SUMMARY

- Seasoned QA Engineer with over 13 years of diverse experience in **Automation Testing, API Testing, Integration Testing, Regression Testing, Mobile Testing, UAT Testing, and ETL/Database Testing**.
- **Automation:** Expert in developing and executing test scripts using tools such as **Playwright with JavaScript, Selenium-Java with BDD (cucumber), and Robot Framework -Python**. Extensively used **GitHub Copilot** and **Functionize AI Automation** tool for automation.
- **API Testing:** Extensive **experience in REST API testing** using Postman for request validation, automation, and response verification. **Familiar with API documentation and testing** using Swagger to validate endpoints and ensure proper functionality.
- **Database:** Technical proficiency in **SQL**, Database Testing, and **ETL Testing** using Informatica. Strong knowledge of databases such as **SSMS, SSIS, MySQL Workbench, and MongoDB**.
- **DevOps:** Experienced in utilizing DevOps tools such as **Jenkins, GitHub, Bitbucket, Kubernetes, Kibana, Grafana, Splunk, Datadog** etc. to streamline testing processes.
- **Domain:** Expertise in **Supply Chain Management, Retail, CRM (Salesforce, Sugar), Healthcare, and Investment Banking**.
- Skilled in Agile methodologies, serving as a **Scrum Master and Agile practitioner**, and facilitating team meetings to drive project success.
- Experience with AWS services like **S3, Lambda, DynamoDB, Identity and Access Management** components.
- Strong background in **QA metrics** management, **test planning, root cause analysis**, and risk management. Adept at using defect/test management tools like **JIRA, Xray, Spira, TestLink, TestRail, and qTest**.
- Strong analytical skills with ability to quickly understand client's business needs.
- Experienced in **project management**, having successfully led multiple projects from initiation to closure, **collaborated with cross-functional teams** to deliver high-quality project outcomes and continuous process improvements.
- **Release Management:** Developed a comprehensive release calendar that coordinated 12 feature deployments across three major projects, resulting in streamlined processes and enhanced team communication while maintaining exceptionally high-quality standards for the deployed code.
- Worked closely with **technical and non-technical leaders** to strategize on delivery approach and dependency management.
- Proficient in debugging and problem-solving skills.

CERTIFICATE

- Project Management Professional (PMP)
- AWS Certified SysOps Administrator - Associate certificate
- SAFe 4.0 Agilist
- ISTQB - Foundation Level
- Generative AI Course – Linked In

TECHNICAL SKILL

- Languages: Java, Python, SQL, JavaScript, TypeScript
- Automation: Selenium, Playwright, Appium, Robot Framework, BDD-Cucumber, JMeter
- API: Postman, Swagger, Katalon Studio, Stoplight
- Database: SSMS, MySQL Workbench, Vertica, Mongo DB
- Test Management tool: X-ray, TestRail, qTest
- Defect Management tools: JIRA, BugZilla
- ETL tools: Informatica, SSIS, Talend Open Studio

- DevOps tools: Jenkins, Splunk, Grafana, Kibana, Weave Scope, Datadog, Kubernetes
- Version Control Tools: Bitbucket, GitHub, Git
- Cloud Platform: AWS (S3, Lambda, IAM, DynamoDB)
- Messaging System: Kafka, RabbitMQ
- Trading Tools: Fidessa (trading platform), OpenFin (configuration tool).

WORK EXPERIENCE

Synechron Technologies

Lead Quality

Jun 2023 - Jan 2025

- **Project:** Jefferies is a global financial services firm that offers a range of services, including **Electronic trading platform, Trade execution, Asset Management, Equities platform**. Madison Helix provides the best platform for Traders to send and receive IOIs (Indentation of Interest) against **Orders/Stock Books**. Trader can perform bulk operations like Create IOI, Cancel IOI, Pause IOIs for EU Region. Utilized **Fidessa** for Order management.
- **Automation Testing:** Designed, implemented, and maintained automated test suites for **Salesforce** applications using **Playwright** with **JavaScript** and **Selenium** with **Java in BDD-Cucumber Framework**.
- Utilized **GitHub Copilot** to enhance productivity in writing and optimizing test scripts by leveraging AI-driven code suggestions. Utilized DevOps tools like **Kibana, Grafana, Splunk, and Datadog** to monitor and analyze log data and dashboard creation to generate insightful reports.
- **API Test:** Developed and executed **API test** suites using **Apache JMeter**.
- **Scrum:** Facilitated team meetings, including daily stand-ups, iteration planning, sprint demos, retrospectives, and Backlog refinement.
- QA Metrics Management: Define, track, and analyze key **Quality Assurance metrics** to assess project health and performance.
- Driven **Bug triage call** and conducted Root Cause Analysis for production defects.
- **Test Planning and Coordination:** Prepared Test Strategy and Test Plan for assigned projects. Estimated, prioritized, planned, and coordinated testing activities. Designed, Reviewed & Executed Test cases for Functional testing.
- Collaborated with **cross-functional teams** and stakeholders to deliver high-quality project outcomes and continuous process improvements.
- Release Management: Participated in the strategic planning of feature releases, developing a comprehensive release roadmap to guarantee timely and synchronized deployments.
- Leadership: Provided leadership and guidance to a team of 10 QA professionals, fostering a culture of excellence and collaboration.
- Partnered with HR to identify and onboard top talent to strengthen the team. Generated insightful reports and recommendations on resource allocation and utilization.

