

Name: Vijaya Lakshmi
Mail ID: gollavijaya1998@gmail.com
Ph.no: +1 (469)943-1611

PROFESSIONAL SUMMARY

- Around 8 years of experience on switches, routers, firewalls, and load balancers. Have good experience in the operations team working on troubleshooting tickets.
- Configuring Routing protocols like BGP, OSPF, MPLS, multicast, and L2 protocols in ASA to check that they are passing through via ASA in customer deployments.
- Experience in installation and configuration of Cisco switches (2950, 2960, 3550, 3750, 4500, and 6500) and Cisco routers (2500, 2600, 3000, 3800, 6500, 7200, 7500 and 7600).
- Experience in setting up Cisco routers to perform functions at the access, distribution, and core layers.
- Working experience in creating VLANs in Cisco switches and setting up inter-vlan routing on multi-layer switches such as Cisco 4500 and 6500.
- Experience in designing, documenting, deploying, and supporting LAN and WAN network equipment, with distribution, core, and data center LAN services.
- Rebuilding data centers and redundant sites for failover, F5 load balancers.
- Having Data Center Design Experience, installing and configuring Network Devices in the Data Center, including patching the cables in the patch panel.
- Experienced in securing configurations of SSL/VPN connections, troubleshooting Cisco ASA firewalls, and related network security measures.
- Worked on configuration, maintenance, and administration of Palo Alto PA3000 Firewalls and migrating customers from Cisco ASA to Palo Alto network.
- Experience in migrating policies from checkpoint firewall and Cisco ASA to Palo Alto.
- Experience with working on firewalls like CISCO ASA 5500 series (5510,5540), JUNIPER SRX series, and PALO ALTO (pa-3060, pa-5060), etc...
- In-depth knowledge and experience in IP Addressing, Subnetting, VLSM, ARP, Ping concept, working knowledge on OSI model, TCP/IP, 802.1q. Working experience on Cisco Virtual Office solution.
- Experience with working on the latest Cisco switches like Nexus 2000, 5000, 6000, and 7000 series switches while implementing advanced features like VDC, VPC, OTV, and Fabric Path.
- Troubleshoot Data center network issues, Cross connectivity, and WAN Backbone issues between Data centers.
- Experience in using network monitoring tool Solar winds.
- Using Solar Winds to generate reports on WAN utilization.
- Implemented, analyzed, and recommended appropriate systems for out-of-band management monitoring. Utilizing Solar winds for primary and disaster recovery sites.

TECHNICAL SKILLS:

Networking Technologies	LAN/WAN Architecture, TCP/IP, SD-WAN, VPN, VLAN, VTP, NAT, PAT, STP, RSTP, PVST, MSTP, CISCO ACI
Networking Hardware	Cisco Switches, Cisco Routers, ASA/ Palo Alto/Fortinet/Juniper firewalls.
Routing Protocols	OSPF, ISIS, EIGRP, RIP, MPLS, IS-IS, BGP, Multicasting
Security Technologies	PAP, CHAP, Cisco, Blue Coat, Palo Alto, ASA, Fortinet, Checkpoint
Network Monitoring & Management tools	Snowflake, SolarWinds, Wireshark, HRping, WhatsUp Gold, Infoblox, Splunk, Nagios, ExtraHop Networks, FortiNDR, IronDefense, Obkio, CISCO ThousandEyes, NetBeez Network Monitoring, HP OpenView, Orion.
Operating Systems	Windows 10, LINUX, Cisco IOS, Cumulus, IOS XR, IOS-XE, NX-OS
Routers	Cisco ASR 9000 Series, ISR 800 Series, ISR 1900 Series, ISR 2900 Series, ISR 3900 Series, and ISR 4000 Series, CISCO 1800, 2611, 2800, 3600, 3845, 3900,4300, 4400, 4500, ASR 1000X, 7206VXR, Juniper M & T Series.
Load Balancers	F5 Networks (BIG-IP), NetScaler (Citrix), CISCO ADC
Capacity & performance	Cascade Riverbed (Flow Monitor), WAN Killer
Switches	CISCO 2960,3750,3850, CAT 9300, CAT9400, CAT 9500, 4500, 6500, 6800 Nexus 9K,7K,5K,2K, Arista cloud Switches
Programming Languages	C, C++, Perl, Power Shell, Python, Yang, XML, Ansible
Simulation Tools	GNS3, VMware, OPNET IT GURU, OPNET Modeler, Cadence
Firewalls	Juniper Net Screen (500/5200), Juniper SRX (650/3600), ASA (5520/5550/5580), McAfee Web Gateway, Checkpoint, Palo Alto Firewalls.
AAA Architecture	TACACS+, RADIUS, Cisco ACS
Features & Services	IOS and Features, HSRP, GLBP, VRRP, IPAM IRDP, NAT, SNMP, SYSLOG, NTP, DHCP, CDP, DNS, TFTP and FTP Management, Open Stack, IVR's, HLD and LLD documents, Dell equal logics

