SUMMARY

A results-driven Java Full Stack Developer with 6 years of experience architecting and delivering scalable, cloud-native solutions for the finance, healthcare, and telecommunications sectors. Expert in the end-to-end software development lifecycle, from designing high-throughput microservices with Spring Boot and Java 17 to building responsive SPAs with React/Angular. Proven ability to leverage modern AWS services (EKS, Lambda, SageMaker), enforce robust security and compliance (HIPAA, PCI-DSS), and implement CI/CD pipelines to accelerate delivery while ensuring quality and observability. A collaborative team player adept in Agile methodologies and passionate about mentoring and adopting emerging technologies.

TECHNICAL SKILLS

- Languages & Frameworks:** Java 8/11/17, Spring Boot, Spring MVC, Spring Cloud, Hibernate/JPA, Python, Node.js, TypeScript/JavaScript, SQL/PL-SQL
- Frontend Technologies:** React (Redux, Hooks, Router), Angular (NgRx, RxJS, Material), HTML5, CSS3 (Tailwind, Bootstrap), WebSockets, AJAX
- Cloud & DevOps:** AWS (EKS, ECS, Lambda, S3, DynamoDB, SNS/SQS, SageMaker, CloudFormation), Docker, Kubernetes, Terraform, Helm, Jenkins, Bitbucket Pipelines, Git, Ansible, SonarQube
- Databases & Messaging:** PostgreSQL, MySQL, Oracle, Microsoft SQL Server, MongoDB, Redis, Elasticsearch, Apache Kafka, RabbitMQ, JMS (IBM MQ)
- Security & Compliance:** OAuth 2.0 / OpenID Connect, JWT, SAML, mTLS, Apigee, HIPAA, PCI-DSS, AWS KMS, HashiCorp Vault
- Methodologies & Tools:** Agile/Scrum, TDD/BDD, Microservices, REST, GraphQL, SOAP, OpenTelemetry, Grafana, Splunk, Jira, Confluence, GitHub Copilot

WORK EXPERIENCE

Java Full Stack Developer | Webster Bank, Irving, TX | Jan 2024 – Present

- Led the end-to-end development of a low-latency financial trading platform, architecting Spring Boot 3.1 microservices (Java 17) deployed on AWS EKS, which processed millions of daily transactions and **improved settlement throughput by 40%**.
- Simultaneously engineered a critical healthcare data pipeline for a client, developing GraphQL APIs with Spring Boot that streamlined electronic health record (EHR) access, **reducing data fetch times by 60%** for clinical dashboards.
- Integrated AWS SageMaker for real-time fraud scoring in financial payment workflows, **reducing false positives by 25%**, and implemented a secure, event-driven architecture for patient lab result routing using Kafka, ensuring HIPAA compliance.
- Secured client applications by implementing OAuth 2.0, mTLS, and RBAC; achieved and maintained **PCI-DSS and HIPAA compliance** through automated security controls with AWS Config, GuardDuty, and KMS encryption.
- Championed a GitOps-based CI/CD pipeline using Jenkins and Bitbucket, incorporating security gates (OWASP ZAP) and quality checks (SonarQube), enabling reliable blue-green deployments and **reducing release cycles by 30%**.

Java Full Stack Developer | Accenture | Bengaluru, India | Jan 2024 – Aug 2024

- Developed and scaled Spring Boot microservices for an OSS/BSS platform, leveraging Apache Kafka to process **over 1 million order events per minute** and support 24/7 telecom operations.
- Migrated monolithic applications to a containerized microservices architecture on AWS EKS, improving scalability and reducing infrastructure costs by **20%**.
- Implemented a comprehensive testing framework and CI/CD pipeline, enabling zero-downtime blue-green deployments and improving release velocity.
- Established a full observability stack with OpenTelemetry, Prometheus, and Grafana, **reducing mean-time-to-detection (MTTD) for issues by 50%**.

Java Full Stack Developer | Accenture, Bengaluru, India | Aug 2021 – Jul 2023

- Designed and developed Spring Boot microservices for financial underwriting and loan management systems, supporting both REST and SOAP APIs.
- Optimized complex SQL queries and PL/SQL procedures on Oracle 12c, **improving report generation speed by 35%**.
- Containerized applications with Docker and deployed on AWS ECS, establishing foundational IaC practices with Terraform and CloudFormation.
- Implemented automated testing strategies with JUnit and Selenium, increasing code coverage and reducing production bugs.

EDUCATION

Master of Science in Data Science and Analytics
University of Oklahoma, Norman, OK

Aug 2022 – May 2024
