

TOPE EZEINO

CLOUD SECURITY ENGINEER/DEVOPS ENGINEER

Dallas, TX 75287 | +1 (626)698-5577 | ezeinotope8@gmail.com [Linkedin](#)

SUMMARY

Cloud Security/DevOps Engineer with over 7 years of experience in architecting and managing secure cloud infrastructures utilizing **AWS, Google Cloud, and Cisco technologies**. Skilled in a wide tech stack, including **Amazon EC2, S3, RDS, VPC, Terraform, Ansible, Jenkins, Docker, Kubernetes (AWS EKS, GCP GKE)**, Puppet, Chef, and CI/CD tools. Expertise in deploying AI-driven security solutions, integrating **Cisco Duo MFA**, and automating processes to enhance operational efficiency and ensure compliance. Successful in designing **resilient security models**, conducting **large-scale data migrations**, and implementing proactive monitoring solutions. Adept at problem-solving and enhancing system resilience through automation. Seeking to leverage my technical expertise to drive innovative cloud initiatives.

SKILLS

Cloud Platforms:	AWS, AWS GovCloud, Microsoft Azure, GCP, Salesforce, Orock
Security & Compliance:	SAST, DAST, WIZ, Sentinel, Amazon Inspector, Splunk, AWS Config, AWS CloudTrail, AWS CloudFormation, AWS CIS Benchmark, Okta, Crowdstrike, CISSP, OWASP, NIST, ISO 27001, CISBenchmark, FISMA, FIPS, HIPAA, GSA/NDA
Cloud Services:	AWS S3, Azure Applocker, AWS Lambda, API Gateway, CloudFront, Apache, MySQL, EC2, ELB, S3, IAM, SNS, RDS, KMS, Data Pipeline, CloudWatch
Infrastructure as Code (IaC):	Terraform, Ansible, AWS CloudFormation
Containers & Orchestration:	Kubernetes, Docker
Programming & Scripting:	Python, SQL, Postgres, Java, Spring Boot, Bash, RUBY
Networking & Protocols:	TCP/IP, DNS, SMTP, HTTP, NAT gateways, Proxies, VPC
CI/CD & DevOps Tools:	Jenkins, Nexus, Maven, Git, Bitbucket
Logging & Monitoring:	Kinesis agent, Kinesis Analytics/Firehose, Elasticsearch, Kibana, CloudWatch
Identity & Access Management:	IAM, Okta
Security Tools:	XSS, AWS Inspector, WIZ, Sentinel, Amazon Inspector
Operating Systems:	Linux, Windows

WORK EXPERIENCE

SRE/ Cloud Engineer | BDR Solutions LLC

September 2022 – Present

- Led on-premise to cloud migration projects across AWS, Azure, and GCP, optimizing cloud resources for enhanced performance and scalability, including managing multi-cloud environments and ensuring compliance with government security standards such as AWS GovCloud and Azure Government.
- Developed and maintained CI/CD pipelines using tools like Jenkins, AWS CodePipeline, and CodeBuild, integrating automated testing, security scans, and deployment processes to streamline software delivery and reduce deployment times by up to 80%.
- Provisioned and automated cloud infrastructure using Infrastructure-as-Code (IaC) tools such as Terraform and AWS CloudFormation across AWS, Azure, and GCP, reducing system provisioning and deployment time by up to 60%.
- Implemented security and compliance strategies using AWS IAM, VPC, KMS, and CloudTrail, along with comprehensive security assessment tools like SAST, DAST, WIZ, and Sentinel, resulting in a 60% reduction in breach incidents and adherence to standards such as NIST, ISO 27001, FISMA, and HIPAA.
- Managed containerized applications with Docker and Kubernetes, administering clusters on AWS EKS and Azure Kubernetes Service (AKS), achieving high availability and scalability with 99.99% uptime for hightraffic applications.
- Automated configuration management and infrastructure activities using Ansible, Chef, and custom scripts in Ruby, Bash, and Python, ensuring consistent deployment, management of cloud resources, and reducing manual effort in infrastructure tasks.
- Optimized application performance and latency by incorporating Content Delivery Networks (CDN) and configuring Nginx as a reverse proxy for SSL termination and client authentication, improving application response times by 40%.
- Spearheaded the deployment and management of applications in containerized environments using Docker, Kubernetes, and ensuring 99.9% uptime across development, staging, and production environments

Cloud DevOps/ Security Engineer | Cisco, Dallas, TX

September 2022 – August 2024

- Deployed and managed Amazon EC2 instances using AWS CLI, Terraform, and CloudFormation, ensuring 99.9% uptime and resolving instance-level issues 30% faster through automated monitoring with AWS CloudWatch.
- Configured and secured AWS environments using Elastic IPs, Security Groups, IAM roles, Virtual Private Cloud (VPC), NACLs, and Elastic Load Balancing (ELB) to strengthen cloud security and ensure compliance with industry standards.
- Automated infrastructure provisioning and backups using AWS CLI, Ansible, and Jenkins, reducing manual intervention by 40% and ensuring 100% data recovery compliance through nightly AMI creation and S3 snapshot automation.
- Developed and managed containerized applications using Docker and Kubernetes (AWS EKS & GCP GKE), leading to a 50% improvement in deployment speed and seamless auto-scaling for high-availability microservices.
- Optimized network security and traffic flow using Cisco Networking Cloud, load balancers, auto-scaling, security groups, and NACLs, improving system resilience and reducing unauthorized access incidents by 35%.
- Integrated Cisco's Duo Multi-Factor Authentication (MFA) into cloud access policies, enhancing IAM security and reducing unauthorized access attempts by 50%.

