environment: .NET/C# development, JavaScript, JSON, XML, REST, WCF, and MVC, HTML5, Java Script & Java Script Razor, REST Service, Web API, HTML, HTML5, CSS, SQL 2014,

Client: Boston Pads USA

Jun 2015 to Jan 2018

Domain: Real Estate

Responsibilities:

- Spearheaded the development of a sophisticated application module leveraging ASP.NET 4.0, MVC, C# 4.0, and SQL Server 2008, employing a Test-Driven Development (TDD) methodology to ensure robustness and reliability.
- Crafted and maintained efficient Stored Procedures using T-SQL, enabling sophisticated database operations and interactions.
- Implemented the Model-View-Controller (MVC) design pattern, ensuring a clean separation of concerns and enhancing application maintainability.
- Engaged in the development of APIs and Web Services utilizing AJAX, JSON, XML, ensuring dynamic data exchange and system interoperability.
- Designed captivating web applications and websites with DHTML, HTML Custom controls, CSS, XML, focusing on aesthetic appeal and user engagement.
- Implemented Bootstrap for responsive design, mastering the Grid Control System for optimal layout and presentation across devices.
- Advanced the development of application modules using ASP.Net MVC 4.5, driving innovation in web application development.
- Authored efficient Stored Procedures and Packages using SQL Server 2012, optimizing database functionality and performance.
- Managed project codebases with Team Foundation Server (TFS), ensuring version control and collaborative development practices.

Environment: HTML5, CSS3, C#, ASP.NET MVC, jQuery/UI, API, AJAX, Razor Engine, JavaScript, NuGet Packages, Coded UI, Word, Excel.

Client: IMAS UK

Feb 2014 - Jun 2015

Domain: Finance

Responsibilities:

- Worked on Google charts to display the data on UI
- Implemented the Web API to return the data as per input values.
- Implemented and hosted various scheduler's

Environment: HTML5, CSS3, C#, ASP.NET MVC, jQuery/UI,API, AJAX, Razor Engine, JavaScript, NuGetT Packages, Coded UI, Word, Excel.
