SUMMARY

Experienced IT professional with expertise in **Linux system administration, AWS cloud infrastructure, automation, and troubleshooting**. Experienced in AWS services, networking, performance tuning, and high-performance computing environments. Proficient in **Python, Bash scripting, PowerShell, and Ansible for automation**. Skilled in **Security assessments, vulnerability remediation, and infrastructure optimization**. Certified **PCEP** with strong problem-solving abilities, a passion for continuous learning, and a commitment to delivering efficient and secure IT solutions.

PROFESSIONAL EXPERIENCE

System Administrator- Associate

Company Name: Hitachi Vantara

Jul '21 — Aug '23

- Provided technical support and troubleshooting for **Linux and Windows environments**, resolving server and storage issues efficiently.
- Supported network migration, including upgrading nodes to a new **SolarWinds**.
- Automated **internal DNS record management** using **Python API integrated with ServiceNow**, reducing manual efforts by **60%** and saving **\$50,000 annually**.
- Developed **Python and Shell scripts** to automate **file system monitoring, vulnerability report segregation, and RHEL laptop auto-patching**, reducing downtime by **40%**.
- Managed **Red Hat Satellite** for **patching, self-signed, and third-party certificate management**.
- Supported **ESXi host installation, vCenter tasks, and VMware snapshot management**.
- Monitored server alerts using **SCOM** and provided **on-call support during weekends**.
- Improved operational workflows through **automation and performance optimization**, saving **300+ man-hours annually**.
- I have Documented all types of processes that are commonly used one of them is adding the website to **F5 Load balancer**. Deploy **Docker** and secure **Containerized** applications

INTERN

Company Name: Hitachi Vantara

Aug '20 — Jul '21

- Gained hands-on experience in **Python automation, Linux system administration, networking, and VMware environments**.
- Designed and implemented **automation logic for VMware snapshot management**, reducing manual intervention by **70%**.
- Developed **real-time vulnerability report automation** to segregate **Linux, Windows, and VMware vulnerabilities**, saving **\$20,000 in security compliance costs**.
- **Storage**: Knowledgeable in storage solutions and backup methodologies.
- **Backup**: Expertise in implementing and managing **backup** strategies.

TOOLS & TECHNOLOGIES

- **Monitoring & Management Tools:** Red Hat Satellite, SCOM, GitHub
- **Operating Systems:** Red Hat Linux, Windows Server, VMware ESXi
- **Scripting & Automation:** Python, Bash, PowerShell, Ansible
- **Infrastructure Management:** Red Hat Satellite, Docker, Kubernetes, ComVault Backup, F5 Load Balancer, Jenkins, Qualys,
- **Security & Compliance:** Vulnerability Management, Patch Deployment, Disaster Recovery Planning
- **Networking & Cloud:** IP Management, Virtualization, Cloud Integration (AWS), LAN, Switches, IPAM

EDUCATION

1. **Master's in computer science**, Kent State University (GPA: 3.9)
2. **Bachelor of Technology in Computer Science and Engineering**, Kallam Haranadha Reddy Institute of Technology (KHIT) (GPA: 3.24/4)

CERTIFICATIONS

Certified Entry Level Python Programmer (PCEP)

HV Pinnacle Award – For consistent learning in the organization

PROJECTS & AUTOMATION

- **AWS-Compatible Internal DNS Automation** – Developed a **Python-based automation** to integrate **ServiceNow requests with DNS API**, reducing manual workload by **60%** and saving **\$50,000 annually**.
- **Vulnerability Report Segregation Automation** – Automated monthly **vulnerability report generation** for **Windows, Linux, and VMware environments** using **Python**, saving **\$20,000 in security compliance costs**.
- **RHEL Laptop Auto-Patching** – Designed **Shell script for automated monthly patching of RHEL laptops**, reducing downtime by **40%**.
- **Daily Server Health Check Automation** – Developed a **Shell script to monitor server health and notify teams about critical issues via email**, saving **300+ man-hours annually**.

ADDITIONAL STRENGTHS

- Excellent problem-solving, troubleshooting, and analytical skills.
- Strong ability to work independently and in cross-functional teams.
- Passion for continuous learning and staying updated with emerging technologies in cloud and Linux, windows system administration.

DECLARATION

I hereby declare that the above-mentioned information is true and correct to the best of my knowledge and belief.
