TECHNICAL SKILLS

Languages: Java, Spring boot, AngularJS, JavaScript, React, Python, HTML, CSS, jQuery, Django.

Others: PostgreSQL, Machine Learning, Linux, Bash, Shell, Visual Studio.

Technologies and Platforms: Git, Jira, Bitbucket, Zendesk, HubSpot, Postman, Nginx.

Libraries: pandas, NumPy, Matplotlib.

EXPERIENCE

Software Development Engineer, Professional Services.

June 2022 – Present

ACCELQ

- Description: Codeless Test Automation and Test Management Platform on Cloud.
- Developed REST API services using Java and Spring Boot, ensuring smooth integration with the business logic and database layers.
- Presented Proof of Concept (PoC) for various clients, including Skechers, Movius, and Castle Branch demonstrating the viability of new features and ensuring alignment with client expectations.
- Implemented seamless Single Sign-On (SSO) systems with Keycloak, improving user access management across platforms.
- Engineered object-relational mapping (ORM) using Java Persistence API (JPA) and Hibernate for efficient database interactions
- Engineered integrations with third-party APIs such as Zendesk and HubSpot to enhance communication and customer support capabilities.
- Conducted sprint planning, daily standups, and retrospection meetings, fostering Agile development and continuous improvement within the team.

Intern

July 2021 – June 2022

ACCELQ

- As a part of internship developed a full-fledged website on tours as a part of intern team.
- Contributed to all development phases, including troubleshooting, fixes, and thorough code testing, ensuring smooth progression to the production phase.
- Conducted thorough analysis of business requirements to understand stakeholder needs. Translated these requirements into technical designs.
- Providing timely support during software releases by troubleshooting any issues encountered.

PROJECTS

Commodity Price Forecasting | Python, Django, HTML, CSS, JavaScript

August 2022 – July 2023

- Researched on various price forecasting methods that were already present.
- Came up with a solution of optimizing the accuracy and performance of price forecasting using and Bi-LSTM Algorithm and implemented basic NLP in it.
- Developed a front-end application using Django which can predict the price of a selected commodity in a selected region.

Owe Mate | Springboot, Java, Maven, AngularJS, Git

May 2018 – May 2020

- A collaborative expense management tool that helps users track, manage, and settle shared costs effortlessly in groups.
- Designed and implemented key features like user authentication, group management, and real-time balance calculations for seamless user experience.

EDUCATION

North Carolina State University

Raleigh, NC

Master's in computer science

August 2024 – May 2026

Chaitanya Bharati Institute of Technology

Hyderabad, India

BE in Computer Science and Engineering

August 2019 – May 2023