- Automated configuration management with Puppet and Chef, setting up Puppet Master, agent nodes, and admin workstations to ensure consistent system state and compliance across cloud environments.
- Managed Kubernetes namespaces and OpenShift PaaS environments, streamlining on-prem to cloud migration and improving deployment efficiency
- Developed and maintained CI/CD pipelines using Jenkins, Ansible, and Git, reducing software release cycles by 40% and increasing deployment reliability.
- Deployed AI-driven cloud security solutions (Cisco Valtix & Armorblox) for threat detection and network segmentation, strengthening security postures for cloud applications.
- Implemented real-time monitoring and alerting with CloudWatch, Nagios, Splunk, and Google Stackdriver, reducing system downtime by 25% through proactive anomaly detection.
- Developed shell, Python, and Ruby scripts for automation of backup scheduling, log monitoring, and system health checks, reducing manual effort and improving operational efficiency.
- Managed RedHat, CentOS, and Debian Linux servers, optimizing Logical Volume Manager (LVM) for storage efficiency, ensuring stable infrastructure across multiple data centers.

Cloud DevOps Engineer | Protiviti, TX

June 2020 – August 2022

- Designed and implemented AWS cloud security models for IaaS, PaaS, and SaaS, improving cloud infrastructure resilience by 40% and reducing security risks.
- Converted AWS infrastructure to a serverless architecture using AWS Lambda, securing workloads and reducing infrastructure costs by 30%, with deployment automation via Terraform.
- Migrated 50TB+ of sensitive data from on-premises to AWS Cloud using AWS Import/Export Snowball, ensuring encrypted data transfer with zero security breaches.
- Developed and enforced IAM policies, VPC security, and network access controls, leading to a 25% reduction in security incidents and improved compliance with SOC 2 and ISO 27001 standards.
- Created and managed AWS security configurations using EC2, S3 encryption, IAM roles, EBS snapshots, Security Groups, Auto Scaling, and RDS to enhance data confidentiality and availability.
- Automated security compliance checks using AWS Config, Security Hub, and GuardDuty, reducing manual efforts by 40% and identifying vulnerabilities proactively.
- Implemented and monitored AWS WAF and Shield Advanced to protect against DDoS attacks, successfully mitigating 95% of unauthorized access attempts.
- Developed Docker-based security-hardened images and deployed them on Kubernetes clusters, improving container security and reducing vulnerability exploitation risks by 35%.
- Designed and deployed ELK stack (Elasticsearch, Logstash, Kibana) for real-time log analysis, enhancing incident detection and reducing response time by 50%.
- Configured and maintained AWS CloudTrail and CloudWatch security monitoring to track API activity and detect anomalies, strengthening cloud audit and forensics capabilities.
- Led cloud security automation initiatives with Terraform and Ansible, reducing infrastructure misconfigurations and ensuring 100% compliance with security best practices.

Cloud Engineer | Insight Global, Houston, TX

March 2018 – May 2020

- Designed and deployed automated infrastructure setups using AWS CloudFormation, ensuring consistency and reducing manual intervention.
- Deployed, managed, and operated highly available and fault-tolerant systems on AWS, optimizing performance and reliability.
- Provisioned and configured EC2 instances using various AMIs, tailored for development, testing, and production environments.

- Configured and maintained Virtual Private Clouds (VPCs), including public and private subnets, NAT instances, Elastic Load Balancers (ELBs), and routing tables for secure and efficient communication.
- Managed 500+ S3 buckets across environments. Enabled versioning and lifecycle policies for data retention, with archival strategies leveraging Amazon Glacier.
- Configured and managed Route 53 for efficient DNS routing, ensuring secure and reliable end-user application access.
- Implemented application functionality and optimized performance on Amazon RDS, including MySQL and MariaDB configurations.
- Configured 50+ security groups and IAM roles to control access. Designed robust policies to enhance AWS resource compliance and security.
- Set up alarms using CloudWatch and integrated with SNS to monitor server performance, CPU utilization, and system health metrics.
- Configured 10+ auto-scaling groups to handle variable traffic loads. Deployed Elastic Load Balancing (ELB) to ensure high reliability during traffic spikes.
- Created AMIs, snapshots, and implemented disaster recovery strategies to ensure data integrity and high availability.
- Utilized AWS tools like CodeDeploy, CodePipeline, and CodeCommit to streamline development workflows and automate CI/CD pipelines.

EDUCATION

Bachelor of Science: Accounting Jul 2011

Lead City University - Ibadan, Nigeria

CERTIFICATIONS

- ❖ AWS Certified Solutions Architect (Associate) – Amazon Web Services
- ❖ AWS Certified Solutions Architect (Professional) – Amazon Web Services
- ❖ AWS Security Specialist – Amazon Web Service
- ❖ Microsoft Azure Fundamental
- ❖ Certified Project Manager
- ❖ Certified Program Manager
- ❖ Comptia CASP+
