

Abhisek Jain

SDET/Senior QA (Software Testing)

Saint Louis, MO | (314) 498-4221 | iamabhisekjain@gmail.com | [LinkedIn](#)

Senior QA / Software Automation Test Engineer having 10+ years of total experience in Web based Application Testing, Mobile devices testing and OTT testing in telecom, healthcare and entertainment domains. Proficient in defining Testing methodologies, Requirement Gathering, Designing Test Plan & Test Cases, Estimations and handling clients and stakeholders. Expertise in working with projects involving API System Testing, Mobile Testing, Automation Testing, User Experience Testing. Excellent exposure to Onsite/Offshore model, Cloud Architecture and Android Security Testing.

HIGHLIGHTS:

- Experienced Software Test Engineer with expertise in test automation, software quality assurance, and Agile methodologies, ensuring high-performance and scalable software solutions.
- Strong background in automation frameworks, developing and optimizing Java-Maven-based TDD frameworks, and integrating Selenium, Rest Assured, TestNG, and Cucumber for UI and API testing.
- Expertise in CI/CD and DevOps, implementing Jenkins, Kubernetes, GitHub, and AWS Cloud to enhance automation efficiency and streamline deployments.
- Proficient in API Testing using Postman, Insomnia, and SOAP/REST APIs, ensuring seamless integrations and reliability of microservices-based platforms.
- Effective communicator and collaborator, working closely with PMs, developers, and cross-functional teams to enhance test coverage and software reliability.
- Certified in ISTQB, SAFe Agile 6, AWS Solution Architect, and Azure Cloud Fundamentals, demonstrating a commitment to continuous learning and industry best practices.

TECHNICAL SKILLS

Languages & Tools:	Java, Selenium, REST, SOAP, TestNG, Maven, Rest Assured, Cucumber, SQL, HTML, XML
Skills:	Safe Agile, SDLC, STLC, Gherkin, Kubernetes, Jenkins, AWS Cloud, Scripting, Devices Testing, Software Quality Testing, Bug Tracking, Software Engineering and Quality Assurance, Debugging, troubleshooting, and critical thinking on bug prioritization. API Testing with Postman and Insomnia
Tools:	GIT, JIRA, HP QC, ALM, Rally, IntelliJ, Eclipse, MySQL, Putty, Cyberduck, Bitbucket, GitHub, Confluence.

EDUCATION

- BTech in Information Technology, Institute of Engineering & Management - WBUT University, India (Duration: 2009 - 2013) (CGPA: 8.6/10)

PROFESSIONAL EXPERIENCE

- **Software Test Engineer III | TraceLink Inc, St. Louis, MO, US | July 2022 - Present**
 - Developed and optimized an automation framework for a microservices-based platform using Java, Rest Assured, and Selenium, reducing regression test time by 30% through efficient refactoring.

- Lead the QA effort on critical TraceLink product which has a great impact in pharmaceutical industry to curb the counterfeiting of drugs by providing serialization and tracking solutions.
- End to End Testing of the supply chain management software to improve customer experience.
- Collaborated in release planning, breaking down epics and features with PM, Architecture, and Development teams, and facilitating smooth releases
- Improve existing test infrastructure to increase efficiency (test execution time reduced to 40%) and productivity in test case development, scheduling, or deployment.
- Good understanding of the version control, CICD process and how Jenkins Build system is required for application builds and running test suites daily through pipeline.
- Monitoring with Kibana and Grafana
- Worked on test case design and test architecture, including integration & end-to-end(E2E) testing (around 15 new tests for each release)

▪ **Senior Test Engineer | Tech Mahindra Americas, Seattle, WA, US | Mar 2018 – June 2022**

- Worked to develop and execute detailed test plans, test cases, and test scripts to thoroughly evaluate software applications.
- Designed and developed an end-to-end UI automation framework using Selenium and REST API, seamlessly integrated with CI/CD pipelines to enhance test automation and deployment efficiency.
- Collaborated with cross-functional teams, including software developers, engineers, application support teams, project managers, and product owners, to ensure alignment on quality standards and testing requirements.
- Worked on design, development and maintenance of automated test scripts for various test cases (e.g., functional, regression, and usability).
- Worked on various project involving client like AT&T and Univision in various domains including telecom, healthcare and entertainment.

▪ **Senior Test Engineer | Tech Mahindra India, Mumbai, India | Jan 2014 – Mar 2018**

- Developed a Java-Maven-based Test-Driven Development (TDD) framework **for** AT&T, tailored to client requirements using TestNG, Jackson, and AWS. Designed to support both UI and API testing, leveraging Selenium for UI automation and Rest Assured for API testing.
- Using this framework, prepared Test Scripts and coordinated with team members to leverage the framework to create automation scripts for better test coverage and efficient regression.
- Debugged and Logged defects using HP QC and worked with the development team closely to rectify the defects.
- Conducted and provided input during Agile ceremonies like Sprint planning, grooming sessions, stand-up meetings, demo sessions, and retrospective meetings with a major focus on Quality.
- Client Communication - Reporting the test results daily to AT&T Directors and addressing any questions, concerns, and feedback.

LICENSES AND CERTIFICATIONS:

- Certified Tester Foundation (CTFL) -ISTQB® - International Software Testing Qualifications Board
- Certified SAFe Agile 6 Practitioner
- Certified AWS Solution Architect
- Certified Azure Cloud Fundamentals

VISA/ WORK PERMIT INFORMATION: H1B visa [I140 Approved – EB2 Category]
