

Hari Krishna Allam

Senior Software Engineer | Portfolio: Hari Krishna

Email: allamharik@gmail.com LinkedIn: linkedin.com/in/Hari Krishna Mobile: +1 (475) 287-3068 Place: United States

SUMMARY

Experienced Senior Software Engineer with 4+ years of expertise in designing and developing scalable Java-based applications and microservices. Specialized in Spring Boot, Hibernate, and RESTful API development for high-performance distributed systems. Engineered asynchronous event-driven pipelines using Kafka, optimizing system efficiency by 25%. Expertise in cloud-native deployments on AWS Lambda, API Gateway, and Azure AKS, ensuring strong scalability. Implemented CI/CD automation with Jenkins, Docker, Ansible, and Git, maintaining consistent production environments. Optimized databases and developed SQL scripts across Oracle, MySQL, and DynamoDB, driving end-to-end software delivery and system reliability.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** Java, C#, Visual Basic, Python, Shell Scripting, C++, JavaScript, TypeScript, VBA
- **Web Technologies:** HTML, CSS
- **Frameworks & Libraries:** Spring, Spring Boot, Microservices Architecture, Hibernate, Excel Macros
- **Testing & Quality Tools:** JUnit, Mockito
- **Databases & Data Management:** SQL, Microsoft Access, Oracle, MySQL, MongoDB, SQL Server, AS/400
- **DevOps & CI/CD Tools:** Git, GitHub, Postman, Jenkins, Ansible, Docker, Kubernetes, ArgoCD, SonarQube
- **Integration & Messaging:** SOAP, Apache Kafka, ETL Pipelines
- **Operating Systems:** Windows, Linux, AS/400
- **IDEs & Project Management Tools:** Eclipse, IntelliJ, Visual Studio, VS Code, Jira
- **Cloud Platforms & Services:** AWS, Lambda, API Gateway, DynamoDB, Azure, AKS

PROFESSIONAL EXPERIENCE

Dell Technologies

Senior Software Engineer

February 2023 – Present

- Developed and maintained scalable microservices using Java, Spring Boot, and Hibernate, ensuring seamless data exchange across distributed systems.
- Designed and implemented secure REST APIs integrated with Angular front-end, leveraging Spring Security and RxJS, enhancing end-to-end application reliability.
- Deployed and managed containerized workloads on Azure Kubernetes Service (AKS) and AWS Lambda, reducing deployment times by 40% and improving system scalability across global environments.
- Engineered asynchronous event-driven pipelines using Kafka and managed large-scale data storage with DynamoDB/Cassandra, optimizing transaction throughput by 25%.
- Automated CI/CD pipelines with Jenkins, GitLab CI, Docker, and Ansible, ensuring production uptime while streamlining testing and deployment of enterprise applications.

HCL Technologies

Software Analyst

Client: Allianz Life Insurance

July 2020 – August 2022

- Modernized the legacy VS10 system into a web-based application using Java, Angular, Spring Boot, and Hibernate, improving overall application efficiency and user experience.
- Transformed monolithic applications into microservices architecture with Spring Boot, enhancing scalability, modularity, and accelerating CI/CD deployment pipelines by 25%.
- Optimized MySQL and Oracle database schemas, automated complex data migration, and wrote advanced SQL queries, reducing manual intervention.
- Streamlined unit and integration testing using JUnit and Mockito and applied SonarQube code analysis, improving code coverage and reliability by 35%.
- Led DevOps initiatives using Jenkins, Docker, Git, and AWS, streamlining deployment processes and achieving faster release cycles while ensuring robust system performance.

Go Offer

Developer

May 2019 – June 2020

- Constructed a real-time notification system using WebSocket, enhancing user engagement and reducing latency for message delivery.

- Designed a ReactJS and Bootstrap based intuitive UI, boosting customer conversion rates by 25% through seamless user interactions.
- Architected and optimized PostgreSQL database schemas, improving data consistency and retrieval performance by 40% for high-volume transactions.
- Streamlined project tracking and team collaboration using JIRA, resulting faster sprint completion rate and improved task visibility.
- Integrated front-end and back-end services using REST APIs, ensuring secure, scalable, and maintainable application architecture while reducing system errors by 30%.

PERSONAL PROJECTS

MERN Stack News Blog

- Established full-stack web application using MongoDB, Express.js, ReactJS, and NodeJS, implementing RESTful APIs and server-side routing for seamless data flow.
- Enhanced database queries and React components, improving page load speed and reducing server response time by 30%.
- Applied CRUD operations with robust error handling, ensuring data integrity and transactional consistency across user interactions.
- Implemented responsive UI with interactive rendering and API data binding, achieving test coverage through unit and integration tests.

EDUCATION

Master's in Computer and Information Science
Sacred Heart University, Fairfield, CT

September 2022 – December 2023

Bachelor of Engineering in Computer Science
Sathyabama Institute of Science and Technology, Chennai, India

July 2016 – May 2020

CERTIFICATIONS

- Attained AWS Developer Certification (Platform: AWS).
- Achieved Microsoft Access Specialist Certification.
- Completed Microsoft SQL Server Database Fundamentals.
- Certified Java Programmer.
- Earned Agile Scrum Master Certification.