PROFESSIONAL EXPERIENCE:**Client: Caterpillar, Chicago, Illinois (Remote)****Sep 2024 – Present****Role: SDN Network Engineer****Responsibilities:**

- Configured SDN-based WAN optimization using Cisco SD-WAN (Viptela) to enhance application performance and user experience across distributed locations.
- Developed and implemented security policy around the Cisco ACS (Authentication Control System), with RADIUS and TACACS authentication support against an Active Directory database, including device management, wireless and VPN applications.
- Configure and Maintain Authentication Services such as Alight Cisco ACS and Aruba ClearPass around the environment with troubleshooting AAA (TACACS+ & RADIS) services for users.
- Configure and manage Cisco routers and switches, including Catalyst, Nexus, or Arista EOS platforms, to facilitate efficient data transmission and network connectivity.
- Configuring VPC (Virtual Port Channel), VDC (Virtual Device Context) in Nexus 7010/7018
- Configured Nexus 2000 Fabric Extender (FEX), which acts as a remote line card (module) for the Nexus 5000 to connect servers and storage devices.

- Working on Cisco ISE and advanced technologies like QOS, Multicasting, MPLS MPLS-VPN, and Bluecoat proxy server SG.
- Integrated EIGRP with MPLS on Cisco CSR 1000V to provide scalable and efficient routing for virtualized environments.
- Implemented FortiGate 3000D with firmware version 6.4, utilizing SSL inspection, deep packet inspection, and advanced threat protection for robust network security.
- Supported and executed migration to F5 BIG-IP LTM/GTM ADC Appliances from Citrix NetScaler.
- Automation using iControl and Python v3 for configuration and backups in F5.
- Configured F5 LTM, series 5000 series for corporate applications and high availability. Implemented LTM and GTM in DMZ and Internal network. Worked on software versions up to 12.1.2. Experience with upgrading software and hotfix.
- Configuring, implementing, and troubleshooting F5 and Citrix Load Balancer in a large environment with sensitive applications.
- Elastic Load Balance and on-premises F5 and Software load balance (Oracle Traffic Director) administration and configuration.
- Deployed and Managed SDWAN network (Cisco Viptela Solution) for WAN connectivity.
- Deploy and Maintain SDWAN solutions, routers and Switches, Cisco ASR, Juniper SRX, and Fortinet firewalls.
- Configured SDWAN Viptela to connect remote sites over the Internet.
- Demonstrated unparalleled expertise in 802.11 standards, including a/b/g/n/ac/ax, Wi-Fi security modes, Wi-Fi Mesh network, Wi-Fi 6e, and Wi-Fi performance parameters.
- Working with broadband technologies, including DOCSIS and DSL, as well as wireless technologies such as LTE, 5G, 802.11ax (Wi-Fi 6), and WPA3.
- Working with Aruba and Cisco Wireless LAN controllers (WLC), Configuring and Provisioning APs, Virtual APs, RTLS, Wireless SSIDs, remote and campus APs, upgrading WLC, worked in Active/Active local Controllers and Master controller. Worked on RAP3 for remote access.
- Quality Inspections and Operational Test (OT) events related to the 2GWLAN Aruba Networks Controllers and Access Points (Aruba 6000 controller, Aruba AP65,70,124,85,125) system.

Client: Quest Diagnostics, Secaucus, NJ

July 2023 - Aug 2024

Role: Network Engineer

Responsibilities:

- Configuring and deploying routers, switches and APs throughout the campus and at remote locations. Layer 2 and Layer 3 troubleshooting.
- Building Site-to-Site VPNs on Cisco ASA firewalls and FortiGate firewalls.
- Adding and editing access policies and URL filtering. Network equipment refresh throughout the campus.
- Troubleshooting wireless and VoIP issues. CUCM, CUI and UCXX administration.
- Versioning of the configuration files and allowing teams with the support of Terraform to collaborate effectively by using version control systems like Git.
- Experience with Netconf protocols to automate configuration management across multi-vendor network environments, reducing manual tasks and minimizing configuration errors.
- Applied Yang data models to create flexible, scalable configurations for complex networks, enhancing network agility and reducing downtime during updates.
- Deployed network provisioning tasks using Netconf and Yang, streamlining setup for new devices and services in SDN and hybrid cloud environments.

