

ENUMULA PANCHAJANYA

Maple Shade, NJ | (856) 924-4333 | enumula1201@outlook.com | <https://www.linkedin.com/in/panchajanya-enumula-6b1b041a1/>

Results-oriented Data Analyst with 5+ years of experience delivering data-driven solutions using SQL, Python, Power BI, Tableau, and cloud-based big data tools. Proven expertise in designing end-to-end ETL pipelines, performing advanced analytics, and developing interactive dashboards to support business decision-making. Skilled in working with large-scale structured and unstructured datasets, implementing streaming data architectures, and driving business impact through analytical storytelling. Adept in Agile/Scrum environments with a strong ability to communicate insights to both technical and non-technical stakeholders.

EDUCATION

Master of Science in Information Systems Technology – Information Assurance | Wilmington University
Bachelor of Technology in Information Technology | Vasireddy Venkatadri Institute of Technology (VVIT)

EXPERIENCE

Data Analyst | ACL Digital Jan 2024 – Present

- Built and deployed ML models using scikit-learn, TensorFlow, and PySpark, improving customer churn prediction accuracy by 20%.
- Designed ETL pipelines using AWS Glue, Apache Airflow, and DBT, reducing data processing time by 30%.
- Streamlined ingestion of real-time data via Apache Kafka into Hadoop/Spark, improving operational efficiency by 25%.
- Developed dashboards in Tableau and Power BI to track KPIs across products and markets, increasing executive visibility into key metrics.
- Created and optimized SQL Server stored procedures and user-defined functions for reporting and automation tasks.
- Utilized Snowflake and Teradata for scalable data warehousing and analytics workflows.

Data Analyst | Avenir Technology Aug 2021 – Feb 2023

- Migrated legacy data systems to AWS and Azure, cutting infrastructure costs by 30% and boosting system availability.
- Built 15+ interactive dashboards using Power BI and Tableau, leading to a 40% improvement in business performance tracking.
- Leveraged PostGIS for geospatial analysis, optimizing delivery routes and improving logistics efficiency by 25%.
- Developed automated ETL pipelines using AWS Glue and GCP DataProc, reducing manual effort by 35%.
- Conducted customer segmentation using SQL and Python, leading to a 10% increase in customer retention.

Data Analyst | CueTech Systems Mar 2019 – Aug 2021

- Transitioned enterprise data storage to AWS/Azure cloud, enhancing accessibility and reducing latency by 50%.
- Designed and deployed 10+ BI dashboards in Power BI and Tableau, driving cross-functional KPI alignment.
- Automated monthly financial reports in Excel, saving \$120/year in third-party consulting costs.
- Partnered with cross-functional teams in Agile projects, delivering solutions aligned with stakeholder requirements.
- Integrated data sources including SQL Server, Excel, and Azure Synapse, improving decision-making with real-time reporting.

SKILLS

- Programming & Scripting:** Python, R, SQL, T-SQL, SAS
- Databases:** PostgreSQL, MySQL, MS SQL Server, Snowflake, MongoDB, Oracle
- BI & Visualization:** Power BI, Tableau, Jupyter Notebook, Excel (Power Query, Pivot Tables)
- Version Control & Collaboration:** GitHub, Bitbucket, JIRA, Confluence, SharePoint
- Big Data Tools:** Apache Hadoop, Spark, Hive, Pig, Kafka, Kafka Streams, PySpark
- ETL & Workflow Orchestration:** Airflow, AWS Glue, Informatica PowerCenter, DBT
- Cloud Platforms:** AWS (S3, Lambda, Redshift), Azure (Data Factory, Synapse), GCP (BigQuery, DataProc)
- Statistical Techniques:** Regression, Classification, Time Series, ANOVA, Bayesian Inference
