SUMMARY

Full Stack Java Developer with 3+ years of experience delivering enterprise-scale applications using **Java, Spring Boot, React.js, Angular, and Microservices**. Skilled in **RESTful APIs, GraphQL, OAuth2, JWT**, and database optimization (**SQL, PostgreSQL, MongoDB, Redis**) with proven success enhancing transaction speed and reliability. Hands-on with **AWS, Azure, Docker, Kubernetes, Jenkins, and Terraform** to automate **CI/CD pipelines** and accelerate releases. Adept in **Agile** delivery, test automation (**JUnit, Selenium, Mockito, Cypress**), and monitoring with **Prometheus, Grafana, and ELK Stack** to ensure secure, scalable, and fault-tolerant systems.

TECHNICAL SKILLS

Programming & Frameworks: Java, Spring Boot, Hibernate, Microservices, RESTful APIs, GraphQL, Node.js, Express.js, React.js, Angular, Redux, WebSockets, JSP, Servlets, TypeScript, JavaScript

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, ECS, EKS), Azure, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, Nginx, CI/CD Pipelines, Blue-Green Deployment, Cloud-Native Applications, Infrastructure-as-Code

Databases & Messaging: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Oracle, Apache Kafka, RabbitMQ, Data Sharding, Indexing, Caching Strategies, Query Optimization, ACID Transactions, High-Volume Data Processing

Testing & Quality Assurance: JUnit, Mockito, Selenium, Cypress, Postman, TestNG, Jest, Functional Testing, Integration Testing, Unit Testing, Test-Driven Development (TDD), Code Coverage, Continuous Integration Testing

Monitoring & Logging: Prometheus, Grafana, ELK Stack, Log4j, Splunk, Real-Time Monitoring, Alerting, Performance Optimization, Anomaly Detection, Fault Tolerance, High Availability, Incident Management, Uptime Assurance

Agile & Collaboration Tools: Agile/Scrum, Jira, Confluence, Git, GitHub, GitLab, Bitbucket, Code Reviews, Pair Programming, CI/CD Collaboration, Sprint Planning, Retrospectives, DevOps Culture, Cross-Functional Team Leadership

PROFESSIONAL EXPERIENCE

Full Stack Java Developer, Capital One

Aug 2024 – Present | USA

- Built **Spring Boot microservices** integrated with Capital One banking systems, improving transaction throughput by **20%**, enabling **Kubernetes scalability**, and ensuring compliance with **PCI-DSS and SOC2 security frameworks**.
- Developed **React.js/Redux UIs** with caching and accessibility best practices, improving **page load speeds by 34%**, enhancing digital customer experience, and supporting seamless usage across **web and mobile platforms**.
- Designed **secure APIs** with **OAuth2, JWT, and API Gateway**, reducing unauthorized access by **27%**, enabling third-party integrations, and maintaining compliance with banking security standards and **data privacy regulations**.
- Automated **CI/CD pipelines** using **Jenkins, Docker, GitHub Actions, and Terraform**, reducing release cycles by **40%**, improving reliability, and enabling **blue-green deployments** for mission-critical financial applications.
- Implemented **unit and integration testing** with **JUnit, Mockito, Selenium, and Postman**, achieving **95% code coverage**, reducing production defects by **30%**, and enforcing **test-driven development across agile teams**.
- Configured **monitoring dashboards** with **Prometheus, Grafana, and ELK Stack**, improving anomaly detection, reducing incident response times by **28%**, and ensuring **99.9% uptime** for customer-facing services.
- Collaborated with **product owners, architects, and UX designers** to deliver **three customer-facing features**, increasing **user adoption, retention**, and strengthening Capital One's **digital banking growth strategy**.

Full Stack Java Developer, PhonePe

Sep 2021 – Jul 2023 | Hyderabad, India

- Developed **Spring Boot microservices** with **Kafka and RabbitMQ messaging**, reducing transaction failures by **25%**, ensuring payment reliability, and scaling system performance to support **millions of concurrent users**.
- Created **React.js dashboards** with **Redux and WebSockets**, reducing page load times by **40%**, enhancing customer experience, and improving digital payment flow efficiency across multiple platforms.
- Optimized **SQL and NoSQL queries** across **PostgreSQL, MySQL, and MongoDB**, applying indexing and caching strategies, improving **data retrieval by 32%**, and ensuring accuracy in **high-volume transactions**.
- Automated **cloud-native deployments** using **Jenkins, Docker, Terraform, and AWS**, reducing release cycles by **60%**, improving deployment reliability, and enhancing **disaster recovery** with automated backups.
- Implemented **OAuth2 and JWT authentication** for payment gateways, accelerating onboarding, improving data privacy, and ensuring compliance with **RBI, GDPR, and financial security standards**.
- Built **test automation frameworks** with **JUnit, Mockito, Cypress, and Selenium**, achieving **90%+ coverage**, reducing post-release bugs, and strengthening continuous integration workflows.
- Instrumented **monitoring dashboards** with **Prometheus, Grafana, and ELK Stack**, improving incident visibility, reducing downtime by **35%**, and maintaining high availability for PhonePe's **digital wallet ecosystem**.

EDUCATION

Master of Science, Rivier University
Computer Science

Aug 2023 – May 2025 | New Hampshire, USA

Bachelor of Engineering, Sri venkateswara college of engineering

Aug 2019 - May 2023 | AP, India