- Integrated REST APIs with various network management systems to enable seamless data exchange between network devices and monitoring systems, improving visibility into network performance and enhancing response times for incident resolution.
- Work on AWS and Azure Cloud connectivity, Cloud Networking, and Cloud security. Worked on Equinix Cloud Exchange provider.
- Managed Docker containers for efficient application deployment and utilized Kubernetes for container orchestration, including automated scaling and rolling updates.
- Configured Kubernetes network policies, load balancing, and service discovery to ensure secure, high-performance communication between microservices.
- Working with Bash and Python scripting with a focus on DevOps tools, CI/CD, and AWS Cloud Architecture and hands-on Engineering. Deployed advanced malware protection (AMP) on Cisco FTD 9300 Series, using sandboxing and threat intelligence to detect and block zero-day threats.
- Used S3 and RDS to store EC2 and AWS lambda for computation and Cloud watch to monitor.
- Integrated Snowflake into CI/CD pipelines using Jenkins to automate deployment and testing processes.
- Working on Palo Alto Firewalls, implemented Security Policies using ACL, Firewall, IPSEC, SSL VPN, IPS/IDS, AAA (TACACS+ & RADIUS).
- Serve as a subject matter expert for the customers Palo Alto PRISMA Access, Cloud Palo Alto Next Gen Firewalls (NGFW), and SaaS SASE services.
- Palo Alto design and installation (Application and URL filtering, Threat Prevention, Data Filtering). Configured and maintained IPSEC and SSL VPNs on Palo Alto Firewalls.
- Work on Google Cloud Platform (GCP) services like computer engine, cloud load balancing, cloud storage, cloud SQL, stack driver monitoring, and cloud deployment manager.
- Configured Google Cloud DNS for scalable domain name resolution, optimized performance, and reliability.
- Managing and administering Juniper SRX and Checkpoint Firewalls at various zones, including DMZ, Extranet (Various Business Partners), ASZ, and internal.

Client: Infodot Technologies Pvt Ltd, Bengaluru, India

Dec 2021 - Jun 2022

Role: Sr. Network Engineer

Responsibilities:

- Led the transition of Cisco Catalyst Switches (9200/9300) and Nexus switches to Extreme Networks, ensuring minimal downtime and seamless integration.
- Managed the upgrade of telephony systems from Avaya to Cisco, significantly improving communication reliability and efficiency.
- Upgraded Cisco ASA firewalls to Palo Alto Networks and successfully clustered six Palo Alto PA-6050 firewalls to enhance network security. Also managed Cisco Firepower 1150 and 1010 Next Generation Firewalls.
- Configured and maintained routing and switching protocols (OSPF, BGP, VTP, STP, GLBP, HSRP), ensuring high network performance and reliability.
- Configured ISE Guest Services, enabling secure temporary network access for hospital staff and contractors.
- Administered F5 Load Balancers (LTM, GTM), implemented network solutions within Microsoft Azure, managed Meraki MS250 & MR42, and configured Cisco wireless controllers. Utilized Visio for network mapping and SolarWinds for network monitoring.
- Environment: Catalyst Switches- 9200/9300, Meraki-Ms250&MR42, Cisco Firepower1150,1010 Next Generation Fire Walls, LAN, WAN, Switching protocols (VTP, STP, GLBP, HSRP) Visio for Network maps and SolarWinds for Network Monitoring.

Client: Zones India, Bengaluru, India

Jul 2019 - Nov 2021

Role: Network Engineer

Responsibilities:

- Provided network engineering and administration support from a centralized NOC. Responsible for 24/7x365 oversight of (12) campus area networks spread throughout Southwest Asia.
- facing role embedded with regional network administration team.
- Supported 1000+ Cisco 6500, 4500, 3700 and 3600 series routers and switches. Supported hundreds of KG-175 TACLANE devices. Worked closely with local and remote Network Administration teams to resolve trouble tickets related to daily network troubleshooting, operation and maintenance tasks.
- 802.1x, Microsoft Active directory security group administration and troubleshooting support.
- Supervised implementation of enterprise-wide configuration changes. Provided analysis and subject matter expertise to military leadership during change control boards.
- Monitored networks with WhatsUp Gold software and proactively responded to outages. Expert troubleshooter during critical service outages and degradations.
- Trained local and remote network administrators in the configuration, operation and maintenance of Cisco routers and switches.

Client: Systems Plus Solutions, Pune, India

Aug 2016 – Apr 2019

Role: Jr. Security Engineer

Responsibilities:

- Perform threat modeling of the applications to identify the threats.
- Identify issues in the web applications in various categories like Cryptography and Exception Management.
- Worked on installation, configuration, and administration and troubleshooting of LAN/WAN infrastructure.
- Risk assessment on the application by identifying the issues and prioritizing the issues based on risk level.
- In the team, the focus of work was to audit the application prior to moving production.
- Explanation of the security requirements to the design team in the initial stages of SDLC to minimize the efforts to rework on issues identified during penetration tests.
- Providing remediation to the developers based on the issues identified.
- Revalidate the issues to ensure the closure of the vulnerabilities.
- Verify if the application has implemented the basic security mechanisms like Job rotation, Privilege escalations, Least Privilege and Defense in depth.
- Using various add on in Mozilla to assess applications like Wappalyzer, Flagfox, Live HTTP Header, Tamper data.

Certifications: AWS Certified Solutions Architect – Associate
Amazon Web Services (AWS)

Achieved comprehensive knowledge of AWS architecture, services, and best practices, including design and deployment of scalable, secure, and fault- tolerant systems on AWS.
