Summary

Experienced and certified SQL Server / Azure SQL Database Administrator with 7+ years of expertise managing, securing, and optimizing enterprise-grade SQL Server infrastructure across hybrid, on-premises, and cloud-native environments. Specialized in database migration to Azure (SQL MI, Azure SQL DB), implementing high-availability (Always On AG, clustering), disaster recovery planning, backup/restore strategies, and performance tuning of mission-critical OLTP and OLAP systems. Skilled in PowerShell automation, CI/CD integration via Azure DevOps, SSIS/SSRS/ADF development, and role-based access using Active Directory. Proven track record supporting HIPAA, GDPR, and SOC 2 compliance requirements while ensuring system uptime and business continuity. Adept at cross-functional collaboration, incident management, and proactive database health optimization.

Core Skills

Database Platforms:	Microsoft SQL Server (2008–2022), Azure SQL Database, Azure SQL Managed Instance, MySQL
Cloud & Tools:	Azure VM, Azure Data Factory, Microsoft Fabric, Azure DevOps, Power BI, Azure Monitor
High Availability & DR:	Always on Availability Groups, Failover Clustering, Log Shipping, Mirroring, Backup & Restore
Performance Optimization:	Indexing, Execution Plans, Query Store, Extended Events, Profiler, DMV Monitoring
ETL & BI:	SSIS, SSRS, SSAS, CDC, Data Warehousing, ETL Orchestration
Security & Compliance:	TDE, DDM, RLS, RBAC, Data Auditing, Active Directory, HIPAA, GDPR, SOC 2
Automation & Scripting:	PowerShell, T-SQL, SQL Agent Jobs, Maintenance Plans, Alerting, Logging
Monitoring & Tools:	Azure Data Studio, SentryOne, SolarWinds DPA, Idera, Rubrik, ServiceNow
Operating Systems:	Windows Server 2012–2022, VMware, Hyper-V
Soft Skills:	Incident Resolution, Documentation, Team Collaboration, Problem Solving, Communication
Version Control & Ticketing:	Azure DevOps, Git, ServiceNow, JIRA, Confluence

Professional Experience

SQL Server Database Administrator

Microsoft, Las Colinas, TX

Aug 2024 – Present

- Administer 50+ SQL Server environments across IaaS and PaaS deployments in Azure and on-premise, ensuring uptime SLA of 99.99%.
- Led Azure migration using Azure DMS, BACPAC/DACPAC, and ADF pipelines; reduced infrastructure overhead by 35% and streamlined disaster recovery strategy.
- Designed and implemented PowerShell-driven automation for backups, index maintenance, and security audits, cutting manual effort by 60%.
- Enforced data protection policies through TDE, DDM, RLS, and implemented auditing for compliance with HIPAA and GDPR.
- Integrated SQL CI/CD pipelines using Azure DevOps, managing version control of stored procedures, schema, and configurations.
- Tuned mission-critical queries and workloads using Query Store, wait stats, and plan guides; improved system throughput by 45%.
- Provided 24/7 support, resolving Sev-1 incidents using ServiceNow and ensuring fast turnaround within defined SLAs.

SQL Server Database Administrator

Gategourmet, Dallas, TX

Dec 2023 – Jul 2024

- Upgraded 25+ SQL Server instances (2012 to 2022) with zero-downtime cutover using rolling updates and cluster-based HA.
- Designed real-time replication models (transactional, merge, snapshot) across global sites for distributed analytics and BI.
- Integrated SSRS reports with Power BI and optimized refresh intervals, reducing dashboard latency by 40%.
- Enabled automated Change Data Capture and audit logging across 100+ sensitive tables for traceable data changes.
- Managed access control via AD groups and RBAC; reviewed permissions quarterly to ensure a least-privilege model.

- Resolved critical database alerts using Idera and SQL Profiler; reduced incident reoccurrence rate by 50%.

SQL Server DBA

LSG Sky Chefs, Dallas, TX

Jan 2020 – Nov 2023

- Supported OLTP/OLAP environments with 40+ SQL Server instances; performed performance tuning using DMV scripts, execution plan analysis, and index redesign.
- Implemented SSIS-driven ETL and CDC for delta processing of large datasets; reduced processing time by 50%.
- Maintained Rubrik-integrated backup system; successfully completed quarterly restore simulations with 100% accuracy.
- Developed SOPs for patching, schema rollout, and rollback; contributed to improved compliance reporting readiness.
- Collaborated with developers on stored procedure optimization; reduced locking and blocking in reporting DBs by 30%.

SQL Server DBA

Good Samaritan Health Agency, Dallas, TX

Apr 2016 – Dec 2019

- Provisioned and configured SQL Server 2008–2016 environments on VMware and Hyper-V with Always On AG and log shipping for DR.
- Created HIPAA-compliant SSRS reporting packages for patient data, billing systems, and audit trails.
- Designed replication topologies for EMR systems syncing with 3rd-party pharmacy data feeds.
- Performed security hardening via AD role mapping, database firewalls, and audit triggers for access traceability.
- Wrote PowerShell scripts for automated server validation, SQL service checks, and patch verification.

Certifications

- **Microsoft Certified: Azure Database Administrator Associate**

Education

Bachelor of Science in Computer Science

University of Buea