Symend Inc

Quality Assurance Specialist

Jan 2022 - Mar 2023

- Scrum Practitioner: ensured the task are completed as per the definition of done.
- **Reviewed requirements, specifications, and technical design** documents to provide timely and meaningful feedback to the manager.
- Designed, developed, and executed automation scripts using **Selenium-Java with BDD-Cucumber** automation tool.
- Utilized **Functionize AI automation tool** to streamline test regression automation and enhance the efficiency of test script generation.
- **Performed extensive REST API testing** using Postman for request validation, automation, and response verification.
- Defined test methods, created test plans, designed test cases, and executed on desktop, mobile devices for assigned software project to perform **GUI testing**, functional testing, integration testing, regression testing, **API testing**, sanity and UAT testing.
- Defect triaged and reported, project deliverables tracked, documentations, and status reported to the higher

management.

- **Scrum master** for QE automation team.
- Trained and mentored other QE members.
- Presented quality/reliability metrics per quarter and risk management.

RSi Retail Solutions India Pvt Ltd

QA Manager

Jun 2018 - Jan 2022

- Development of **API Automation** Test Script, debug and execute on **Robot Framework with Python**.
- Review and merge automation code of team member. Help team to resolve git merge conflicts.
- Developed and executed automated test scripts using **Appium** for **mobile** applications on both **Android and iOS platforms**, ensuring comprehensive test coverage and high-quality releases.
- **Proficient in REST API testing** using Postman to validate request-response flows, perform functional and regression testing, automate test cases using scripts, and ensure API reliability through assertion checks.
- **Experienced in API documentation and testing** using Swagger, verifying endpoint responses, checking authentication mechanisms, validating schemas, and ensuring compliance with API specifications for seamless integration.
- Creation of product backlog items for release using **JIRA**.
- Identification of project risks to define risk strategies and developed the risk management plan.
- Facilitated all team meetings, including daily stand up, iteration planning, sprint demo, retros, testing / quality assurance processes and more.
- Handled the tasks of conducting **Root Cause Analysis**, design verification, and performing risk analysis.
- Verification of database design, data integrity, **SQL** scripts, SQL agent jobs and stored procedures.
- Prepared the **Test Strategy and Test Plan** for assigned projects; Reviewed activities such as Requirements Review, Design Review, Test Strategy Review and Test Case Review.
- Worked as individual contributor in scrum team as well as Lead the team of 15 QA's.
- Performed roll of **Scrum Master** for 6 months.
- Release Management: Participated in plan of feature releases, creating a well-structured release calendar to ensure timely and coordinated deployments. Reviewed features slated for release, ensuring that the quality of the deployed code remains exceptionally high.
- Co-ordinated with HR to hire new talent in the team.

Cybage Software Pvt Ltd

Sr. QA Engineer

Dec 2015 - Jun 2018

- Scrum Practitioner Understand retail data and its functionalities.
- Developed automation scripts using **Selenium with Java**.
- Executed the jobs/Workflows for ETL process, Prepared and run SQL queries to verify Dimensional and Fact tables.
- Verified the data in target database by ETL process, Verified column mapping between source and target.
- Prepared test data for functional & Integration testing, Reporting daily testing status.
- Designed, Reviewed & Executed Test cases, Identified Test cases for Regression testing
- Defect Analyzing and Reporting in JIRA, Client server testing, Status reporting, project tracking, documentation and reporting.
- Trained and mentored employees to maximize team performance.

SQS India Infosystem Pvt Ltd

Test Analyst

Oct 2013 - Nov 2015

- Project Name: LEGO: One Network's Real Time Value Network provides community-based **supply chain solutions** in the cloud to help customers increase profitability and efficiencies by optimizing their supply chain operations.
- This software solutions enable customers to easily collaborate with all their value chain participants on a single network customers, partners, carriers, and suppliers.

- Understand retail data and its functionalities.
- Verified the data in target database, Verified column mapping between source and target.
- Prepared test data for functional & Integration testing, Reporting daily testing status.
- Designed, Reviewed & Executed Test cases, Identified Test cases for Regression testing o Defect Analyzing and Reporting in JIRA, Client server testing, Status reporting, project tracking, documentation, and reporting.
- Mentored team of 5 QA members.
- Consolidated status report to manager.

BHEA Knowledge technologies Pvt Ltd

Software Test Engineer

Sep 2012 - Sep 2013

- **Expat Sugar CRM:** Expat is a real estate project, which is mainly based on apartment and land selling. In **CRM**, we captured all the details of units in each tower of the project, all bank details, payments and installments related to each booking of the unit done in the system itself.
- Analyzed system requirement documents and developed test scenarios and test cases.
- Involved in test planning, responsible for Logging and Tracking the Defects in Defect Management tool using JIRA.
- **Performed EDI testing on EDI-850, EDI-856 & EDI-855**
- Coordinated with different Teams, performed issue Investigation and Verification
- Participated in Production support task, coordinated Build upgrades/ Patch promotion.
- Involved in Understanding the business requirements and Test Planning
- Verification of SQL agent jobs and stored procedures
- Got opportunity to work at Client Site over a 10 month.

WNS Global Services Pvt Ltd

Associate Ops

Apr 2011 - Mar 2012

- Analyze contracts and coded information on online application - MY FAIR.
- Priced the fairs on Computer Reservation System.
- Made templates using MS-Excel.
- Made pricing document using MS-Word.
- Transfer/monitor files through FTP.

EDUCATION

Savitribai Phule Pune University

Bachelor of Computer Science

2006 - 2009
